ASSESSMENT OF BOARD OF DIRECTORS' PERFORMANCE

In assessing Board of Directors' performance, the Board of Commissioners considers several factors, which are financial and market aspects, customer focus aspects, product and process effectiveness, workforce focus, and aspects of leadership, governance, and social responsibility. An explanation of the Board of Directors performance evaluation during the fiscal year is presented as follows.

Global and national economic challenges that occur in 2019 greatly affected the Company's performance as the Company engaged in the field of airlines. The world economy experienced a slowdown in growth, from 3.6% in 2018 to 2.9% in 2019. The same thing happened in the national economy which also experienced a decline in growth, although not too significant. Indonesia's economic growth in 2019 of 5.02% was a slight decreased compared to that of 2018 of 5.17%.

Global and national economic conditions that still faced significant challenges have had an impact on the aviation industry. The global aviation industry in general experienced a decline in performance in 2019 compared to that of 2018. The number of domestic passengers decreased significantly by 20.11% while international passengers decreased by 1.50%. In total, the number of passengers in Indonesia experienced 15.09% compared to that of 2018.

From the financial and market aspects, the Company succeeded in increasing operating revenues in 2019 by USD4.57 billion, an increase of 5.59% compared to that of 2018 of USD4.33 billion. The increase in operating revenue was then followed by an increase in income for the year 2019 which reached USD6.46 million, an increase of 102.82% compared to that of 2018, which suffered a loss of USD228.89 million. Financial position in 2019, the Company succeeded in increasing Assets and Equity. Assets in 2019 reached USD4.46 billion, an increase of 7.22% compared to that of 2018 which reached USD4.16 billion. Equity in 2019 reached USD720.62 million, an increase of 12.63% compared to that of 2018 which reached USD639.81 million.

From the customer focus aspect, although the market share in Indonesia decreased compared to that of 2018, the Company managed to increase the Group's domestic market share by 3.22% compared to that of 2018. In 2019, Garuda Indonesia domestically had a market share of 29.14% while Citilink of 13.26, thus in total, the Company had a domestic market share of 42.40%. This increase in domestic market share was in line with the increase in

Selain itu Garuda Indonesia juga mencapai *The Best on Time Performance* (OTP) sebagai *Five Star Airline* dengan nilai OTP sebesar 91,6% tertinggi di dunia sesuai dengan penghargaan yang resmi diberikan oleh *Official Airline Guide Flight View* pada 27 Juni 2019.

Berdasarkan aspek efektivitas produk dan proses, *Cost per unit ASK (CASK)* sebesar US\$ 6,42 mengalami peningkatan sebesar 5,25% dibandingkan dengan tahun 2018 hal ini disebabkan oleh penyesuaian kapasitas produksi yang dilakukan Perseroan. Namun di sisi lain Perseroan dapat menutupi kenaikan biaya per unit dengan meningkatkan *yield* untuk menjaga profitabilitas perseroan dan melakukan efisiensi biaya operasional terutama dari biaya bahan bakar dan sewa pesawat.

Berdasarkan aspek fokus tenaga kerja, setelah 5 tahun berturut-turut Garuda memperoleh penghargaan sebagai *The Best Cabin Crew*, pada tahun 2019 Garuda Indonesia masih mencapai kedua setelah Singapore Airlines.

customer satisfaction with the services provided by the Company as a Group.

Furthermore, Garuda Indonesia also achieved the Best On Time Performance (OTP) as a five-star airline with OTP value of 91.6%, the highest in the world according to the official award given by the Official Airline Flight Guide View on June 27, 2019

Based on aspects of product and process effectiveness, the Cost per unit of ASK (CASK) of US\$ 6.42 increased by 5.25% compared to that of 2018. This was due to the adjustment of production capacity performed by the Company. However on the other hand, the Company can cover the increase in unit costs by increasing yields to maintain the Company's profitability and perform operational cost efficiency, especially of fuel costs and aircraft rental.

Based on the aspect of workforce focus, after 5 years in a row Garuda received an award as The Best Cabin Crew. In 2019, Garuda Indonesia still reached second place after Singapore Airlines.

Based on aspects of leadership, governance, and social responsibility, the evaluation (review) results of the implementation of Company's GCG for the 2018 fiscal year, which was evaluated in 2019 by the Company on a self-assessment with the assistance of the Company's independent assessor, obtained a score of 93.115 with the category “Very Good”. Furthermore, the Company also distributed fund for Partnership and Community Development Program (PKBL) of Rp7.41 billion, an increase compared to that of 2018 of Rp5.55 billion. The Company also routinely and timely reports on Investment Realization, Financial Statements, RKAP, Performance Evaluation, and Analyst Meeting Reports in the SOE portal.

Details of the Board of Directors' performance assessment are as follows:

Berdasarkan beberapa pertimbangan di atas, Dewan Komisaris memberikan apresiasi setinggi-tingginya atas pencapaian Direksi dalam kegiatan kepengurusan Perseroan di tengah kondisi perekonomian yang penuh dengan tantangan di tahun 2019.

PANDANGAN ATAS PROSPEK USAHA YANG DISUSUN DIREKSI

Dewan Komisaris berpandangan bahwa prospek usaha yang telah disusun oleh Direksi sudah realistik didasarkan pada proyeksi perekonomian di masa datang dan kekuatan-kekuatan yang dimiliki oleh Perseroan saat ini. Perekonomian Dunia dan Nasional diprediksi akan mengalami sedikit peningkatan di tahun 2020. Sebagaimana disampaikan oleh World Bank dalam *Global Economic Prospect* di bulan Januari 2020, bahwasanya perekonomian dunia tahun 2020 diprediksi meningkat tipis dari tahun 2019 dan berada pada kisaran angka 2,5%. Meskipun demikian, beberapa pihak memprediksi bahwa perekonomian nasional masih akan mengalami perlambatan di tahun 2020.

Berdasarkan hal tersebut, Dewan Komisaris tetap perpandangan optimis akan prospek usaha Perseroan kedepannya. Potensi pasar penumpang penerbangan dapat diprediksi dari komposisi jumlah masyarakat kelas menengah atau *Middle Class and Affluent Consumer* (MAC) di suatu negara. Saat ini pertumbuhan jumlah masyarakat kelas menengah atau MAC di Indonesia terjadi di Pulau Jawa dan Sumatera, dengan potensi total populasi sebesar 141 juta di tahun 2020. Berdasarkan data dari Kementerian Perhubungan yang dikombinasikan dengan data dari BPS, pada tahun 2020-2030 pertumbuhan pasar domestik diprediksi sebesar 5,7% sedangkan pasar internasional diprediksi sebesar 4,0%.

Prospek Usaha Garuda Indonesia juga terlihat dari adanya dukungan dari *Strategic Business Unit* (SBU) dan Entitas Anak yang dimiliki Perseroan. Dalam menjalankan bisnisnya, Garuda Indonesia didukung oleh SBU dan entitas anak yang terdiri dari SBU *Loyalty and Ancillary Revenue* dan *Umrah and Hajj* serta entitas anak baik dalam bidang aviasi maupun non aviasi. Dalam perusahaan bidang aviasi, Garuda Indonesia Group memiliki perusahaan Garuda Indonesia, GMF AeroAsia, dan Citilink. Sedangkan untuk perusahaan bidang non aviasi Garuda Indonesia Grup memiliki perusahaan Aerowisata, Asyst, Sabre Travel Network Indonesia, dan Garuda Indonesia *Holiday France* yang bekerjasama dalam mendukung pengembangan dari Garuda Indonesia. Dukungan tersebut, akan memperkuat prospek usaha Perseroan di masa yang akan datang.

Based on the above considerations, the Board of Commissioners highly appreciates the achievements of the Board of Directors in managing the Company in the midst of challenging economic conditions in 2019.

VIEWS ON BUSINESS PROSPECTS PREPARED BY THE BOARD OF DIRECTORS

The Board of Commissioners views that the business prospects that have been prepared by the Board of Directors are realistic based on future economic projections and the current strengths of the Company. The World and National Economies are predicted to experience a slight increase in 2020. As stated by the World Bank in the Global Economic Prospect in January 2020, the world economy in 2020 is predicted to increase slightly from that of 2019 and be in the range of 2.5%. Nevertheless, some parties predicted that the national economy will still experience a slowdown in 2020.

Based on this, the Board of Commissioners remains optimistic on the Company's business prospects to the future. The potential market for airline passengers can be predicted from the composition of the number of Middle Class and Affluent Consumer (MAC) in a country. Currently, the growth of the middle class or MAC population in Indonesia is happening on Java and Sumatra islands, with a potential total population of 141 million by 2020. Based on data from the Ministry of Transportation combined with data from Statistics Indonesia (BPS), in 2020-2030 the domestic market growth is predicted to be 5.7% while the international market is predicted to be 4.0%.

Garuda Indonesia's Business Prospects can also be seen from the support of the Strategic Business Unit (SBU) and its Subsidiaries. In running its business, Garuda Indonesia is supported by SBU and its subsidiaries which consist of SBU Loyalty and Ancillary Revenue and Umrah and Hajj, as well as its subsidiaries in aviation and non-aviation fields. In aviation sector, Garuda Indonesia Group has Garuda Indonesia, GMF AeroAsia, and Citilink. In non-aviation sector, Garuda Indonesia Group has Aerowisata, Asyst, Sabre Travel Network Indonesia, and Garuda Indonesia Holiday France, which cooperate in order to support the development of Garuda Indonesia. Such support will strengthen the Company's business prospects in the future.

PANDANGAN ATAS PENERAPAN TATA KELOLA PERUSAHAAN

Pada tahun 2019, Garuda Indonesia menghadapi tantangan terkait penerapan tata kelola perusahaan. Oleh karena itu, Dewan Komisaris berpandangan bahwa Direksi telah menghadapi tantangan tersebut dengan baik yang terlihat dari pencapaian kinerja yang baik di tahun 2019. Dewan Komisaris berpandangan bahwa beberapa mekanisme *corporate governance*, seperti sistem pengendalian internal, penerapan kode etik dan *whistleblowing system* telah dijalankan dengan baik.

SISTEM PENGENDALIAN INTERNAL

Pengawasan dan pengendalian internal pada tingkat Dewan Komisaris dibantu oleh Komite Audit. Fungsi pengawasan dan pengendalian juga mencakup fungsi yang melekat pada setiap unit bisnis termasuk unit-unit pendukung (*embedded internal control*), Unit Internal Audit, dan Manajemen Risiko.

Hasil pelaksanaan pengawasan selama tahun 2019, unit Internal Audit PT Garuda Indonesia (Persero) Tbk telah melaksanakan Program Kerja Pengawasan Tahunan, atas pelaksanaan program kerja tersebut Internal Audit PT Garuda Indonesia telah menerbitkan 54 laporan hasil pemeriksaan, terdiri dari 41 Laporan Hasil Pemeriksaan (LHP) dan 13 hasil pemeriksaan dalam bentuk *Interoffice Correspondence* (IOC), dari hasil pemeriksaan Internal Audit telah menyampaikan temuan audit dan rekomendasi untuk perbaikan bisnis proses kepada unit-unit terkait yang ada di Garuda dan unit di Anak Perusahaan.

Berdasarkan hasil pemeriksaan atas kegiatan operasional Perseroan sepanjang tahun 2019, diperoleh kesimpulan bahwa sistem pengendalian internal Perseroan telah dilakukan secara memadai dan konsisten. Dewan Komisaris memandang bahwa sistem pengendalian internal secara umum sudah berjalan dengan baik, efektif dan efisien, tetapi masih memerlukan perbaikan dan penyempurnaan dalam aspek sistem maupun kebijakan.

PENERAPAN CODE OF CONDUCT

Dalam rangka pengembangan dan penyempurnaan praktik *Good Corporate Governance* (GCG), Perseroan telah merumuskan kebijakan terkait kode etik berupa Pedoman Etika Bisnis dan Etika Kerja yang berperan sebagai pedoman standar sikap dan perilaku dalam pelaksanaan segenap aktivitas bisnis sekaligus pencapaian visi dan misi Perseroan. Sebagai pedoman sikap dan perilaku, Pedoman Etika Bisnis dan Etika Kerja mengacu pada praktik industri terbaik dengan memperhatikan kesesuaian terhadap peraturan perundang-undangan yang berlaku di Indonesia. Melalui penerapan Pedoman Etika Bisnis dan Etika Kerja yang menyeluruh untuk seluruh insan Perseroan tanpa terkecuali, Dewan Komisaris berpandangan bahwa Perseroan telah mampu meningkatkan kesadaran dan mengarahkan pola pikir, sikap, dan perilaku segenap pegawai

VIEWS ON CORPORATE GOVERNANCE IMPLEMENTATION

In 2019, Garuda Indonesia faced challenges related to the implementation of corporate governance. Therefore, the Board of Commissioners views that the Board of Directors faced such challenges properly as seen from the good performance achievement in 2019. The Board of Commissioners views that several corporate governance mechanisms, such as the internal control system, implementation of code of conduct, and whistleblowing system have been implemented well.

INTERNAL CONTROL SYSTEM

Monitoring and internal control at the Board of Commissioners level are assisted by the Audit Committee. The monitoring and control functions also include functions inherent in each business unit, including the supporting units (embedded internal control), Internal Audit Unit, and Risk Management.

The monitoring results throughout 2019 showed that the Internal Audit unit of PT Garuda Indonesia (Persero) Tbk conducted the Annual Supervision Work Program. By conducting the work program, PT Garuda Indonesia's Internal Audit had published 54 audit reports, consisting of 41 Audit Reports (LHP) and 13 examination results in the form of Interoffice Correspondence (IOC). From the examination results, Internal Audit had submitted audit findings and recommendations for business process improvement to the related units in Garuda and units in the Subsidiaries.

Based on the examination results of the Company's operational activities throughout 2019, it was concluded that the Company's internal control system had been carried out adequately and consistently. The Board of Commissioners considers that the internal control system in general has been running well, effectively, and efficiently, but it still needs improvement and refinement in the system and policy aspects.

IMPLEMENTATION OF CODE OF CONDUCT

In the context of developing and refining Good Corporate Governance (GCG) practices, the Company has formulated a policy related to a code of ethics in the form of Code of Business Ethics and Work Ethics, which acts as a standard guideline for attitudes and behavior in the implementation of all business activities while achieving the Company's vision and missions. As a guideline for attitudes and behavior, the Code of Business Ethics and Work Ethics refers to the industry best practices with due regard to compliance with the applicable laws and regulations in Indonesia. By comprehensively implementing the Code of Business Ethics and Work Ethics by all employees of the Company without exception, the Board of Commissioners believes that the Company has been able to increase awareness and direct the mindset, attitudes, and behavior of all employees

pada pengelolaan usaha yang baik sesuai prinsip-prinsip GCG dan hubungan yang selaras dengan pemangku kepentingan dalam jangka waktu panjang.

Hasil pemeriksaan yang dilakukan Unit Audit Internal tahun 2019 menghasilkan sebanyak 335 (tiga ratus tiga puluh lima) rekomendasi yang sedang dalam proses dan telah selesai ditindaklanjuti sebanyak 100 (seratus) rekomendasi. Sedangkan hasil pemeriksaan yang dilakukan oleh Eksternal Auditor, yaitu BPK RI, total terdapat 184 (seratus delapan puluh empat) rekomendasi dan sebanyak 153 (seratus lima puluh tiga) rekomendasi telah selesai ditindaklanjuti per 31 Desember 2019.

PENERAPAN WHISTLEBLOWING SYSTEM

Perseroan memiliki sistem pelaporan dugaan pelanggaran atau *whistleblowing system* (WBS) secara online melalui sistem berbasis web dengan alamat www.ga-whistleblower.com atau melalui surat elektronik whistleblower@garuda-indonesia.com. Pengelolaan WBS meliputi kegiatan penanganan laporan, investigasi laporan, hingga penindakan terhadap terlapor apabila terbukti terjadi pelanggaran etika bisnis dan etika kerja. Pihak yang mengelola WBS dilakukan oleh pihak independen. Laporan-laporan yang masuk ke website WBS ditangani oleh WBS Officer yang akan melakukan analisis mengenai ada atau tidaknya indikasi pelanggaran etika bisnis maupun etika kerja.

Dewan Komisaris senantiasa memastikan bahwa setiap laporan yang masuk melalui WBS telah ditindaklanjuti oleh Direksi Perseroan. Independensi dari tindak lanjut laporan tersebut menjadi fokus perhatian Dewan Komisaris dan merupakan bagian dari fungsi Dewan Komisaris terkait dengan program WBS. Dewan Komisaris berpandangan bahwa penerapan WBS telah berjalan dengan baik. Pada tahun 2019, jumlah total laporan yang diterima di website dan email yang dikelola oleh WBS Officer adalah berjumlah 20 laporan. Dari total laporan yang masuk tersebut sebanyak 4 laporan atau sebesar 20% di antaranya merupakan laporan terkait dugaan pelanggaran, sedangkan sisanya sebanyak 16 laporan atau sebesar 80% bukan termasuk laporan dugaan pelanggaran. Laporan terkait dugaan pelanggaran telah ditindaklanjuti dan telah diproses sesuai ketentuan yang berlaku.

Namun demikian, Dewan Komisaris memberikan arahan bahwa kedepannya Perseroan harus terus berupaya untuk membenahi dan memperbaiki sistem WBS agar dapat berjalan dengan efektif dan efisien. Berbagai metode sosialisasi harus terus digaungkan guna meningkatkan pemahaman dan kesadaran setiap individu. Upaya ini dilakukan dengan menyempurnakan peraturan, bekerja sama dengan pihak independen serta memastikan sistem informasi teknologi yang digunakan untuk WBS berjalan dengan lancar.

to good business management in accordance with GCG principles and harmonious relationship with the stakeholders in the long-term.

The results of examination conducted by the Internal Audit Unit in 2019 resulted in 335 (three hundred thirty-five) recommendations in which 100 (one hundred) recommendations were in process and had been completed. While the results of examination conducted by the External Auditor, which was BPK RI, a total of 184 (one hundred eighty-four) recommendations were given and as many as 153 (one hundred fifty-three) recommendations had been followed up as of December 31, 2019.

IMPLEMENTATION OF WHISTLEBLOWING SYSTEM

The Company has a whistleblowing system (WBS) reporting system for alleged violations online through a web-based system at the address www.ga-whistleblower.com or via e-mail whistleblower@garuda-indonesia.com. WBS management includes handling reports, investigating reports, and taking action against the reported parties if there is evidence of violations of business ethics and work ethics. The party managing WBS is conducted by an independent party. Reports entering the WBS website are handled by the WBS Officer who will conduct an analysis of whether or not there are indications of violations of business ethics or work ethics.

The Board of Commissioners always ensures that every report submitted through WBS has been followed up by the Company's Board of Directors. The independence of the follow-up to the report is the focus of the Board of Commissioners' attention and is part of the Board of Commissioners' functions related to the WBS program. The Board of Commissioners believes that the WBS system has been properly implemented. In 2019, the total number of reports received via the website and e-mail managed by the WBS Officer was 20 reports. From the total reports submitted, 4 reports or 20% of them are reports related to alleged violations, while the remaining 16 reports or 80% are not included as reports of alleged violations. Reports related to alleged violations have been followed up and have been processed according to the applicable regulations.

However, the Board of Commissioners gives direction that in the future the Company must continue to strive to improve and refine the WBS system so that it can run effectively and efficiently. Various methods of dissemination must continue to be echoed in order to increase each individual's understanding and awareness. This effort is carried out by perfecting regulations, cooperating with independent parties, and ensuring that the information technology system used for WBS runs smoothly.

LAPORAN DIREKSI

Board of Directors Report

Yang kami hormati para pemegang saham dan pemangku kepentingan Perseroan.
To the honorable shareholders and stakeholders of the Company. `

Puji syukur kami panjatkan atas karuniaNya, Perseroan masih tetap mampu untuk memberikan kontribusi terbaik kepada negara Indonesia dengan capaian yang diperoleh di tahun 2019. Pada kesempatan ini perkenankanlah kami menyampaikan laporan kepengurusan Perseroan untuk tahun buku 2019.

ANALISIS ATAS KINERJA PERUSAHAAN

Direksi telah berupaya dengan bersungguh-sungguh dalam menjalankan kegiatan di tengah kondisi internal maupun eksternal yang menghadapi tantangan cukup signifikan. Pertumbuhan ekonomi dunia turun dari 3,6% pada tahun 2018 menjadi 2,9% pada tahun 2019. Perang dagang telah menurunkan pertumbuhan ekonomi Amerika Serikat (AS) dari 2,9% pada tahun 2018 menjadi 2,3% pada tahun 2019. Ekspor AS mengalami tekanan sehingga berdampak pada permintaan domestik, terutama investasi nonresidensial dan konsumsi rumah tangga. Demikian halnya dengan Tiongkok, ekspor dan investasi berdampak pada pertumbuhan ekonomi Tiongkok yang menurun dari 6,6% pada tahun 2018 menjadi 5,9% pada 2019. Pertumbuhan ekonomi di Eropa, Jepang, India, dan banyak negara juga mengalami tekanan. Pelonggaran kebijakan moneter berupa penurunan suku bunga dan ekspansi neraca Bank Sentral di berbagai negara belum mampu mencegah perlambatan ekonomi dunia.

Sejalan dengan perekonomian dunia, meskipun mengalami sedikit peningkatan, perekonomian Indonesia masih belum sepenuhnya pulih. Pertumbuhan ekonomi Indonesia masih tetap perlu terus didorong sehingga tetap berdaya tahan di tengah risiko tertundanya prospek pemulihan perekonomian dunia. Pada 2019, pertumbuhan ekonomi tetap baik yakni 5,02%, meskipun lebih rendah dibandingkan dengan tahun 2018 sebesar 5,17%.

Kondisi perekonomian dunia maupun nasional telah memberikan dampak terhadap industri penerbangan. Industri penerbangan global secara umum mengalami penurunan kinerja di tahun 2019 dibandingkan tahun 2018. Pertumbuhan *passenger traffic* (*Revenue Passenger Kilometers/RPK*) di tahun 2019 sebesar 4,2% mengalami penurunan dibandingkan tahun 2018 yang sebesar 7,4%. Sedangkan pertumbuhan *Passenger Capacity* (*Avaible Seat Kilometer/ASK*) juga mengalami penurunan dari 6,9% di tahun 2018 menjadi 3,5% di tahun 2019. Sejalan dengan kondisi industri penerbangan global, pertumbuhan *passenger traffic* Asia Pasific turun dari 9,5% di tahun 2018 menjadi 4,7% di tahun 2019. Sedangkan pertumbuhan *passenger capacity* Asia Pasific dari 8,8% di tahun 2018

All praise and gratitude are due to the Almighty God for all the gifts bestowed upon us all, the Company is still able to provide the best contribution to the Indonesian country with its achievements in 2019. On this occasion, please allow us to submit the Company's management report for the 2019 fiscal year.

ANALYSIS OF COMPANY PERFORMANCE

The Board of Directors has made serious efforts in carrying out activities in the midst of internal and external conditions that face significant challenges. World economic growth fell from 3.6% in 2018 to 2.9% in 2019. The trade war has reduced the economic growth of the United States (US) from 2.9% in 2018 to 2.3% in 2019. US exports have been under pressure which has an impact on domestic demand, especially non-residential investment and household consumption. Similarly in China, exports and investment have an impact on China's economic growth which decreased from 6.6% in 2018 to 5.9% in 2019. Economic growth in Europe, Japan, India, and many countries also experienced pressure. Easing monetary policy by reducing interest rates and expanding the Central Bank's balance sheet in various countries was not able to prevent a slowdown in the world economy.

In line with the world economy, despite a slight increase, the Indonesian economy has not yet fully recovered. Indonesia's economic growth needs continuous encouragement so that it remains resilient amid the risk of delays in the prospect of world economy recovery. In 2019, economic growth remained good at 5.02%, although it was lower than that of 2018 of 5.17%.

World and national economic conditions have had an impact on the aviation industry. The global aviation industry in general experienced a decline in performance in 2019 compared to that of 2018. Passenger traffic (*Revenue Passenger Kilometers/RPK*) growth in 2019 was 4.2%, a decrease compared to that of 2018, which was 7.4%. Whereas growth in Passenger Capacity (*Available Seat Kilometers/ASK*) also decreased from 6.9% in 2018 to 3.5% in 2019. In line with the conditions of global aviation industry, Asia Pacific Passenger traffic growth fell from 9.5% in 2018 to 4.7% in 2019. While Asia Pacific's passenger capacity growth was 8.8% in 2018 and 4.4% in 2019. In line with the global aviation industry, the growth of domestic air transport passengers during 2019 experienced a relatively

menjadi 4,4% di tahun 2019. Sejalan dengan industri penerbangan global, pertumbuhan penumpang angkutan udara domestik sepanjang tahun 2019 mengalami penurunan yang cukup signifikan hingga 20,11% persen dibanding periode yang sama tahun sebelumnya.

Untuk menghadapi seluruh tantangan dan peluang yang ada, Garuda Indonesia telah berusaha memanfaatkan kekuatan dan berusaha mengatasi keterbatasan yang Garuda Indonesia miliki saat ini.

Strategi tahun 2019 merupakan bagian dari strategi jangka Panjang 2017-2020 yang menekankan pada “*Beyond Airline Business*.” Oleh karena itu, selain bisnis ini maskapai penerbangan, Program Kerja tahun 2019 berfokus kepada program-program kerja utama untuk mengembangkan pendapatan di luar bisnis penerbangan, sehingga menjadi dasar yang cukup kuat bagi Garuda Indonesia untuk berkembang dan berekspansi di tahun-tahun selanjutnya. Strategi yang diterapkan adalah:

1. Multiple Joint Venture by Garuda Maintenance Facility (GMF)

Sebagai entitas anak Garuda Indonesia yang bergerak di bidang *Maintenance, Repair, and Overhaul* (MRO), GMF AeroAsia memiliki potensi yang cukup besar untuk terus mengembangkan bisnisnya, sebagai bagian dari langkah strategis setelah *Initial Public Offering* (IPO) di kuartal IV tahun 2017. Sebagai kelanjutan dari proses IPO tersebut, GMF bersama-sama dengan Garuda sedang menjajaki kemungkinan adanya investasi dari satu atau lebih investor strategis pada GMF. Pengembangan bisnis MRO di Indonesia dan lingkup Asia Pasifik akan dimulai di tahun 2019 ini melalui kerjasama *joint venture* dengan beberapa *partner strategis*.

2. Joint Venture for International Routes in North Asia, Middle East and Europe

Pengembangan jaringan rute penerbangan Garuda Indonesia saat ini telah dibangun melalui rute dan destinasi penerbangan yang diterbangi sendiri oleh Garuda, koneksi jaringan penerbangan anggota aliansi penerbangan SkyTeam, serta kerjasama *interline* dan *codeshare* dengan beberapa partner maskapai. Untuk meraih potensi rute-rute yang belum dimiliki oleh Garuda Indonesia di North Asia, Middle East, and Eropa, maka di tahun 2019 Garuda Indonesia berencana untuk menjalin kerjasama strategis berupa *joint venture* dengan beberapa *partner* di area tersebut.

3. Garuda Aviation Services

Pengembangan bisnis layanan aviasi Garuda Indonesia Group yang saling bersinergi (pemanfaatan sumber daya yang terpusat/*pool resources*, penciptaan layanan aviasi yang terintegrasi – catering, *ground handling*, logistik, pergudangan dan lain-lain).

significant decline of up to 20.11% percent compared to the same period the previous year.

To face all of the existing challenges and opportunities, Garuda Indonesia has tried to utilize its strengths and try to overcome its current limitations.

The 2019 strategy is part of the 2017-2020 Long-term strategy that emphasizes “*Beyond Airline Business*”. Therefore, in addition to this airline business, the 2019 Work Program focuses on major work programs to develop revenue beyond the aviation business, so that it becomes a strong foundation for Garuda Indonesia to develop and expand in the subsequent years. The strategies applied are:

1. Multiple Joint Ventures by Garuda Maintenance Facility (GMF)

As a subsidiary of Garuda Indonesia engaged in Maintenance, Repair, and Overhaul (MRO), GMF AeroAsia has considerable large potential to continue to develop its business as part of a strategic step after its Initial Public Offering (IPO) in the fourth quarter of 2017. Following the IPO, GMF together with Garuda are exploring the possibility of investment from one or more strategic investors in GMF. MRO business development in Indonesia and Asia Pacific region would begin in 2019 through a joint venture with several strategic partners.

2. Joint Ventures for International Routes in North Asia, Middle East, and Europe

Development of Garuda Indonesia flight route network has now been built through Garuda's own routes and flight destinations, connectivity of SkyTeam flight alliance network members, as well as interline and codeshare cooperation with several airline partners. To reach potential routes that are not owned by Garuda Indonesia in North Asia, Middle East, and Europe, in 2019 Garuda Indonesia planned to establish a strategic partnership in the form of a joint venture with several partners in these areas.

3. Garuda Aviation Services

Development of Garuda Indonesia Group's aviation services business that synergizes with each other (utilization of centralized resources/pool resources, creation of integrated aviation services – catering, ground handling, logistics, warehousing and others).

4. **Cargo End to End Solution**

Solusi layanan *cargo end-to-end*, yaitu layanan kargo yang terintegrasi untuk pelanggan, dimulai dari layanan pengambilan barang di *point of pick up* lalu ke bandara (*airport*) hingga tempat tujuan.

Dalam periode jangka pendek, untuk mendukung pelaksanaan Program Kerja 2019 maka Garuda Indonesia menetapkan beberapa Strategi Jangka Pendek (*Quick Wins*) untuk dapat segera memperbaiki kinerja, yang telah mulai dilakukan dengan *progress* yang baik di 2018 dan akan terus dilanjutkan di 2019. Garuda Indonesia akan fokus kepada peningkatan *capability* dan *capacity* pegawai, peningkatan pendapatan dan memperbaiki struktur biaya melalui organisasi yang berbasis *shared service*, termasuk sentralisasi pengadaan, sehingga dapat meningkatkan kepuasan internal *customer* yang akhirnya berujung peningkatan kepuasan *external customer*. Peningkatan pendapatan dilakukan melalui perluasan pasar, memperbaiki produk, merubah cara berjualan, menutup kebocoran-kebocoran dan ketidakefisienan, menjalankan *Business Integrated Logistic* (bukan hanya Kargo), dan *New Business* yang berhubungan dengan dunia transportasi udara.

Dengan menerapkan berbagai strategi tersebut, Perseroan mampu memberikan kinerja yang baik di 2019. Meskipun kinerja belum mencapai yang ditargetkan, namun di tengah tantangan yang dihadapi oleh Perseroan, kinerja Perseroan tidak terlalu jauh dari yang ditargetkan. Pada tahun 2019, pendapatan usaha mencapai target sebesar 78,66%. Sedangkan untuk *Available Seat Kilometers* (ASK) dan *Passenger carried* masing-masing mencapai 80,33% dan 78,76%. *Passenger yield* berhasil melampaui target yang mencapai 100,89% sedangkan untuk *Cargo carried* mencapai target 70,94%.

Meskipun target belum sepenuhnya tercapai, namun kinerja Perseroan mengalami peningkatan dari tahun sebelumnya. Pendapatan usaha tahun 2019 mencapai USD4,57 miliar, meningkat 5,59% dibandingkan tahun 2018 yang mencapai USD4,33 miliar. Peningkatan pendapatan kemudian diikuti dengan peningkatan laba tahun berjalan tahun 2019 yang mencapai USD6,46 juta, meningkat 102,82% dibandingkan tahun 2018 yang mencatatkan rugi sebesar USD228,89 juta.

Hal yang sama juga terlihat dari sisi asset dan ekuitas. Pada tahun 2019, Perseroan telah berhasil meningkatkan Aset dan Ekuitas. Aset tahun 2019 mencapai USD4,46 miliar meningkat 7,22% dibandingkan tahun 2018 yang mencapai USD4,16 miliar. Ekuitas tahun 2019 mencapai USD720,62 juta, meningkat 12,63% dibandingkan tahun 2018 yang mencapai USD639,81 juta.

4. **Cargo End to End Solution**

End-to-end cargo service solution is an integrated cargo service for customers, starting from the service of picking up goods at the pick up point then going to the airport (airport) to the destination.

In the short-term period, to support the implementation of the 2019 Work Program, Garuda Indonesia had set a number of Short-Term Strategies (*Quick Wins*) to be able to immediately improve its performance, which has been carried out with good progress in 2018 and will continue in 2019. Garuda Indonesia will focus on improving employee capability and capacity, increasing revenue and improving cost structures through shared service-based organizations, including centralization of procurement, in order to increase customer internal satisfaction which ultimately will result in increased external customer satisfaction. The increase in revenue is done through market expansion, improving products, changing the way of selling, closing leaks and inefficiencies, running Business Integrated Logistics (not just Cargo), and New Business related to the air transportation world.

By implementing these various strategies, the Company was able to provide good performance in 2019. Although the performance has not yet reached the target, nonetheless in the midst of the challenges faced by the Company, the Company's performance was not too far from the target. In 2019, operating revenue reached the target of 78.66%. Whereas Available Seat Kilometers (ASK) and Passenger carried reached 80.33% and 78.76%, respectively. Passenger yield successfully exceeded the target which reached 100.89% while Cargo carried reached the target of 70.94%.

Although the target has not been fully achieved, the Company's performance has improved from that of previous year. Operating revenues in 2019 reached USD4.57 billion, an increase of 5.59% compared to that of 2018 which reached USD4.33 billion. The increase in revenue was then followed by the increase profit/(loss) for the year 2019 which reached USD6.46 million, an increase of 102.82% compared to that of 2018 which recorded a loss of USD228.89 million.

Similar matter is also seen in terms of assets and equity. In 2019, the Company succeeded in increasing Assets and Equity. Assets in 2019 reached USD4.46 billion, an increase of 7.22% compared to that of 2018 which reached USD4.16 billion. Equity in 2019 reached USD720.62 million, an increase of 12.63% compared to that of 2018 which reached USD639.81 million.

Pencapaian kinerja di tahun 2019 tidak dapat dipisahkan dengan bagaimana Perseroan mengatasi kendala-kendala yang dihadapi. Selain tantangan eksternal berupa kondisi perekonomian yang berdampak pada industri penerbangan, Perseroan juga memiliki kendala internal yaitu kapabilitas dan kapasitas pegawai yang masih perlu ditingkatkan. Oleh karena itu pada tahun 2019, Garuda Indonesia telah menerapkan strategi *Corporate Culture Transformation through the development of People, Process & Technology*. Dengan strategi tersebut, Garuda Indonesia fokus kepada peningkatan *capability* dan *capacity pegawai*, membuat pegawai *Happy*, karena pegawai adalah pelanggan dan aset yang harus diutamakan. Dengan pegawai yang *Happy* maka dengan sendirinya pegawai akan memberikan pelayanan terbaik kepada pelanggan.

Perputaran lintas divisi pun akan dilakukan, untuk menciptakan rasa *care* dan mengerti akan *business process* secara keseluruhan. Pegawai Garuda Indonesia adalah keluarga besar termasuk pegawai tetap dan paruh waktu, karena seluruh pegawai adalah *One Family One Nation and One Garuda Indonesia*.

Dengan *people/pegawai* yang baik dan *Happy* akan membuat *business process* yang baik juga. Dan dengan *business process* yang baik tentunya bisa membuat suatu standardisasi dan menghindari penurunan kualitas kerja *people/pegawai*.

Kedua hal di atas (*people and process*) erat hubungannya dan interaksi keduanya harus cepat dan akurat, sehingga Garuda Indonesia telah mengembangkan teknologi, berupa pengembangan dan penyediaan sistem yang dapat mempermudah pengambilan keputusan dan simplifikasi proses bisnis di internal Garuda Indonesia.

ANALISIS TENTANG PROSPEK USAHA

Meskipun Perseroan menghadapi berbagai tantangan di tahun 2019, namun Direksi tetap optimis terhadap kinerja Perseroan di masa yang akan datang. World Bank dalam *Global Economic Prospect* di bulan Januari 2020, menyatakan bahwa perekonomian dunia tahun 2020 diprediksi meningkat dibandingkan dengan tahun 2019. International Monetary Fund (IMF) juga memproyeksikan pertumbuhan ekonomi 2020 yakni sebesar 3,5% sebagaimana tertuang dalam IMF *World Economy Outlook* Januari 2020.

IMF memproyeksikan bahwa negara-negara pasar berkembang (*emerging markets*) di Asia mampu untuk tumbuh jauh lebih baik. Dalam laporan *World Economic Outlook* Januari 2020, IMF memprediksi pertumbuhan ekonomi kelompok *emerging markets* dan negara berkembang akan berada pada kisaran 4,8% pada 2020. Indonesia tumbuh di kisaran 5,3%, cukup tinggi

Achievement of performance in 2019 cannot be separated from how the Company overcomes the obstacles encountered. In addition to external challenges in the form of economic conditions that have an impact on the aviation industry, the Company also has internal constraints, such as employee capabilities and capacity, that still need to be improved. Therefore in 2019, Garuda Indonesia implemented a Corporate Culture Transformation strategy through the development of People, Process, & Technology. With such strategy, Garuda Indonesia focuses on improving employee capability and capacity, making employees Happy, because employees are customers and assets that must be prioritized. With Happy employees, the employees will naturally provide the best service to customers.

A cross-division turnover will be carried out to create a sense of care and an understanding of the overall business process. Garuda Indonesia employees are large families including permanent and part-time employees, because all employees are One Family, One Nation, and One Garuda Indonesia.

Good and Happy people/employees will make a good business process as well. Furthermore, a good business process can certainly create a standardization and avoid reducing the quality of work of people/employees.

The two matters above (people and process) are closely related and their interactions shall be fast and accurate, therefore, Garuda Indonesia has developed a technology in the form of developing and providing systems that can facilitate decision making and simplify the business process in Garuda Indonesia's internal environment.

ANALYSIS OF BUSINESS PROSPECTS

Although the Company faced many challenges in 2019, the Board of Directors remains optimistic about the Company's performance in the future. The World Bank in the Global Economic Prospect in January 2020 stated that the world economy in 2020 is predicted to increase compared to that of 2019. The International Monetary Fund (IMF) also projects 2020 economic growth of 3.5%, as stated in the IMF World Economy Outlook in January 2020.

IMF projects that emerging market countries in Asia will be able to grow much better. In the January 2020 World Economic Outlook report, IMF predicts that economic growth in emerging market groups and developing countries will be around 4.8% in 2020. Indonesia grows around 5.3%, quite high compared to growth of many developed countries experiencing slowdown. This is also supported by

dibandingkan banyak negara maju yang mengalami pelembahan pertumbuhan. Hal ini juga didukung oleh fokus Pemerintah pada stabilitas nilai Rupiah, inflasi yang rendah, defisit fiskal yang sehat, serta defisit transaksi yang berjalan aman.

Terkait dengan industri penerbangan, potensi pasar penumpang penerbangan dapat diprediksi dari komposisi jumlah masyarakat kelas menengah atau *Middle Class and Affluent Consumer* (MAC) di suatu negara. Berdasarkan studi yang dilakukan oleh Ernst and Young pada Mei 2013, populasi MAC dalam komunitas negara mampu mendorong pertumbuhan ekonomi dan menjadi sumber potensi bagi sejumlah pebisnis. Saat ini pertumbuhan jumlah masyarakat kelas menengah atau MAC di Indonesia terjadi di Pulau Jawa dan Sumatera, dengan potensi total populasi sebesar 141 juta di tahun 2020.

Data *market* dan *traffic* penumpang baik domestik maupun internasional tahun 2020 menunjukkan tren peningkatan. Pada 2020, pasar penumpang domestik diproyeksi tumbuh sebesar 4,3% sementara pasar penumpang internasional diproyeksikan tumbuh sebesar 6,6%. Berdasarkan data dari Kementerian Perhubungan yang dikombinasi dengan data dari BPS, pada tahun 2020-2030 pertumbuhan pasar domestik diprediksi sebesar 5,7% sedangkan pasar internasional diprediksi sebesar 4,0%. Pertumbuhan pasar periode 2020-2030 tertinggi akan terjadi pada area layanan Tiongkok, Taiwan dan Hongkong (CTH) yaitu sebesar 5,2%.

Berdasarkan kondisi tersebut, Direksi yakin bahwa prospek usaha ke depan akan lebih baik. Berbagai tantangan dan peluang akan dikelola dengan baik oleh Perseron. Hal ini didasarkan atas pertimbangan sebagai berikut:

1. Armada yang Dimiliki Garuda Indonesia

Per Desember 2019, total armada yang dimiliki oleh Garuda Indonesia berjumlah 142 armada, yang terdiri dari 105 pesawat *narrow-body* dan 37 pesawat *wide-body* dengan rata-rata umur pesawat 7,54 tahun.

2. Dukungan Strategic Business Unit (SBU) dan Entitas Anak

Dalam menjalankan bisnisnya, Garuda Indonesia didukung oleh SBU dan entitas anak yang terdiri dari SBU *Loyalty and Ancillary Revenue* dan *Umrah and Hajj* serta entitas anak baik dalam bidang aviasi maupun non aviasi. the Government's focus on Rupiah stability, low inflation, sound fiscal deficit, and safe current account deficit.

Related to the aviation industry, the potential of the aviation passenger market can be predicted from the composition of the number of middle class or affluent consumers (MAC) in a country. Based on a study conducted by Ernst and Young in May 2013, MAC population in a country's community is able to drive economic growth and become a potential source for a number of business people. Currently, the growth of the middle class or MAC population in Indonesia is happening on Java and Sumatra islands, with a potential total population of 141 million by 2020.

Market data and passenger traffic both domestically and internationally in 2020 shows an increasing trend. In 2020, the domestic passenger market is projected to grow by 4.3% while the international passenger market is projected to grow by 6.6%. Based on data from the Ministry of Transportation combined with data from Statistics Indonesia (BPS), in 2020-2030 the domestic market growth is predicted to be 5.7% while the international market is predicted to be 4.0%. The highest market growth in the period of 2020-2030 will occur in the service areas of China, Taiwan, and Hong Kong (CTH), which is 5.2%.

Based on these conditions, the Board of Directors is confident that future business prospects will be better. Various challenges and opportunities will be managed well by the Company. This is based on the following considerations:

1. Fleet Owned by Garuda Indonesia

As per December 2019, the total fleet owned by Garuda Indonesia was 142 fleets, consisting of 105 narrow-body aircrafts and 37 wide-body aircrafts, with an average age of 7.54 years.

2. Support from Strategic Business Unit (SBU) and Subsidiaries

Citra yang baik ini dapat dimanfaatkan oleh Garuda Indonesia Grup untuk mendominasi pasar domestik melalui *brand* Garuda Indonesia.

4. Kualitas Layanan Cabin Crew Garuda Indonesia

Pelayanan Garuda Indonesia selama ini mengunggulkan keramahtamahan para *cabin crew*. Dengan mengedepankan keramahtamahan khas Indonesia melalui Garuda Indonesia *Experience*, *cabin crew* Garuda Indonesia tercermin lebih tulus dalam melayani para penumpangnya. Semangat ini menjadi kekuatan dan keunggulan Garuda Indonesia. Hal ini semakin dibuktikan dengan penghargaan *World's Best Cabin Crew* yang diberikan oleh Skytrax untuk maskapai Garuda Indonesia selama lima tahun berturut-turut, yaitu tahun 2014, 2015, 2016, 2017, 2018 serta memperoleh peringkat kedua tahun 2019.

As an airline group, Garuda Indonesia has a strong brand image in domestic market. Garuda Indonesia still has a positive image in its market segment. In 2019, Garuda Indonesia was named the best airline in Indonesia in “*Trip Advisor 2019 Travelers Choice Awards*” version, organized by Trip Advisor - the world’s leading travel site.

Furthermore, Garuda Indonesia also made it to the achieve the rank of “*The Best Regional Business Class Asia*” and “*Travelers Choice Major Airline Asia*”. The award was given based on the results of an official announcement by Trip Advisor on April 12, 2019, after completing a rating survey of the best airlines around the world.

In 2019, Garuda Indonesia became *The Best on Time Performance* (OTP) as a five-star airline with an OTP value of 91.6% in accordance with the official award given by the *Official Airline Guide Flight View* on June 27, 2019. Furthermore, Garuda, which is developing its cargo business, won the “*The Best Cargo Airlines for Asia Pacific Sector*” and “*Finalist of Best Airlines for Europe Sector*”, which was awarded by the *Indonesia Cargo Agent Club* on August 14, 2019.

The award received by Garuda Indonesia shows that Garuda Indonesia brand is closely affiliated with service attributes, especially on Indonesian hospitality. This good image can be utilized by Garuda Indonesia Group to dominate the domestic market through Garuda Indonesia brand.

4. Services Quality of Garuda Indonesia's Cabin Crew

Garuda Indonesia services have been promoting the hospitality of the cabin crew. By promoting Indonesian hospitality through the Garuda Indonesia Experience, Garuda Indonesia's cabin crew is reflected to be more sincere in serving the passengers. This spirit becomes Garuda Indonesia's strength and excellence. This is further evidenced by the World's Best Cabin Crew award given by Skytrax to Garuda Indonesia airlines for five years in a row, in 2014, 2015, 2016, 2017, 2018, and received second place in 2019.

Hal ini menjadikan Garuda Indonesia Grup sebagai maskapai dengan pangsa pasar terbesar pada rute-rute yang diterbangi di Indonesia.

Berdasarkan pertimbangan yang telah dijabarkan di atas disertai adanya berbagai peluang, Garuda Indonesia optimis untuk dapat meningkatkan kinerjanya dalam jangka panjang. Dengan kata lain, Garuda Indonesia memiliki prospek usaha yang sangat baik.

EVALUASI PENGEMBANGAN KOMPETENSI

Pengembangan kompetensi bagi pegawai oleh Perseroan akan terus ditingkatkan, terlebih masih ada 18% pegawai yang belum mendapatkan pengembangan kompetensi. Karena masih terlihat kurangnya pengembangan kompetensi bagi *ground staff* yang rata-rata pelatihannya hanya mencapai 28 jam/orang. Sedangkan untuk Pilot mencapai 113 jam/orang dan Awak kabin sebesar 77 jam/orang.

Selanjutnya pencapaian yang saat ini sudah di dapatkan dalam pengembangan kompetensi seperti konten materi dan metode pengembangan, akan terus di tingkatkan mengikuti trend pengembangan SDM pada Perseroan nasional maupun global. Serta, sertifikasi dari regulator yang mengatur tentang pengembangan *competency licensed personnel* juga akan terus di pertahankan.

BIAYA PENGEMBANGAN KOMPETENSI

Total Biaya pengembangan kompetensi sebesar Rp111 miliar, untuk total sebanyak 5.678 pegawai. Sehingga, besarnya biaya pelatihan yang dikeluarkan Perseroan untuk setiap pegawainya adalah sebesar Rp10.813.890.

COMPETENCE DEVELOPMENT EVALUATION

The Company continues to improve the competence development for employees, especially there are still 18% employees who have not received competence development. Furthermore, attention is necessary in regard of even distribution of competency development hours. This is due to the lack of competency development for ground staff whose average training has only reached 28 hours/person. As for the Pilots reached 113 hours/person and cabin crew reached 77 hours/person.

Furthermore, the achievements that have been gained regarding competence development such as material content and development method will continue to be improved following the HR development trend in national and global companies. Also, certifications from regulators governing the competence development of licensed personnel will also be maintained.

COMPETENCE DEVELOPMENT COST

The total cost of competence development was Rp111 billion, for a total of 5,678 employees. Thus, the training cost amount incurred by the Company for each employee was Rp10.813.890.

TINJAUAN PEREKONOMIAN

Economic Overview

Pendapatan usaha tahun 2019 mencapai USD4,57 miliar, meningkat 5,59%, peningkatan ini sejalan dengan kenaikan yield penumpang dan kargo yang masing-masing meningkat sebesar 20,28% dan 47,72%.

Operating revenues in 2019 reached USD4.57 billion, an increase of 5.59%. This increase was in line with the increase in passenger and cargo yields of 20.28% and 47.72%, respectively.

ANALISIS PEREKONOMIAN GLOBAL

Pertumbuhan ekonomi dunia turun dari 3,6% pada tahun 2018 menjadi 2,9% pada tahun 2019. Perang dagang telah menurunkan pertumbuhan ekonomi Amerika Serikat (AS) dari 2,9% pada tahun 2018 menjadi 2,3% pada tahun 2019. Ekspor AS mengalami tekanan sehingga berdampak pada permintaan domestik, terutama investasi nonresidensial dan konsumsi rumah tangga. Demikian halnya dengan Tiongkok, ekspor dan investasi berdampak pada pertumbuhan ekonomi Tiongkok yang menurun dari 6,6% pada tahun 2018 menjadi 5,9% pada 2019. Pertumbuhan ekonomi di Eropa, Jepang, India, dan banyak negara juga mengalami tekanan. Pelonggaran kebijakan moneter berupa penurunan suku bunga dan ekspansi neraca Bank Sentral di berbagai negara belum mampu mencegah perlambatan ekonomi dunia.

GLOBAL ECONOMIC ANALYSIS

World economic growth fell from 3.6% in 2018 to only 2.9% in 2019. The trade war has reduced the economic growth of the United States (US) from 2.9% in 2018 to 2.3% in 2019. US exports have been under pressure which has an impact on domestic demand, especially non-residential investment and household consumption. Similarly in China, exports and investment have an impact on China's economic growth which decreased from 6.6% in 2018 to 5.9% in 2019. Economic growth in Europe, Japan, India, and many countries also experienced pressure. Easing monetary policy by reducing interest rates and expanding the Central Bank's balance sheet in various countries was not able to prevent a slowdown in the world economy.

Sentimen pasar telah didorong oleh tanda-tanda tentatif bahwa aktivitas manufaktur dan perdagangan global berada di posisi terbawah, pergeseran berbasis luas ke arah kebijakan moneter akomodatif, berita-berita menguntungkan yang berselang-seling mengenai negosiasi perdagangan AS-Tiongkok, dan berkurangnya kekhawatiran akan tidak adanya kesepakatan Brexit. Namun, beberapa tanda titik balik belum terlihat dalam data ekonomi makro global.

Market sentiment has been driven by tentative signs that global manufacturing and trade activities are at the lowest level, broad-based shifts are moving to an accommodative monetary policy, alternating favorable news about US-China trade negotiations, and reduced fears that there will be no Brexit agreement. However, some turning points have not yet been seen in global macroeconomic data.

ANALISIS PEREKONOMIAN NASIONAL

Pertumbuhan ekonomi Indonesia perlu terus didorong sehingga tetap berdaya tahan di tengah risiko tertundanya prospek pemulihan perekonomian dunia. Pada 2019, pertumbuhan ekonomi tetap baik yakni 5,02%, meskipun lebih rendah dibandingkan dengan tahun 2018 sebesar 5,17%. Pertumbuhan ekonomi tersebut ditopang permintaan domestik yang terjaga, sedangkan kinerja ekspor menurun sejalan pengaruh perlambatan permintaan global dan penurunan harga komoditas. Secara spasial, permintaan domestik yang tetap baik ditopang oleh meningkatnya perdagangan antar daerah seperti di wilayah Sumatera. Selain itu, pertumbuhan ekonomi Kalimantan dan Bali-Nusa Tenggara tetap terjaga didukung oleh perbaikan ekspor komoditas primer. Bank Indonesia akan terus memperkuat koordinasi dengan Pemerintah dan Otoritas terkait guna memperkuat sumber, struktur, dan kecepatan pertumbuhan ekonomi, termasuk mendorong investasi melalui proyek infrastruktur dan implementasi Rencana Undang-Undang (RUU) Cipta Kerja dan Perpajakan.

NATIONAL ECONOMIC ANALYSIS

Indonesia's economic growth needs continuous encouragement so that it remains resilient amid the risk of delays in the prospect of world economy recovery. In 2019, economic growth remained good at 5.02%, although it was lower than that of 2018 of 5.17%. The economic growth was supported by maintained domestic demand, while export performance declined in line with the effect of slowing global demand and falling commodity prices. Spatially, domestic demand that remained well was supported by increased trade between regions such as the Sumatra region. In addition, economic growth in Kalimantan and Bali-Nusa Tenggara was maintained, supported by improvements in exports of primary commodities. Bank Indonesia will continue to strengthen coordination with the Government and related Authorities in order to strengthen the sources, structure, and speed of economic growth, including encouraging investment through infrastructure projects and implementation of Bill of Job Opening and Tax Law.

Neraca Pembayaran Indonesia (NPI) tetap baik sehingga menopang ketahanan sektor eksternal. NPI keseluruhan 2019 mencatat surplus sebesar 4,7 miliar dolar AS, setelah pada tahun 2018 mengalami defisit 7,1 miliar dolar AS. Perbaikan NPI ditopang oleh surplus transaksi modal dan finansial yang meningkat sejalan kinerja ekonomi Indonesia yang terjaga, daya tarik pasar keuangan yang besar, dan ketidakpastian pasar keuangan global yang mereda. Defisit transaksi berjalan juga menurun dari 2,94% PDB pada tahun 2018 menjadi 2,72% PDB.

Nilai tukar Rupiah menguat didukung kinerja Neraca Pembayaran Indonesia yang membaik. Pada 18 Desember 2019, Rupiah menguat 0,93% (*point to point/ptp*) dibandingkan dengan level November 2019 sehingga sejak awal tahun menguat 2,90% (*Year to Date/Ytd*). Penguatan Rupiah didukung oleh pasokan valas dari para eksportir dan aliran masuk modal asing yang tetap berlanjut sejalan prospek ekonomi Indonesia yang tetap terjaga, daya tarik pasar keuangan domestik yang tetap besar, serta ketidakpastian pasar keuangan global yang mereda. Ke depan, Bank Indonesia memandang nilai tukar Rupiah tetap stabil sesuai dengan fundamentalnya dan mekanisme pasar yang terjaga. Prakiraan ini didukung prospek Neraca Pembayaran Indonesia yang tetap baik akibat berlanjutnya aliran masuk modal asing seiring dengan prospek ekonomi domestik yang membaik dan imbal hasil yang menarik, serta dampak positif kebijakan moneter longgar di negara maju. Untuk mendukung efektivitas kebijakan nilai tukar dan memperkuat pembiayaan domestik, Bank Indonesia terus mengakselerasi pendalaman pasar keuangan, baik pasar uang maupun pasar valas.

ANALISIS INDUSTRI PENERBANGAN

Industri penerbangan global secara umum mengalami penurunan kinerja di tahun 2019 dibandingkan tahun 2018. Pertumbuhan *passenger traffic* (Revenue Passenger Kilometers/RPK) di tahun 2019 sebesar 4,2% mengalami penurunan dibandingkan tahun 2018 yang sebesar 7,4%. Sedangkan pertumbuhan *Passenger Capacity* (Available Seat Kilometer/ASK) juga mengalami penurunan dari 6,9% di tahun 2018 menjadi 3,5% di tahun 2019. Sejalan dengan kondisi industri penerbangan global, pertumbuhan *passenger traffic Asia Pasific* turun dari 9,5% di tahun 2018 menjadi 4,7% di tahun 2019. Sedangkan pertumbuhan *passenger capacity Asia Pasific* dari 8,8% di tahun 2018 menjadi 4,4% di tahun 2019.

Indonesia's Balance of Payments (NPI) remained well, and therefore, supported the resilience of external sector. The overall balance of payments (NPI) in 2019 recorded a surplus of 4.7 billion US dollars, after in 2018 recorded a deficit of 7.1 billion US dollars. NPI improvement was bolstered by an increased capital and financial transaction surplus in line with the maintained performance of Indonesian economy, the attractiveness of large financial markets, and that the uncertainty of global financial markets was improving. The current account deficit also decreased from 2.94% of GDP in 2018 to 2.72% of GDP.

Rupiah exchange rate strengthened as supported by Indonesia's improved Balance of Payment performance. On 18 December 2019, Rupiah strengthened 0.93% (point to point/ptp) compared to that of November 2019 level, thus, since the beginning of the year it had strengthened by 2.90% (Year to Date/Ytd). The strengthening of Rupiah is supported by the supply of foreign exchange from exporters and the continued foreign capital inflow in line with Indonesia's economic prospects that are maintained, the attractiveness of domestic financial market that remains large, and the uncertainty of global financial market that is easing. To the future, Bank Indonesia views that Rupiah exchange rate will remain stable in accordance with its fundamentals and maintained market mechanism. This forecast is supported by the prospect of Indonesia's Balance of Payments, which remains sound, due to the continued foreign capital inflows along with the improving outlook for domestic economy and attractive returns, as well as the positive impact of loose monetary policy in developed countries. To support the effectiveness of exchange rate policies and strengthen domestic financing, Bank Indonesia continues to accelerate financial market deepening, both in money market and foreign exchange market.

AVIATION INDUSTRY ANALYSIS

The global aviation industry in general experienced a decline in performance in 2019 compared to that of 2018. Passenger traffic (Revenue Passenger Kilometers/RPK) growth in 2019 was 4.2%, a decrease compared to that of 2018, which was 7.4%. Whereas growth in Passenger Capacity (Available Seat Kilometers/ASK) also decreased from 6.9% in 2018 to 3.5% in 2019. In line with the conditions of global aviation industry, Asia Pacific Passenger traffic growth fell from 9.5% in 2018 to 4.7% in 2019. While Asia Pacific's passenger capacity growth was 8.8% in 2018 and 4.4% in 2019.

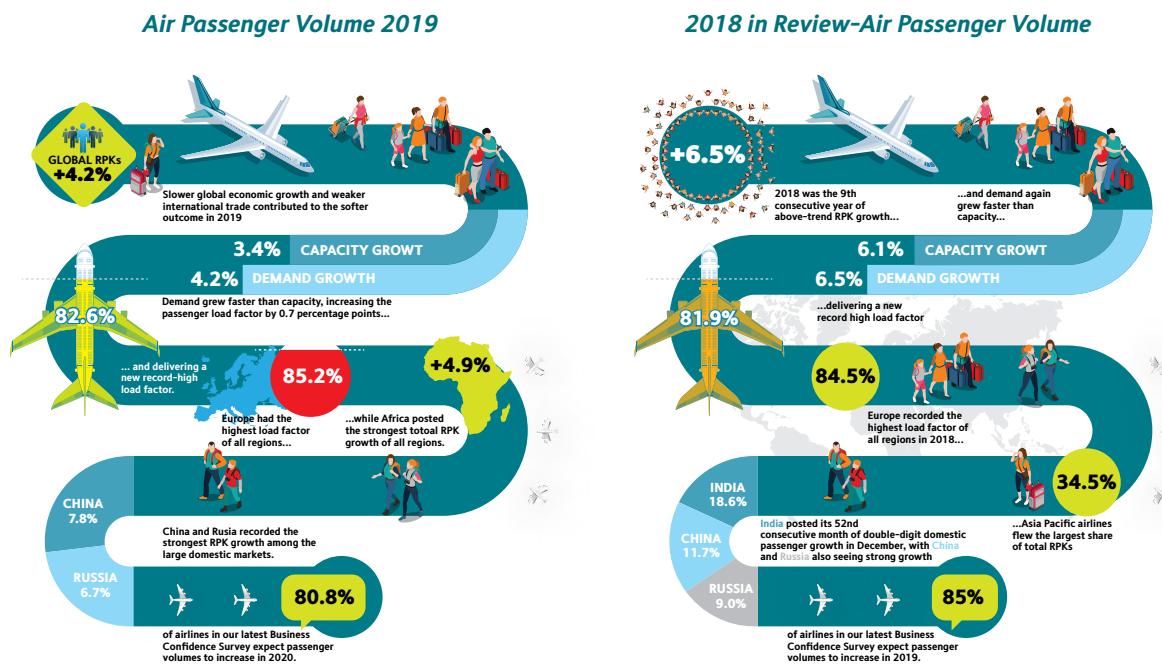

Sejalan dengan industri penerbangan global, pertumbuhan penumpang angkutan udara domestik sepanjang tahun 2019 anjlok hingga 20,11% persen dibanding periode yang sama tahun sebelumnya. Penurunan ini karena adanya penyesuaian harga tiket penumpang di pasar domestik sehingga menyebabkan adanya perpindahan penumpang dari moda transportasi udara ke transportasi darat. Perpindahan penumpang ini juga didukung oleh mulai membaiknya infrastruktur jalan tol di Indonesia. Namun penurunan jumlah penumpang ini tidak serta merta membuat kinerja keuangan industri penerbangan di pasar domestik menurun. Dengan penyesuaian kapasitas produksi dan meningkatnya harga tiket penumpang dengan harga real membuat industri penerbangan di pasar domestik mencapai kinerja yang lebih baik. Pendapatan penumpang meningkat walau jumlah penumpang menurun karena kenaikan harga tiket dan dapat juga melakukan efisiensi biaya dengan strategi penyesuaian kapasitas produksi untuk menyesuaikan *supply* dan *demand*.

In line with the global aviation industry, the growth of domestic air transport passengers in 2019 dropped by 20.11% percent compared to the same period of the previous year. This decline was due to an adjustment in passenger ticket prices in the domestic market, which caused the shifting of passengers from air to land transportation modes. This passenger movement was also supported by the initial improvement of toll road infrastructure in Indonesia. But the decline in the number of passengers does not necessarily make the financial performance of aviation industry in the domestic market decline. Capacity adjustment and increasing passenger ticket prices with real prices have made the aviation industry in domestic market achieve better performance. Passenger revenue increased even though the number of passengers decreased due to the ticket price hikes, and this also made cost efficiencies through capacity adjustment strategies to adjust the supply and demand.

To face all of the existing challenges and opportunities, Garuda Indonesia has tried to utilize its strengths and try to overcome its current limitations. In line with the 2016-2020 long-term strategy, Garuda Indonesia Group will focus on routes in *Tier 1*, *Tier 2*, and *Tier 3* in the domestic market, and the potential to develop Citilink through expansion in domestic and international markets.

Note: ASA= South East Asia, JPK= Japan and Korea, CTH = China, Taiwan and Hongkong SWP = South West Pacific (Australia) EUR= Europe MEA= Middle East

Klasifikasi *Tier* didasarkan kepada data tahun sebelumnya dengan *detail* penjelasan sebagai berikut:

- Tier 1 : Dinyatakan oleh Kementerian Perhubungan sebagai HUB dan memiliki *passenger traffic* di atas 5 juta per tahun
- Tier 2 : Memiliki *passenger traffic* di kisaran 1 juta – 5 juta per tahun
- Tier 3 : Memiliki *passenger traffic* di kisaran 100.000 – 1 juta per tahun
- Propeler : Memiliki *passenger traffic* di bawah 100.000 per tahun atau bandara yang hanya dapat didarati oleh pesawat propeler

Pada tahun 2019, Garuda Indonesia akan fokus pada penerbangan internasional (Eropa, Timur Tengah, China, Australia, Jepang & Korea dan Asia Tenggara) dan domestik (*Tier 1 to 1*, *Tier 1 to 2*, *Tier 1 to 3*, *Tier 2 to 2*, serta *Tier 2 to 3*). Untuk penerbangan antar Tier 3 dan Propeler tidak akan dilayani oleh Garuda Indonesia, namun akan dialihkan ke Citilink atau bisnis unit lain yang lebih menguntungkan.

Di sisi lain, pada tahun 2019, Citilink memainkan peranan yang lebih besar di pasar *low cost carrier* dengan layanan yang lebih baik, serta didukung oleh upaya untuk menekan struktur biaya agar dapat lebih kompetitif. Citilink akan fokus pada penerbangan internasional di China, Asia Tenggara, serta domestik (*Tier 1 to 1*, *Tier 1 to 2*, *Tier 1 to 3*, *Tier 2 to 2*, *Tier 2 to 3*, dan *Tier 3 to 3* dan Propeler). Berikut adalah tabel penjelasan pembagian *Tier* dalam posisi Garuda Indonesia Group.

Peta kompetisi Garuda Indonesia Group dengan *airline* pesaing lainnya dapat dinyatakan berdasarkan layanan yang diberikan serta penawaran harga. Garuda Indonesia sebagai *full-service* bersaing secara langsung dengan Batik Air dan kedepannya untuk menguatkan *positioning* sebagai *5-stars airlines*, Garuda Indonesia akan meningkatkan layanan yang diberikan kepada penumpang dengan mengarahkan ke segmen yang mengutamakan kenyamanan dan pengalaman. Tentunya untuk menjaga profitabilitas yang baik, Garuda Indonesia akan menyasar ke arah *premium airlines* dengan tetap memberikan *value for money* kepada pelanggannya.

Sementara itu Citilink sebagai *low-cost airlines* juga akan ditarik menjadi *premium LCC* untuk mengisi celah segmen yang ada di pasar. Citilink akan meningkatkan *On Time Performance* (OTP) sebagai diferensiasi dengan maskapai penerbangan murah lainnya. Citilink juga akan meningkatkan frekuensi penerbangan, memperbaiki *ground time*-nya, meningkatkan jumlah penumpang, dan meluaskan

Tier classification are based on the previous year's data with detailed explanations as follows:

- Tier 1 : Declared by the Ministry of Transportation as a HUB and has passenger traffic above 5 million per year
- Tier 2 : Have passenger traffic in the range of 1 million – 5 million per year
- Tier 3 : Have passenger traffic in the range of 100,000 – 1 million per year
- Propeller : Have passenger traffic below 100,000 per year or airport that only propeller plane can land.

In 2019, Garuda Indonesia focused on international flights (Europe, Middle East, China, Australia, Japan & Korea, and Southeast Asia) and domestic flights (Tier 1 to 1, Tier 1 to 2, Tier 1 to 3, Tier 2 to 2, and Tier 2 to 3). Flights between Tier 3 and Propeller will not be served by Garuda Indonesia, but will be transferred to Citilink or other more profitable business units.

On the other hand, in 2019 Citilink played a greater role in the low cost carrier market with better services, and supported by efforts to reduce the cost structure in order to be more competitive. Citilink focused on international flights in China, Southeast Asia, and domestic flights (Tier 1 to 1, Tier 1 to 2, Tier 1 to 3, Tier 2 to 2, Tier 2 to 3, Tier 3 to 3, and Propeller). Below is the table describing Tier division within Garuda Indonesia Group position.

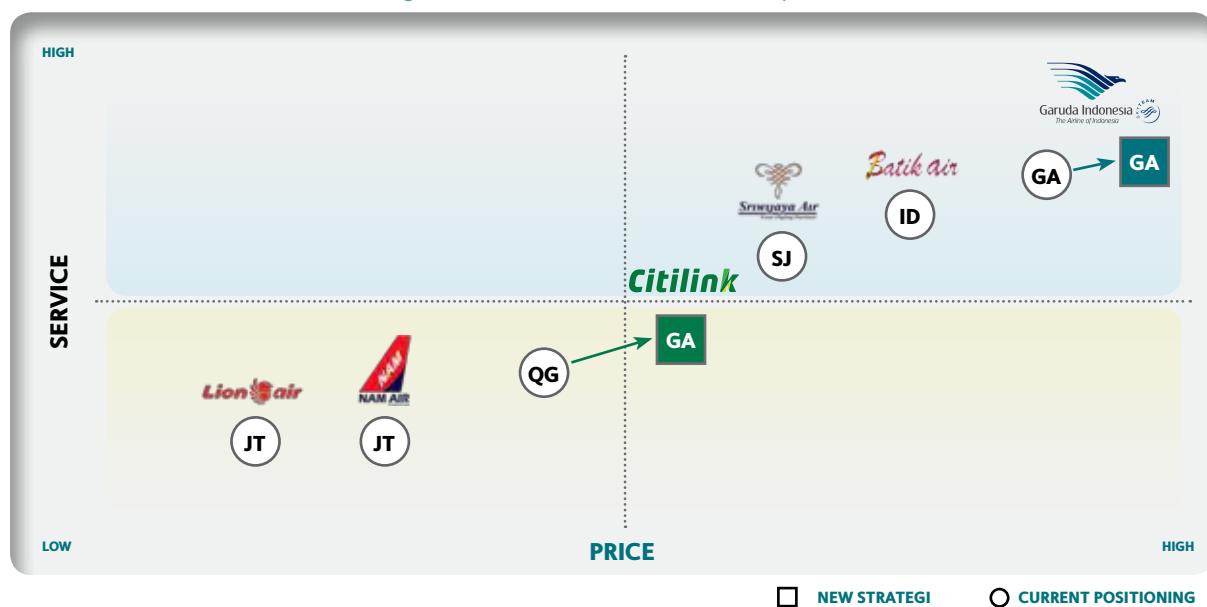

Map of Garuda Indonesia Group's competition with other competing airlines shows that the market is divided based on services provided and price quotes. Garuda Indonesia as a full-service airline competes directly with Batik Air and in the future to strengthen its positioning as a 5-star airline, Garuda Indonesia will improve services to its passengers by leading to segments that prioritize comfort and experience. Of course, to maintain good profitability, Garuda Indonesia will target premium airlines while still providing value for money to its customers.

Meanwhile, Citilink as a low-cost airline will also be pulled to be LCC premium to fill the existing market gaps in the market. Citilink will increase its On Time Performance (OTP) as a differentiation from other low-cost airlines. Citilink will also increase flight frequency, improve its ground time, increase the number of passengers, and expand its network so that it can compete with other low-cost airlines. Citilink

jaringannya sehingga mampu berkompetisi dengan maskapai penerbangan murah lainnya. Citilink akan didorong untuk memberikan pelayanan *low cost carrier* yang lebih baik dibandingkan layanan yang diberikan pada saat ini, serta dengan struktur biaya yang lebih baik dan kompetitif.

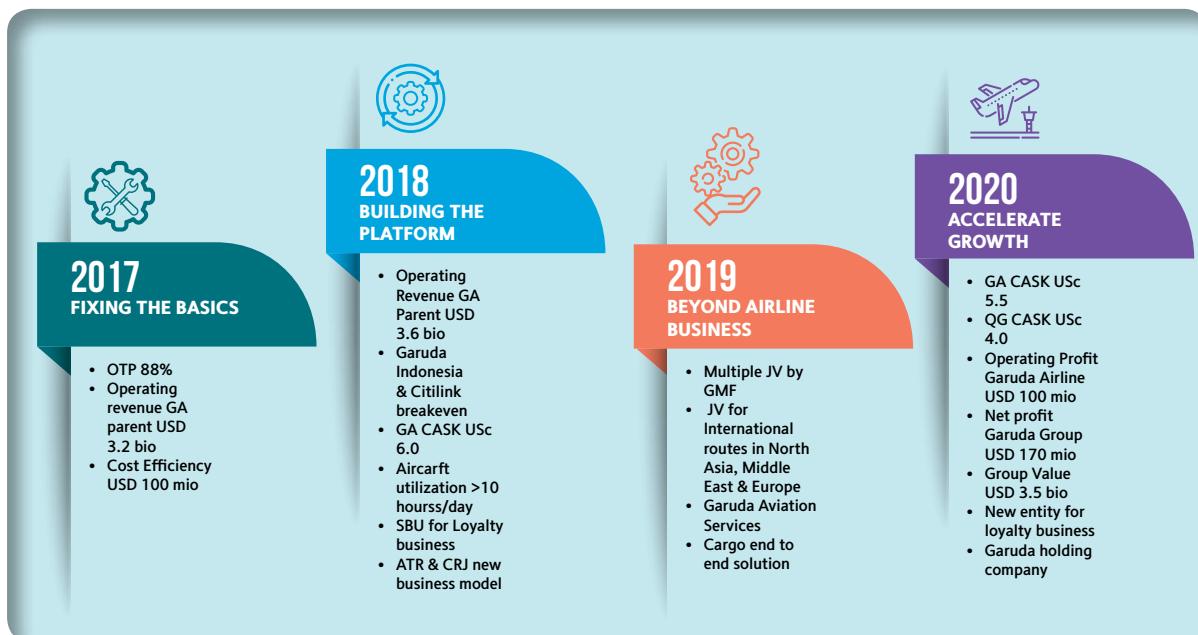

will be encouraged to provide better low cost carrier services compared to the services currently available, as well as a better and more competitive cost structure.

STRATEGI PERUSAHAAN

COMPANY STRATEGIES

Dengan tema tahun 2019 “*Beyond Airline Business*”, maka Program Kerja tahun 2019 berfokus kepada program-program kerja utama untuk mengembangkan pendapatan di luar bisnis penerbangan, sehingga menjadi dasar yang cukup kuat bagi Garuda Indonesia untuk berkembang dan berekspansi di tahun-tahun selanjutnya, yang terdiri dari:

1. ***Multiple Joint Venture by Garuda Maintenance Facility (GMF)***

Sebagai anak perusahaan Garuda Indonesia yang bergerak di bidang *Maintenance, Repair, and Overhaul* (MRO), GMF AeroAsia memiliki potensi yang cukup besar untuk terus mengembangkan bisnisnya, sebagai bagian dari langkah strategis setelah *Initial Public Offering* (IPO) di kuartal IV tahun 2017. Sebagai kelanjutan dari proses IPO tersebut, GMF bersama-sama dengan Garuda sedang menjajaki kemungkinan adanya investasi dari satu atau lebih investor strategis pada GMF. Pengembangan bisnis MRO di Indonesia dan lingkup Asia Pasifik akan dimulai di tahun 2019 ini melalui kerjasama *joint venture* dengan beberapa *partner* strategis.

2. ***Joint Venture for International Routes in North Asia, Middle East and Europe***

Pengembangan jaringan rute penerbangan Garuda Indonesia saat ini telah dibangun melalui rute dan destinasi penerbangan yang diterbangi sendiri oleh Garuda, koneksi jaringan penerbangan anggota aliansi penerbangan SkyTeam, serta kerjasama *interline* dan *codeshare* dengan beberapa *partner* maskapai. Untuk meraih potensi rute-rute yang belum dimiliki

With the 2019 theme “*Beyond Airline Business*”, the 2019 Work Program focused on major work programs to develop revenue outside the aviation business, so that it becomes a strong foundation for Garuda Indonesia to develop and expand in the subsequent years, which consists of:

1. ***Multiple Joint Ventures by Garuda Maintenance Facility (GMF)***

As a subsidiary of Garuda Indonesia engaged in Maintenance, Repair, and Overhaul (MRO), GMF AeroAsia has considerable large potential to continue to develop its business as part of a strategic step after its Initial Public Offering (IPO) in the fourth quarter of 2017. Following the IPO, GMF together with Garuda are exploring the possibility of investment from one or more strategic investors in GMF. MRO business development in Indonesia and Asia Pacific region would begin in 2019 through a joint venture with several strategic partners.

2. ***Joint Ventures for International Routes in North Asia, Middle East, and Europe***

Development of Garuda Indonesia flight route network has now been built through Garuda's own routes and flight destinations, connectivity of SkyTeam flight alliance network members, as well as interline and codeshare cooperation with several airline partners. To reach potential routes that are not owned by Garuda Indonesia in North Asia, Middle East, and Europe, in

oleh Garuda Indonesia di Asia Utara, Timur Tengah, dan Eropa, maka di tahun 2019 Garuda Indonesia berencana untuk menjalin kerjasama strategis berupa *joint venture* dengan beberapa *partner* di area tersebut.

3. ***Garuda Aviation Services***

Pengembangan bisnis layanan aviasi Garuda Indonesia Group yang saling bersinergi (*pemanfaatan sumber daya yang terpusat/pool resources*, penciptaan layanan aviasi yang terintegrasi – catering, *ground handling*, logistik, pergudangan dan lain-lain).

4. ***Cargo End to End Solution***

Solusi layanan *cargo end-to-end*, yaitu layanan kargo yang terintegrasi untuk pelanggan, dimulai dari layanan pengambilan barang di *point of pick up* lalu ke bandara (*airport*) hingga tempat tujuan.

Dalam periode jangka pendek, untuk mendukung pelaksanaan Program Kerja 2019 maka Garuda Indonesia menetapkan beberapa Strategi Jangka Pendek (*Quick Wins*) untuk dapat segera memperbaiki kinerja, yang telah mulai dilakukan dengan *progress* yang baik di 2018 dan akan terus dilanjutkan di 2019.

QUICK WINS STRATEGY 2019

2019 Garuda Indonesia planned to establish a strategic partnership in the form of a joint venture with several partners in these areas.

3. ***Garuda Aviation Services***

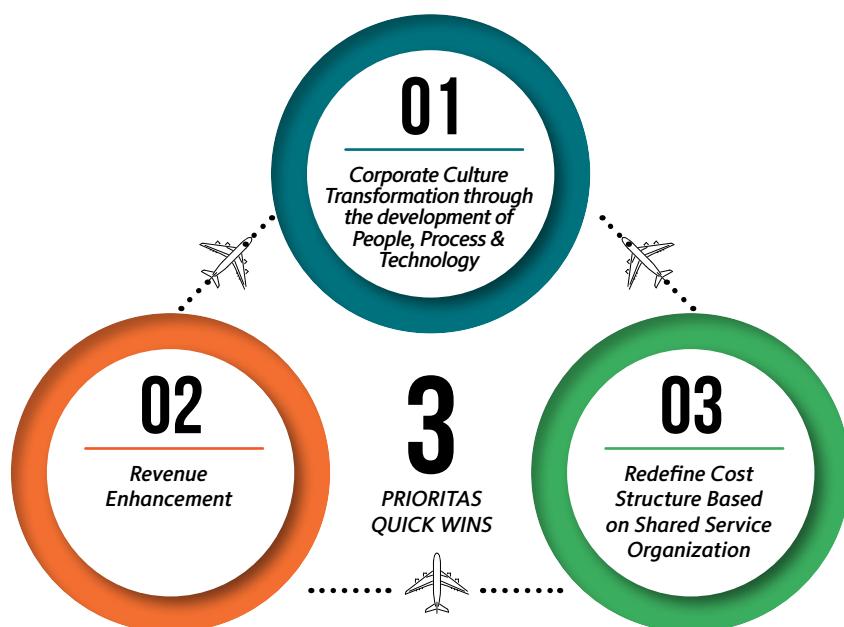

Development of Garuda Indonesia Group's aviation services business that synergizes with each other (utilization of centralized resources/pool resources, creation of integrated aviation services - catering, ground handling, logistics, warehousing and others).

4. ***Cargo End to End Solution***

End-to-end cargo service solution is an integrated cargo service for customers, starting from the service of picking up goods at the point of pick up then going to the airport (airport) to the destination.

In the short-term period, to support the implementation of the 2019 Work Program, Garuda Indonesia had set a number of Short-Term Strategies (*Quick Wins*) to be able to immediately improve its performance, which has been carried out with good progress in 2018 and will continue in 2019.

QUICK WINS STRATEGY 2019

1. ***Corporate Culture Transformation through the development of People, Process & Technology***

Garuda Indonesia akan fokus kepada peningkatan *capability* dan *capacity pegawai*, membuat pegawai *Happy*, karena pegawai adalah pelanggan dan aset yang harus di utamakan. Dengan pegawai yang *Happy* maka dengan sendirinya pegawai akan memberikan pelayanan terbaik kepada pelanggan.

Perputaran lintas divisi pun akan dilakukan, untuk menciptakan rasa *care* dan mengerti akan *business process* secara keseluruhan. Pegawai Garuda Indonesia adalah keluarga besar termasuk pegawai tetap dan paruh waktu, karena seluruh pegawai adalah *One Family One Nation and One Garuda Indonesia*.

Aviation Safety sebagai basis perubahan *business process* di segala lini telah dilakukan di 2018 dan berlanjut di 2019. Dengan *people/pegawai* yang baik dan *Happy* akan membuat *business process* yang baik juga. Dan dengan *business process* yang baik tentunya bisa membuat suatu standardisasi dan menghindari penurunan kualitas kerja *people/pegawai*.

Kedua hal di atas (*people and process*) erat hubungannya dan interaksi keduanya harus cepat dan akurat, sehingga untuk proses transformasi tersebut diperlukan bantuan teknologi, berupa pengembangan dan penyediaan sistem yang dapat mempermudah pengambilan keputusan dan simplifikasi proses bisnis di internal Garuda Indonesia.

2. ***Revenue Enhancement***

Peningkatan pendapatan dilakukan melalui perluasan pasar, memperbaiki produk, merubah cara berjualan, menutup kebocoran-kebocoran dan ketidakefisienan, menjalankan *Business Integrated Logistic* (bukan hanya Kargo), dan *New Business* yang berhubungan dengan dunia transportasi udara. Ke depannya, pegawai Garuda Indonesia dituntut untuk dapat merubah *mind set* lama dan mengeksekusi ide-ide baru yang muncul (*Dare to change to initiate new things*).

3. ***Redefine Cost Structure Based on Shared Service Organisation***

Memperbaiki struktur biaya melalui organisasi yang berbasis *shared service*, termasuk sentralisasi pengadaan, sehingga dapat meningkatkan kepuasan *internal customer* yang akhirnya berujung peningkatan kepuasan *external customer*.

1. ***Corporate Culture Transformation through the development of People, Process & Technology***

Garuda Indonesia will focus on improving employee capability and capacity, making employees Happy, because employees are customers and assets that must be prioritized. With Happy employees, the employees will naturally provide the best service to customers.

A cross-division turnover will be carried out to create a sense of care and an understanding of the overall business process. Garuda Indonesia employees are large families including permanent and part-time employees, because all employees are One Family, One Nation, and One Garuda Indonesia.

Aviation Safety as a basis for changing business processes in all lines has been carried out since 2018 and continued in 2019. Good and Happy people/employees will make a good business process as well. Furthermore, a good business process can certainly create a standardization and avoid reducing the quality of work/people/employees.

The two matters above (people and process) are closely related and their interactions shall be fast and accurate, therefore, such transformation process needs technology assistance in the form of developing and providing systems that can facilitate decision making and simplify the business process in Garuda Indonesia's internal environment.

2. ***Revenue Enhancement***

The increase in revenue is done through market expansion, improving products, changing the way of selling, closing leaks and inefficiencies, running *Business Integrated Logistics* (not just Cargo), and *New Business* related to the air transportation world. In the future, Garuda Indonesia employees are required to be able to change their old mindset and execute new emerging ideas (*Dare to change to initiate new things*).

3. ***Redefine Cost Structure Based on Shared Service Organizations***

Improve cost structure through shared-service based organizations, including centralized procurement, in order to increase customer internal satisfaction which ultimately results in increased external customer satisfaction.

Secara menyeluruh Garuda Indonesia Group menerbangkan 31,89 juta penumpang di tahun 2019, turun sebesar 17,04% jika dibandingkan dengan jumlah penumpang pada tahun 2018 sebesar 38,44 juta penumpang. of 14.83 million passengers. Overall, Garuda Indonesia Group flew 31.89 million passengers in 2019, a decrease of 17.04% when compared to the number of passengers in 2018 of 38.44 million passengers. The decrease in passenger numbers is in line with the Company's strategy by adjusting production capacity while increasing flight fares in the domestic market. Tariff adjustments in the domestic market caused a decrease in the number of passengers but improved the Company's financial performance.

Amid the declining market conditions in 2019, the Company increased its domestic market share by 3.22% to 42.40% compared to that of 2018. Garuda Indonesia Domestic contributed 29.14% while Citilink contributed 13.26%. The biggest increase in domestic market share came from the flight areas of Jakarta, Medan, and Surabaya.

In the international market, Garuda Indonesia has a market share of 21.34% or a decrease of 2.19% compared to that of 2018. The largest decline in international market share came from the flight areas of European, Chinese, Southeast Asia, while the market share in Japanese & Korea and Middle Eastern flights increased.

LABA (RUGI)

Pendapatan usaha PT Aero Wisata dan entitas anak selama tahun 2019 sebesar Rp3,39 triliun, menurun 1,26% dibandingkan tahun lalu sebesar Rp3,43 triliun dipicu penurunan pendapatan biro perjalanan karena perubahan metode pencatatan tiket dari *gross* menjadi *net* di Garuda Orient Holidays (GOH), Garuda Indonesia Holiday (GIH) dan Aero Globe Indonesia (AGI) karena lini bisnis tersebut sebagai *agent* bukan *principal* dan juga ada penurunan pendapatan hotel seiring penurunan *average room rate* terutama di Prama Sanur, penurunan *available room* karena berakhirnya pengelolaan Asana Kawanua Jakarta dan penurunan *average Food Beverage per cover* di Kila Senggigi. Namun pendapatan jasa boga ada kenaikan terkait kenaikan Non Garuda Indonesia *meal uplift* dan *cover meal industrial* dan pada kuartal akhir 2019 ada tambahan pendapatan dari unit jasa *charter*. Beban usaha sebesar Rp3,47 triliun, meningkat sebesar 2,47% dibandingkan tahun 2018 karena kenaikan biaya langsung jasa jasa boga akibat meningkatnya biaya material di Aerofood ACS dan adanya dampak dari implementasi perubahan layanan Garuda Indonesia dan kenaikan biaya administrasi dan umum karena kenaikan *Employee Benefit Obligation*.

Setelah memperhitungkan pendapatan dan beban lain-lain serta beban pajak maka PT Aero Wisata tahun 2019 mencatat rugi bersih sebesar 70,25 miliar menurun 174,59% dibandingkan tahun 2018 sebesar Rp94,18 miliar. Pencapaian ini mengalami penurunan signifikan dari tahun lalu yang dipicu oleh kenaikan biaya langsung jasa boga, kenaikan biaya administrasi dan umum serta ada penurunan pendapatan lain-lain yang berupa penurunan keuntungan investasi pada entitas anak.

POSI KEUANGAN

Jumlah aset PT Aero Wisata dan entitas anak tahun 2019 tercatat sebesar Rp4,11 triliun, terdapat peningkatan sebesar 9,23% dibandingkan tahun lalu sebesar Rp3,76 triliun terutama karena kenaikan piutang usaha. Liabilitas sebesar Rp1,43 triliun mengalami peningkatan sebesar 24,15% dari tahun 2018 sebesar Rp1,15 triliun terutama berasal dari peningkatan utang usaha dan beban akrual.

PROFIT (LOSS)

The operating revenue of PT Aero Wisata and its subsidiaries during 2019 amounted to Rp3.39 trillion, a decrease of 1.26% compared to last year's of Rp3.43 trillion, which was triggered by a decrease in travel agent revenue due to changes in the method of recording tickets from gross to net at Garuda Orient Holidays (GOH), Garuda Indonesia Holiday (GIH), and Aero Globe Indonesia (AGI), because the business line is as an agent not a principal, and there was also a decrease in hotel revenue due to a decrease in average room rate, especially in Prama Sanur, a decrease in available rooms due to the end of Asana Kawanua Jakarta management, and a decline in average Food Beverage per cover at Kila Senggigi. However, catering services revenue has increased due to the increase in Non Garuda Indonesia meal uplift and cover meal industrial and in the final quarter of 2019, there was additional revenue from charter services unit. Operating expenses amounted to Rp3.47 trillion, an increase of 2.47% compared to that of 2018 due to the increase in the direct cost of catering services resulting from the increasing material costs at Aerofood ACS and the impact of implementing changes in Garuda Indonesia services and the increase in general and administrative expenses caused by the increase in Employees Benefit Obligation.

After calculating revenues, other expenses, and tax expenses, PT Aero Wisata in 2019 recorded a net loss of Rp70.25 billion, a decrease of 174.59% compared to that of 2018 of Rp94.18 billion. This achievement decreased significantly from last year, which was triggered by an increase in direct catering services costs, increase in general and administrative expenses, and a decrease in other revenues in the form of a decrease in investment returns on subsidiaries.

FINANCIAL POSITION

The total asset of PT Aero Wisata and its subsidiaries in 2019 was recorded at Rp4.11 trillion, an increase of 9.23% compared to last year's asset of Rp3.76 trillion, which was mainly due to the increase in trade receivables. Liabilities was at Rp1.43 trillion, an increase of 24.15% from that of 2018 of Rp1.15 trillion, which was mainly due to the increase in trade payables and accrual expenses. Equity in 2019 was

Ekuitas tahun 2019 sebesar Rp2,68 triliun, naik sebesar 2,65% dibandingkan tahun 2018 sebesar Rp2,61 triliun karena kenaikan surplus revaluasi.

Ancillary Revenues tahun 2019 sebesar USD87,26 juta, menurun 17,23% dibandingkan dengan tahun 2018 yang sebesar USD105,42 juta. Penurunan tersebut seiring dengan penurunan jumlah penumpang sebesar 17,04%, sehingga *ancillary revenues* per penumpang juga turun sebesar 0,23%.

BISNIS KARGO

Peningkatan kualitas infrastruktur di Pulau Jawa dan Sumatera telah mendorong penurunan biaya logistik untuk moda darat dan laut. Hal ini juga berdampak pada peningkatan volume logistik yang menggunakan moda darat, sehingga berakibat pada turunnya *market size* kargo udara pada sektor domestik sebesar 9,4% dibandingkan tahun 2018. Pada sektor Internasional, perlambatan volume perdagangan yang disebabkan oleh perang dagang antara Amerika dan China telah menekan pertumbuhan *market size* kargo udara hingga (14,7%) dibandingkan periode 2018.

Menanggapi kondisi tersebut, Garuda Indonesia telah menerapkan strategi *dynamic pricing* untuk mengoptimalkan pendapatan di tengah penurunan *market* kargo udara yang cukup signifikan. Selain itu, kerjasama *capacity provider* dengan MyIndo Airline, telah membantu Garuda Indonesia dalam melayani permintaan kargo udara pada rute-rute dengan kapasitas yang terbatas. Sebagai hasilnya, tahun 2019 berhasil ditutup dengan kenaikan pendapatan kargo udara sebesar 12%.

Menjelang akhir 2019, Garuda Indonesia kembali menghadapi tantangan dengan adanya indikasi mewabahnya virus COVID-19 yang akan berakibat pada anjloknya permintaan penerbangan Internasional. Kondisi ini akan secara signifikan mengurangi kapasitas produksi *belly space* kargo, yang cenderung menekan kemampuan

Ancillary Revenues in 2019 was USD87.26 million, a decrease of 17.23% compared to that of 2018 of USD105.42 million. The decrease was in line with the decrease in the number of passengers by 17.04%, thus, ancillary revenues per passenger also decreased by 0.23%.

CARGO BUSINESS

Improved infrastructure quality in Java and Sumatra has led to lower logistics costs for land and sea modes. This also had an impact on increasing the logistic volume using land mode, resulting in a decrease in air cargo market size in the domestic sector by 9.4% compared to that of 2018. In the international sector, the slowdown in trade volume caused by the trade war between the United States and China had pushed the growth of air cargo market size by (14.7%) compared to that of 2018 period.

In response to these conditions, Garuda Indonesia implemented a dynamic pricing strategy to optimize revenue amid a significant reduction in the air cargo market. In addition, the capacity provider collaboration with MyIndo Airline, has helped Garuda Indonesia in serving air cargo requests on routes with limited capacity. As a result, the year 2019 was successfully closed with a 12% increase in air cargo revenue.

Towards the end of 2019, Garuda Indonesia faced another challenge of the indication of COVID-19 virus outbreak which would result in a drop in international flight demand. This condition will significantly reduce the capacity of belly space cargo production, which tends to reduce the ability of Garuda Indonesia to generate cargo revenue from

Garuda Indonesia dalam menghasilkan pendapatan kargo dari penerbangan internasional. Menghadapi hal ini, pada pertengahan tahun 2020 Garuda Indonesia akan mengoperasikan 2 pesawat freighter 737-800 yang diharapkan dapat menjadi ujung tombak dalam memaksimalkan potensi bisnis kargo udara di Asia dan Australia.

KINERJA BISNIS KARGO

Di tengah penurunan kapasitas yang mencapai 11,47%, strategi penyesuaian harga terutama di pasar domestik mampu menghasilkan kinerja positif. Secara total kenaikan harga rata-rata mencapai 47,72%, dari semula sebesar US\$29,67 di tahun 2018 menjadi US\$43,83 pada tahun 2019. Pendapatan yang dihasilkan dari kargo mencapai USD326,94 juta atau meningkat 23,12% dibandingkan tahun 2018 sebesar USD265,55 juta. Hasil positif pendapatan kargo ini merupakan dampak dari strategi penyesuaian harga yang diterapkan sejak akhir tahun 2018.

Melemahnya permintaan kargo udara yang ditandai dengan penurunan *market size* kargo udara menekan tingkat isian kargo (CLF) dari semula sebesar 59,86% di tahun 2018 menjadi 51,85% di sepanjang tahun 2019. Penurunan trafik ini berdampak pada pendapatan *warehouse*.

international flights. Faced with this issue, in mid-2020 Garuda Indonesia will operate 2 (two) 737-800 freighter planes which are expected to be the spearhead in maximizing the potential of air cargo business in Asia and Australia.

PERFORMANCE OF CARGO BUSINESS

In the midst of a capacity decline of 11.47%, the price adjustment strategy especially in the domestic market was able to produce positive performance. In total, the average price increase reached 47.72%, from US\$29.67 in 2018 to US\$43.83 in 2019. Revenue generated from cargo reached USD326.94 million or an increase of 23.12% compared to that of 2018 of USD265.55 million. The positive outcome of cargo revenue is the impact of price adjustment strategy that has been implemented since the end of 2018.

Weakening demand for air cargo marked by the decrease in air cargo market size and depressed the cargo load factor (CLF) from 59.86% in 2018 to 51.85% in 2019. The decline in traffic has an impact on warehouse revenue.

PROSPEK DAN STRATEGI BISNIS CARGO TAHUN 2020

Pada tahun 2020 diperkirakan pertumbuhan pergerakan barang *e-commerce* dan *market place* akan semakin pesat, sehingga pasar kargo udara tetap tumbuh. Bergabungnya pesawat *freighter* dalam armada Perseroan yang akan dilakukan pada pertengahan tahun 2020 merupakan solusi untuk mengantisipasi pertumbuhan pasar tersebut. Pesawat *freighter* seri 737-800F mempunyai kapasitas dan daya jangkau yang lebih jauh dibandingkan pesawat *freighter* seri 737 *classic* yang saat ini dioperasikan oleh MyIndo Airline dalam kerjasama *capacity provider* dengan Garuda Indonesia. Selain itu, mesin pesawat tersebut sudah termasuk kategori *environmentally friendly* sehingga diperkenankan mendarat di berbagai *hub freighter* internasional. Oleh karena itu, pesawat tersebut akan menjadi *back-bone* pada rute-rute regional Asia dan China di tengah pembatasan kapasitas produksi reguler sebagai akibat wabah COVID-19. Dengan pesawat tersebut, produk-produk *e-commerce* dari China dan *marine product* dari Indonesia timur akan lebih cepat sampai ke tujuan.

Selain pengoperasian pesawat *freighter*, Perseroan juga akan menambah kapasitas melalui kerjasama dengan *airline partner* dalam bentuk *Special Prorate Agreement* (SPA), *Block Space Agreement* (BSA) dan *code share*. Penunjukan *General Sales and Service Agent* (GSSA) untuk mengelola bisnis kargo Perseroan di kantor cabang di kota-kota internasional akan terus diperluas untuk memperkuat jalur distribusi.

Meskipun prospek pasar kargo udara cukup tinggi, terdapat beberapa *issue* yang berpotensi mengurangi laju pertumbuhannya, diantaranya adalah Peraturan Menteri Keuangan (PMK) 199/2019 tentang pengenaan pajak pada barang impor minimum senilai USD3 dari semula USD75. Selain itu, melemahnya nilai tukar mata uang Rupiah juga bisa berpotensi mengganggu pertumbuhan pasar kargo udara. Tumbuhnya pesaing substitusi di Domestik, yaitu moda transport darat (*truckling*) yang kian membaik seiring dengan meningkatnya infrastruktur di Jawa dan Sumatera menjadi tantangan tersendiri bagi Perseroan untuk tetap bisa memanfaatkan setiap peluang yang ada.

Dari sisi internal Perseroan, konsistensi produk harus dijaga agar layanan tetap prima. Oleh karena itu upaya perbaikan infrastruktur untuk menunjang efisiensi dan mendukung operasional menjadi prioritas utama program kerja tahun 2020.

PROSPECT AND STRATEGY OF CARGO BUSINESS IN 2020

In 2020, it is estimated that growth in the movement of e-commerce and market place goods will accelerate, thus, air cargo market continues to grow. Freight aircraft that will join the Company's fleet in mid 2020 will be a solution to anticipate the market growth. The 737-800F freighter series have more capacity and reach compared to the 737 classic freighter series currently operated by MyIndo Airline in a capacity provider collaboration with Garuda Indonesia. In addition, the aircraft engine is included in the environmentally friendly category, thus, it is allowed to land in various international freighter hubs. Therefore, the aircraft will be a backbone on Asian and Chinese regional routes amid the restrictions on regular production capacity as a result of the COVID-19 outbreak. With these aircraft, e-commerce products from China and marine products from eastern Indonesia will get to their destinations faster.

In addition to operating freighter aircraft, the Company will also increase capacity through cooperation with airline partners in the form of Special Prorate Agreement (SPA), Block Space Agreement (BSA), and code share. The appointment of General Sales and Service Agent (GSSA) to manage the Company's cargo business at branch offices in international cities will continue to be expanded to strengthen the distribution channels.

Although the prospect of air cargo market is quite high, there are a number of issues that have the potential to reduce the growth rate, including the Minister of Finance Regulation (PMK) 199/2019 on the imposition of tax on imported goods worth a minimum of USD3 from previously USD75. In addition, the weakening of Rupiah can also disrupt the air cargo market growth. The growth of domestic substitute competitors, such as the land transportation (truckling) mode, which is getting better along with the improvement of infrastructure in Java and Sumatra, becomes a challenge for the Company to continue to be able to take advantage of every available opportunity.

From the internal side of the Company, product consistency must be maintained so that the service remains excellent. Therefore, efforts to improve infrastructure to support efficiency and support operations become the top priority of the work program in 2020.

RENCANA KERJA BISNIS KARGO 2020

Tantangan bagi bisnis layanan pengangkutan kargo udara adalah menyediakan kapasitas untuk bisa menyerap pasar tumbuh dengan yang pesat. Teknologi akan berperan dalam menyediakan sarana dan mendukung pola bisnis yang efisien sekaligus meningkatkan layanan kepada pelanggan. Oleh karena itu Perseroan sudah berkomitmen untuk meningkatkan infrastruktur pelayanan kargo baik di Gudang (warehouse) maupun di seluruh stasiun keberangkatan.

CARGO BUSINESS WORK PLAN 2020

The challenge for air cargo transportation service business is to provide capacity to be able to absorb the rapidly growing market. Technology will play a role in providing facilities and supporting efficient business patterns while improving service to customers. Therefore, the Company is committed to improving the cargo service infrastructure both in the warehouse and in all departure stations.

Untuk merespon tantangan di tahun 2020, Perseroan akan melakukan langkah-langkah strategis untuk mempertahankan penguasaan pasar dan sekaligus memenuhi target pendapatan dengan layanan yang tetap prima, sebagai berikut:

1. Network Expansion

Pengembangan jaringan dilakukan dengan cara bekerjasama dengan *airline partner* dengan kontrak kerjasama *Special Prorate Agreement* (SPA), *Block Space Agreement* (BSA) dan *code share*. Selain itu, penggunaan pesawat freighter yang akan diterbangkan pada rute-rute regional Asia merupakan upaya untuk memperluas jaringan dan menambah kapasitas.

To respond to the challenges in 2020, the Company will take strategic steps to maintain market dominance and at the same time meet revenue targets with excellent service, as follows:

1. Network Expansion

Network development is performed by collaborating with airline partners with Special Prorate Agreement (SPA), Block Space Agreement (BSA), and code share cooperation contracts. In addition, the use of freighter aircraft to be flown on Asian regional routes is an effort to expand the network and increase capacity.

2. Effective Channel Distribution

Penunjukan *General Sales and Service Agent* (GSSA) *offline* merupakan cara untuk memperluas jalur distribusi, sehingga terbuka peluang untuk memasarkan layanan kargo meskipun belum ada penerbangan langsung di kota tersebut.

3. Revenue Enhancement

Garuda Indonesia akan melakukan upaya untuk mengambil kembali pasar domestik dan internasional yang di tahun sebelumnya dinikmati oleh pesaing. Beberapa kapasitas yang masih idle juga akan ditawarkan untuk diisi oleh *airline partner* dengan kontrak BSA. Optimalisasi pendapatan ini juga akan dilakukan pada rute-rute intra jawa yang pasarnya banyak berpindah ke moda transportasi darat. Untuk memaksimalkan pendapatan, Perseroan juga akan berupaya untuk kontrak langsung dengan perusahaan *e-commerce* dan *market place*. Selain itu, kontrak kerjasama dengan seluruh mitra GSSA di kantor cabang internasional akan dikonversi ke dalam skema *Minimum Guaranteed Revenue* (MGR).

4. Organization Excellence

Perseroan akan menggabungkan organisasi kargo di kantor cabang (*Branch Office/BO*) akan diintegrasikan dengan struktur organisasi BO. Dengan integrasi ini organisasi BO akan lebih efektif karena koordinasinya akan lebih mudah, proses penganggaran, pelayanan dan lain-lain akan lebih baik.

5. Service Excellence

Pelayanan kargo akan ditingkatkan dengan memanfaatkan kemajuan Teknologi Informasi (TI) di bidang logistik untuk mengembangkan *tracking system*, perbaikan infrastruktur di *warehouse*, dan *warehouse management system*. Komunikasi dengan pelanggan Agen utama ditingkatkan dengan melibatkan manajemen puncak untuk menjalin kepercayaan dan sinergi yang lebih baik.

6. Freighter Operations

Delivery pesawat *freighter* B737-800F yang akan dilakukan pada pertengahan tahun 2020 dimanfaatkan untuk menambah kontribusi penerbangan *freighter*, yaitu dengan menerbangi rute-rute regional Asia dan China. Untuk mengamankan pendapatan Tim komersial sudah menyiapkan kontrak *hardblock* bagi Agen yang potensial.

2. Effective Channel Distribution

The appointment of an offline General Sales and Service Agent (GSSA) is a way to expand distribution channels, thus, opportunities are open to market cargo services even though there are no direct flights in the city yet.

3. Revenue Enhancement

Garuda Indonesia will make efforts to take back domestic and international markets that were enjoyed by competitors in the previous year. Some capacity that is still idle will also be offered to be filled by airline partners under BSA contracts. This revenue optimization will also be conducted on intra-Java routes where the market has moved to many land transportation modes. To maximize revenue, the Company will also seek to directly enter into contract with e-commerce market place and companies. In addition, cooperation contracts with all GSSA partners in international branch offices will be converted into the Minimum Guaranteed Revenue (MGR) scheme.

4. Organization Excellence

The Company will merge cargo organizations at branch offices (BO Offices) to be integrated with BO organization structure. With this integration, BO organization will be more effective because coordination will be easier, the budgeting process, services, and others will be better.

5. Service Excellence

Cargo services will be improved by utilizing information technology (IT) advancements in logistics to develop tracking systems, improve infrastructure in warehouses, and warehouse management system. Communication with customers Key agents are improved by involving top management to build trust and better synergy.

6. Freighter Operations

Delivery of B737-800F freighter that will begin in mid 2020 is used to increase the contribution of freighter flights, by flying the regional routes of Asia and China. To secure revenue, the commercial team has prepared a hardblock contract for potential agents.

Pengembangan layanan ini menghadirkan kenyamanan ekstra bagi penumpang karena dapat memilih lebih awal sajian yang akan dinikmati di penerbangan. Peluncuran *signature dish* berupa 15 (lima belas) Hidangan Nasi Nusantara dan aneka Kopi dan Teh Nusantara juga dilakukan sebagai wujud komitmen Perseroan dalam mengenalkan budaya Indonesia ke dunia. Pengembangan juga dilakukan pada aspek *inflight entertainment* dengan penambahan fitur *wifi free text chat* pada beberapa pesawat Airbus 330. Guna penyegaran layanan, telah diluncurkan pula *amenity kits* baru untuk penumpang *first class*. Demi memberikan pengalaman yang berbeda, beberapa *pop-up service* turut dihadirkan pada beberapa musim perayaan, seperti perayaan keagamaan dan hari besar nasional.

Kehadiran pesawat A330-900 Neo di 2019 juga memberikan warna baru bagi *Garuda Indonesia Experience*. Mata pelanggan dimanjakan melalui suasana kabin nan mewah dengan nuansa yang baru dan berbeda. Kenyamanan juga dihadirkan melalui kursi ergonomis yang dilengkapi fasilitas AVOD layar sentuh yang lebih canggih.

Mengacu visi PT Garuda Indonesia (Persero) Tbk, yaitu menjadi perusahaan penerbangan yang handal dengan menawarkan pelayanan berkualitas kepada masyarakat dunia menggunakan keramahan Indonesia, maka Unit *Aircraft Maintenance Management* sebagai bagian dari Direktorat Teknik bertanggung jawab mendukung operasional penerbangan Garuda pada rute domestik dan internasional melalui penyediaan pesawat yang handal serta kondisi kabin pesawat yang prima. Pengaturan dan perawatan pesawat dilakukan sesuai *Company Maintenance Manual* (CMM) serta *Continuous Airworthiness Maintenance Program* (CAMP) yang telah disahkan oleh Authority serta persyaratan keselamatan dan kelaikudaraan lainnya untuk masing-masing tipe pesawat.

Perawatan pesawat secara terencana dan terkendali dilakukan guna memenuhi jumlah dan tipe pesawat setiap harinya sesuai dengan rencana penerbangan dari Unit Operasi dan Niaga. Perencanaan yang baik dan *ground time* yang memadai untuk perawatan pesawat sangat diperlukan guna memastikan pekerjaan dilaksanakan dengan benar guna menjaga kondisi laik terbang pesawat. Kontribusi keterlambatan jadwal penerbangan yang disebabkan oleh kerusakan pesawat atau penyebab teknis lainnya diminimalkan guna mendukung target ketepatan penerbangan Garuda.

PERFORMANCE OF IN-FLIGHT SERVICES

The Company has made significant developments in In-Flight Services in 2019, including launching the internet-based Book Your Meal feature for first class passengers and certain business class routes. This service development provides extra comfort for passengers because they can choose earlier which meals that they will enjoy on the flight. The launch of signature dish in the form of 15 (fifteen) Archipelago Rice Dishes and various Archipelago Coffee and Tea was also carried out as a form of the Company's commitment to introduce Indonesian culture to the world. Development is also performed in aspect of inflight entertainment by adding free wifi text chat feature on several Airbus 330 aircrafts. To refresh the service, new amenities kits for first class passengers have also been launched. In order to provide a different experience, several pop-up services are also presented at several festive seasons, such as religious celebrations and national holidays.

The presence of A330-900 Neo in 2019 also gave a new color to Garuda Indonesia Experience. Customers' eyes are spoiled through the atmosphere of a luxurious cabin with a new and different nuance. Comfort is also presented through an ergonomic chair equipped with more sophisticated AVOD touch screen facilities.

Referring to the vision of PT Garuda Indonesia (Persero) Tbk, which is to become a reliable airline by offering quality services to the world community using Indonesian hospitality, the Aircraft Maintenance Management Unit as part of the Technical Directorate is responsible for supporting Garuda's flight operations on domestic and international routes by providing reliable aircraft and excellent aircraft cabin conditions. Arrangement and maintenance of aircraft are carried out in accordance with the Company Maintenance Manual (CMM) and Continuous Airworthiness Maintenance Program (CAMP), which have been approved by the Authority as well as other safety and airworthiness requirements for each type of aircraft.

Planned and controlled aircraft maintenance is carried out to meet the daily number and type of aircraft in accordance with the flight plan of the Operations and Commerce Unit. Good planning and adequate ground time for aircraft maintenance is highly necessary to ensure that work is carried out properly in order to maintain aircraft flightworthiness. Contributions to flight schedule delays caused by aircraft damage or other technical causes are minimized to support Garuda's flight accuracy targets.

Pencapaian *Aircraft Maintenance Management* pada tahun 2019 meliputi pemenuhan pesawat (*aircraft availability*), berfungsiya peralatan kabin (*cabin functionality*), penampilan interior kabin dan eksterior pesawat (*cabin interior and exterior appearance*) serta kontribusi keterlambatan karena teknik (*contribution of technical delay*). Pemenuhan jumlah dan tipe pesawat yang *serviceable* di tahun 2019 mencapai 98,63%, mengalami penurunan dibandingkan tahun 2018 sebesar 98,90%. Hal ini disebabkan adanya *extend Turn Around Time* (TAT) perawatan di *Base Maintenance* pada tipe A330, B738 dan CRJ1000 karena keterlambatan pemenuhan komponen, serta beberapa *irregularities* penerbangan pada tipe pesawat B738 dan CRJ1000.

Pencapaian rata-rata *Cabin Functionality* pada tahun 2019 sebesar 99,99% mengalami peningkatan dari pencapaian tahun 2018 sebesar 99,98%. Peningkatan ini disebabkan adanya perbaikan penambahan stok material, percepatan proses *warranty claim* dan penempatan stok material di *apron* guna mempercepat proses perbaikan di pesawat, serta peningkatan kapabilitas perawatan *cabin* di bandara Kualanamu (KNO), Surabaya (SUB), Makassar (UPG), Denpasar (DPS), dan Balikpapan (BPN).

Pencapaian rata-rata indikator penampilan interior kabin pada tahun 2019 sebesar 98,66%, mengalami kenaikan dibandingkan pencapaian tahun 2018 sebesar 98,80%. Hal ini disebabkan adanya program *cabin refurbishment* serta implementasi kembali pelaksanaan *daily interior cleaning* semenjak April 2019 dari yang sebelumnya di tahun 2018 hanya dilakukan dengan basis *transit cleaning*. Untuk indikator penampilan *eksterior cabin* 2019 mencapai 99,70%, mengalami peningkatan dibandingkan tahun 2018 sebesar 99,01%. Hal ini karena implementasi pengecatan ulang pesawat dengan metode *Base Coat Clear Coat* sehingga warna *livery* pesawat lebih tahan lama serta pelaksanaan rutin *aircraft exterior washing* yang lebih baik.

Kontribusi keterlambatan yang disebabkan oleh kerusakan pesawat atau *Contribution of Technical Delay* di tahun 2019 sebesar 0,71 % sama dengan pencapaian tahun 2018 yang juga sebesar 0,71%. Kejadian pesawat AOG yang meningkat di kuartal IV tahun 2019 yang disebabkan oleh *engine oil leak* pada pesawat B737-800 cukup berpengaruh sebagai salah satu penyebab *delay* penerbangan Garuda pada periode tersebut.

Achievements of Aircraft Maintenance Management in 2019 include aircraft availability, cabin functionality, cabin interior and exterior appearance, and contribution of technical delay. Fulfillment of the number and types of aircraft that are serviceable in 2019 reached 98.63%, a decrease compared to that of 2018 of 98.90%. This was due to the extended Turn Around Time (TAT) maintenance at Base Maintenance on A330, B738, and CRJ1000 types due to delays in component fulfillment, as well as some flight irregularities on B738 and CRJ1000 aircraft types.

The achievement of the average Cabin Functionality in 2019 was 99.99% an increase from the achievement of 2018 of 99.98%. This increase was due to an improvement in the addition of material stock, acceleration of warranty claim process, and placement of material stock in the apron in order to accelerate aircraft's repair process, as well as an increase in cabin maintenance capabilities at Kualanamu (KNO), Surabaya (SUB), Makassar (UPG), Denpasar (DPS), and Balikpapan (BPN) airports.

The average achievement of indicator for cabin interior appearance in 2019 was 98.66%, an increase compared to the achievement in 2018 of 98.80%. This was due to the cabin refurbishment program and the re-implementation of daily interior cleaning since April 2019, while previously in 2018 it was only done on a transit cleaning basis. Cabin exterior appearance indicators in 2019 reached 99.70%, an increase compared to that of 2018 of 99.01%. This was because the implementation of repainting aircraft used the Base Coat Clear Coat method so that the aircraft livery color is more durable and the routine aircraft exterior washing is implemented better.

Contributions to delays caused by damage to aircraft or Contribution of Technical Delay in 2019 was 0.71%, the same as the achievement in 2018 which was 0.71%. The increase in AOG aircraft incidents in the fourth quarter of 2019 due to engine oil leak on B737-800 aircraft was quite influential as one of the causes of Garuda flight delays during this period.

Hal-hal yang berkaitan dengan faktor *compliance* menjadi fokus program di tahun 2020. Demikian pula indikator *contribution technical delay, aircraft availability, cabin functionality, cabin interior and exterior* masih menjadi indicator prioritas operasional & services yang digunakan sebagai target 2020, termasuk target untuk mempertahankan Garuda sebagai anggota 5 (five) Stars Skytrax Airline

Memasuki tahun 2020, Perseroan telah menyiapkan beberapa inisiatif strategis yang dapat meningkatkan kinerja usaha *In-Flight Services*, diantaranya:

4. Pengembangan program *Free Text Chat* pada *fleet Boeing B777*.

LABA (RUGI) TAHUN BERJALAN

Laba tahun berjalan tahun 2019 mencapai USD6,46 juta, meningkat sebesar 102,82% dibandingkan tahun 2018 mengalami kerugian sebesar USD228,89 juta. Peningkatan tersebut berasal dari pertumbuhan penumpang sebesar 4,62% atau USD 150,67 juta dan pertumbuhan kargo dan dokumen sebesar 23,12% atau USD61,39 juta. Peningkatan ini sejalan dengan kenaikan yield penumpang dan kargo yang masing-masing meningkat sebesar 20,28% dan 47,72%. Hal ini menunjukkan bahwa strategi menaikkan harga pada rute-rute domestik menyebabkan penurunan trafik namun dapat meningkatkan pendapatan. Pertumbuhan negatif dari beban usaha juga berkontribusi pada kenaikan laba tahun berjalan. Seiring dengan strategi penyesuaian kapasitas produksi yang berdampak pada penurunan beban usaha turun sebesar 4,12%.

This shows that the strategy of increasing prices on domestic routes causes a decrease in traffic but can increase revenue. The negative growth of operating expenses also contributed to the increase in profit for the year. This was in line with the strategy to adjust production capacity which reduced the operating expenses by 4.12%.

Jumlah kargo (Kton) Total Cargo (kilo tons)	473,31	335,76	70,94

Pada tahun 2019, pendapatan usaha mencapai target sebesar 78,66% yang berada di bawah target karena Perseroan melakukan penyesuaian kapasitas produksi saat jumlah penumpang mengalami penurunan atas dampak penyesuaian tarif. Demikian pula dengan laba rugi mencapai 46,53% di bawah target karena adanya beberapa transaksi luar biasa seperti penyesuaian piutang pendapatan dari KSO Sriwijaya dan beberapa penyesuaian di anak usaha Perseroan yang terjadi pada kuartal IV tahun 2019. Sedangkan untuk Available Seat Kilometers (ASK) dan Passenger carried masing-masing mencapai 80.33% dan 78,76% dikarenakan Perseroan melakukan penyesuaian kapasitas produksi saat jumlah penumpang mengalami penurunan atas dampak penyesuaian tarif.

Meskipun demikian *Passenger yield* berhasil melampaui target yang mencapai 100,89% dikarenakan adanya penyesuaian tarif tiket penumpang. *Unit Cost (CASK)* sedikit berada di bawah target yang mencapai 94,41% karena Perseroan penyesuaian kapasitas produksi sehingga menurunkan konsumsi bahan bakar saat harga bahan bakar pesawat per liter mengalami penurunan sebesar 0,84% di tahun 2019. Untuk *Cargo carried* mencapai target 70,94% karena Perseroan melakukan penyesuaian kapasitas produksi penerbangan sehingga kapasitas kargo berkurang.

In 2019, operating revenues reached the target of 78.66% which was below the target because the Company made adjustments to production capacity while the number of passengers decreased due to the impact of tariff adjustments. Similarly, the profit and loss reached 46.53% below the target due to some extraordinary transactions such as the adjustment of revenue receivables from KSO Sriwijaya and some adjustments in the Company's subsidiaries that occurred in the fourth quarter of 2019. Whereas for Available Seat Kilometers (ASK) and Passenger carried respectively reached 80.33% and 78.76% because the Company made adjustments to production capacity while the number of passengers decreased due to the impact of tariff adjustments.

Nevertheless, Passenger yield successfully exceeded the target which reached 100.89% due to the adjustment of passenger ticket rates. Unit Cost (CASK) was 94.41%, slightly below the target, because the Company adjusted its production capacity in order to reduce fuel consumption while the price of aircraft fuel per liter decreased by 0.84% in 2019. For Cargo carried, it reached the target of 70.94% because the Company adjusted the production capacity of flights, thus, cargo capacity decreased.

Pencapaian realisasi kekuatan pegawai total (dengan siswa) mencapai 91,29% sedikit berada di bawah target dengan realisasi tahun 2019 sebesar 7.838 orang. Hal ini antara lain dipengaruhi oleh:

1. Perubahan kualifikasi, proses seleksi dan skema remunerasi pada saat proses rekrutmen berjalan yang memerlukan *approval* terlebih dulu. Terdapat 15 (lima belas) kandidat yang berhasil lolos sampai tahap akhir, namun untuk saat ini kebijakan manajemen adalah untuk menunda proses *hiring* terlebih dulu.
2. Jumlah rekrutmen calon siswa pilot tahun 2019 adalah 134 orang, menyesuaikan dengan kapasitas *training* di Garuda Indonesia *Training Center* (GITC) yaitu sebanyak 4 (empat) kelas dalam setahun, maka calon siswa pilot yang menandatangani kontrak dengan Garuda Indonesia adalah 101 orang.

Achievement of the realization of total employee activities (with students) reaching 91.29% was slightly below the target with the realization in 2019 of 7,838 people. This was done, among others, by:

1. Changing the qualifications, selection process, and remuneration scheme when the recruitment process is running that requires prior approval. There were 15 candidates who made it through to the final stage, but for now the Management policy is to delay the hiring process first.
2. The number of recruitment of prospective pilot students in 2019 was 134 people, adjusting to the training capacity at Garuda Indonesia Training Center (GITC), which is as many as 4 classes in a year, therefore, the prospective pilot students who sign contracts with GA were 101 people.

3. Kebijakan manajemen untuk melakukan optimalisasi produktivitas awak kabin, sehingga hanya terdapat penambahan 19 orang siswa awak kabin yang pada akhir 2019 telah berubah status menjadi awak kabin dan tersisa 2 (dua) orang yang masih berstatus siswa awak kabin.

Adapun pelatihan yang dikoordinasikan oleh unit Human Capital Management adalah sebagai berikut:

1. *Financial Master Program*

Training yang dilakukan sebagai bagian dari program pengembangan untuk persiapan suksesi *Chief Financial Officer* (CFO) Garuda Indonesia Group.

2. *Service Excellence Training*

Training yang dilakukan bagi unit yang memiliki internal customer (pegawai) yang bertujuan untuk meningkatkan pelayanan bagi internal customer (pegawai).

3. *Improving Global Leaders Competencies - Journey of Global Leaders*

4. *Training* yang dilakukan dalam rangka pengembangan kompetensi global bagi *Leaders* di Garuda Indonesia Group.

3. The Management policy is to optimize Cabin Crew productivity, therefore, there were only 19 additional Cabin Crew Students who at the end of 2019 changed status to Cabin Crew and 2 persons are still Cabin Crew Students.

The trainings, coordinated by the Human Capital Management unit, are as follows:

1. Financial Master Program

Training that is held as part of the development program to prepare the succession of Chief Financial Officer (CFO) of Garuda Indonesia Group.

2. Service Excellence Training

Training that is conducted for units that have internal customers (employees), aiming at improving services for internal customers (employees).

3. Improving Global Leaders Competencies - Journey of Global Leaders

4. Training that is held in the framework of global competence development for Leaders in Garuda Indonesia Group.

TARGET KE DEPAN (PROYEKSI)

ASUMSI DALAM MENYUSUN PROYEKSI

Manajemen Perseroan telah menyusun rencana untuk tahun 2020 dengan mempertimbangkan kondisi ekonomi saat ini dan proyeksi perekonomian. Adapun asumsi yang digunakan dalam menyusun proyeksi adalah sebagai berikut.

ASUMSI PERTUMBUHAN EKONOMI INDONESIA TAHUN 2020

Asumsi yang digunakan dalam penyusunan RKAP tahun 2020 didasarkan pertimbangan atas data historis. Pertumbuhan ekonomi Indonesia yang digunakan dalam RKAP tahun 2020 diasumsikan sebesar 5,08% atau lebih rendah dibandingkan dengan asumsi dasar makro ekonomi

ASSUMPTIONS OF INDONESIA'S ECONOMIC GROWTH IN 2020

The assumptions used in preparing the 2020 RKAP are based on consideration of historical data. Indonesia's economic growth used in the 2020 RKAP is assumed to be 5.08% or lower compared to the basic macroeconomic assumptions set in the 2020 APBN of 5.3%. Meanwhile, the inflation rate

yang ditetapkan dalam APBN 2020 yang sebesar 5,3%. Sementara itu, tingkat inflasi yang dijadikan asumsi dalam RKAP 2020 adalah sebesar 3,15% dimana angka tersebut sedikit lebih tinggi dari asumsi makro ekonomi dalam APBN 2020 yang sebesar 3,1%.

ASUMSI HARGA FUEL 2020

Biaya terkait bahan bakar memiliki porsi yang tinggi dalam struktur biaya penerbangan sehingga pergerakan *crude oil price* di tahun mendatang merupakan salah satu pertimbangan utama atas strategi produksi yang akan dilakukan oleh Perseroan.

Source: From various sources such as Fitch, Banque Nationale de Paris (BNP) Paribas, Robobank and others (analysis period 2019)

Dalam RKAP, rata-rata *crude oil price* sepanjang 2020 diasumsikan sebesar USD 73,15/bbl atau lebih tinggi dibandingkan dengan asumsi Pemerintah dalam APBN 2020 yang sebesar USD 65/bbl. Hal ini didasarkan atas pertimbangan data historis dan kemungkinan adanya potensi pengurangan produksi minyak mentah oleh negara-negara OPEC serta sanksi Amerika Serikat terhadap Iran. Namun, produksi minyak mentah yang berasal dari negara-negara Non-OPEC khususnya Amerika Serikat diprediksi mengalami peningkatan, sehingga diharapkan dapat membantu menjaga kestabilan harga minyak dunia. Atas pertimbangan tersebut, maka diperoleh rata-rata *fuel price into plane* untuk asumsi RKAP tahun 2020 adalah sebesar USc 63,60/liter.

ASUMSI SUKU BUNGA DAN EXCHANGE RATE 2020

Berdasarkan pengamatan yang dilakukan oleh Lembaga Riset Global yakni Fitch Solutions, Bank Indonesia (BI) berpotensi menurunkan kembali suku bunga acuan sampai dengan akhir tahun 2020 dengan pertimbangan bahwa tingkat pertumbuhan ekonomi yang belum mencapai target pada tahun 2019 dan laju inflasi yang tergolong "jinak". Sehingga, penurunan suku bunga tersebut diharapkan dapat mendorong pertumbuhan ekonomi Indonesia di tahun 2020. Selain itu, faktor eksternal lainnya yang dapat mempengaruhi suku bunga adalah potensi penurunan kembali suku bunga oleh the Fed di tahun 2020 yang disebabkan oleh perlambatan pertumbuhan ekonomi Amerika Serikat.

used as an assumption in the 2020 RKAP is 3.15% which is slightly higher than the macroeconomic assumptions in the 2020 APBN which is 3.1%.

ASSUMPTIONS OF FUEL PRICE IN 2020

Costs related to fuel have a high portion in the flight cost structure, thus, movement of crude oil prices in the coming year is one of the main considerations of the production strategy that will be carried out by the Company.

In RKAP, the average crude oil price throughout 2020 is assumed to be USD73.15/bbl or higher than the Government's assumption in the 2020 APBN of USD 65/bbl. This is based on historical data consideration and the possibility of a potential reduction in crude oil production by OPEC countries and US sanctions against Iran. However, crude oil production from Non-OPEC countries, especially the United States is predicted to increase, thus, it is expected to help maintain the stability of world oil prices. Based on these considerations, the average fuel price into the plane for the 2020 RKAP assumption is USc 63.60/liter.

ASSUMPTIONS OF INTEREST RATE AND EXCHANGE RATE IN 2020

Based on observations made by the Global Research Institute, Fitch Solutions, Bank Indonesia (BI) has the potential to reduce the benchmark interest rate again until the end of 2020 with the consideration that the economic growth level has not reached the target in 2019 and the inflation rate is classified as "tame". Thus, the decline in interest rates is expected to drive Indonesia's economic growth in 2020. In addition, other external factors that can affect interest rates are the potential for the Fed to decrease interest rates again in 2020 due to the slowing economic growth in the United States.

Perang dagang antara Amerika Serikat dan Tiongkok yang masih terus berlanjut membuat mata uang USD terus menguat. Hal ini tentunya akan berdampak pada nilai tukar Rupiah terhadap USD pada tahun 2020. Atas hal tersebut, maka diproyeksikan depresiasi Rupiah di tahun 2020 berada di kisaran Rp15.000/USD atau lebih rendah dibandingkan asumsi yang digunakan Pemerintah di APBN 2020, yaitu sebesar Rp14.400/USD.

Berdasarkan asumsi di atas, Perseroan menyusun proyeksi untuk tahun 2020 diuraikan sebagai berikut.

PROYEKSI KEUANGAN DAN PRODUKSI

Proyeksi keuangan dan produksi 2020 diharapkan akan mampu menjadi koridor usaha pencapaian target Perseroan dengan yang telah direncanakan. Adapun proyeksi tersebut disajikan sebagai berikut:

The ongoing trade war between the United States and China keeps the USD strong. This will certainly have an impact on Rupiah exchange rate against USD in 2020. Regarding such matter, it is projected that the Rupiah depreciation in 2020 will be in the range of Rp15,000/USD or lower than the assumptions used by the Government in the 2020 State Budget, which is Rp14,400/USD.

Based on the assumptions above, the Company prepares projections for 2020 as described below.

PROJECTIONS OF FINANCE AND PRODUCTION

Financial projections and production in 2020 are expected to be able to become the business corridor to achieve the Company's targets as planned. The projections are presented below:

INFORMASI DAN FAKTA MATERIAL SETELAH TANGGAL LAPORAN AKUNTAN

World Health Organization (WHO) pada tanggal 11 Maret 2019 menetapkan wabah *Corona Virus Disease (COVID-19)* sebagai pandemik. Pandemik COVID-19 yang berakibat masyarakat menghadapi pembatasan perjalanan untuk rute-rute penerbangan tertentu dan menghindari perjalanan yang tidak penting. Hal ini termasuk larangan sementara kunjungan keagamaan ke Arab Saudi.

Manajemen Garuda Indonesia Grup secara aktif memantau situasi di atas dan mengeksplorasi opsi-opsi berikut untuk mengantisipasi penurunan jumlah penumpang yang signifikan akibat dari pandemik COVID-19:

1. Penyesuaian kapasitas
2. Diskon untuk rute-rute penerbangan tertentu
3. Optimalisasi potensi untuk layanan kargo dan charter
4. Koordinasi erat dengan Pemerintah
5. Efisiensi biaya dan negosiasi ulang dengan vendor-vendor Grup.

PROSPEK USAHA

PROYEKSI MAKRO EKONOMI GLOBAL 2020

Sebagaimana disampaikan oleh World Bank dalam *Global Economic Prospect* di bulan Januari 2020, bahwasanya perekonomian dunia tahun 2020 diprediksi meningkat tipis dari tahun 2019 dan berada pada kisaran angka 2,5%. International Monetary Fund (IMF) juga memproyeksikan pertumbuhan ekonomi 2020 yakni sebesar 3,5% sebagaimana tertuang dalam *IMF World Economy Outlook* Januari 2020. Beberapa hal yang mendorong pertumbuhan ekonomi yang masih melambat tersebut diantaranya adalah belum pulihnya pertumbuhan ekonomi pada negara-negara *emerging markets*, serta belum cukup kuatnya pemulihan perekonomian di negara maju, seperti pada Amerika Serikat, Uni Eropa, Jepang, dan Tiongkok.

Pada tahun 2020, World Bank memprediksi pertumbuhan moderat Real GDP Dunia di angka 3,2%. Hal ini dikarenakan kebijakan yang tidak dapat diprediksi serta isu-isu ekonomi seperti *trade war* yang semakin intensif. Indonesia tumbuh di kisaran 5,3%, cukup tinggi dibandingkan banyak negara maju yang mengalami pelemahan pertumbuhan. Di sisi lain, belum tersedianya kebijakan perdagangan yang positif pada negara-negara besar seperti Amerika Serikat dan Tiongkok, tentunya mempengaruhi volume perdagangan, pertumbuhan investasi serta tingkat manufaktur global yang diproyeksikan menurun di periode 2020.

INFORMATION AND MATERIAL FACTS SUBSEQUENT TO ACCOUNTING REPORTING DATE

The World Health Organization (WHO) on March 11, 2019, established the Corona Virus Disease (COVID-19) outbreak as a pandemic. The COVID-19 pandemic resulted in people facing travel restrictions for certain flight routes and avoiding unnecessary trips. This includes a temporary ban on religious visits to Saudi Arabia.

The Management of Garuda Indonesia Group actively monitors the above situation and explores the following options to anticipate a significant reduction in the number of passengers due to the COVID-19 pandemic:

1. Capacity adjustment
2. Discounts on certain flight routes
3. Optimization of potential for cargo and charter services
4. Close coordination with the Government
5. Cost efficiency and renegotiation with Group vendors.

BUSINESS PROSPECTS

GLOBAL MACRO ECONOMIC PROJECTIONS IN 2020

As stated by the World Bank in the Global Economic Prospect in January 2020, the world economy in 2020 is predicted to increase slightly from that of 2019 and be in the range of 2.5%. The International Monetary Fund (IMF) also projects 2020 economic growth of 3.5%, as stated in the IMF World Economy Outlook in January 2020. Some matters that are driving the economic growth down among others are the non-recovering economic growth in emerging market countries and economic recovery that is not yet strong in developed countries, such as the United States, the European Union, Japan, and China.

In 2020, the World Bank predicts the moderate growth of World Real GDP at 3.2%. This is due to the unpredictable policies and economic issues such as increasingly intensive trade war. Indonesia grows around 5.3%, quite high compared to growth of many developed countries experiencing slowdown. On the other hand, the unavailability of positive trade policies in large countries such as the United States and China, of course, affects the trade volume, investment growth, and global manufacturing level, which are projected to decline in the 2020 period.

Sebagai negara perekonomian terbesar di dunia, pertumbuhan ekonomi Amerika Serikat diperkirakan masih melambat di tahun 2020. IMF memproyeksikan pertumbuhan ekonomi negara tersebut akan menurun pada tingkat 2,0% pada tahun 2020. Sementara itu, World Bank juga memproyeksi pertumbuhan ekonomi Amerika Serikat berada pada tingkat 1,8% di tahun 2020, sebagai efek dari stimulus fiskal baru-baru ini semakin berkurang.

Sebagai negara berkembang terbesar, pertumbuhan Tiongkok menurun setelah adanya kombinasi pengetatan terhadap regulasi yang diperlukan untuk mengendalikan shadow banking dan peningkatan ketegangan perdagangan dengan Amerika Serikat. Perekonomian Tiongkok itu sendiri dibayangi oleh adanya risiko kebijakan perdagangan proteksionisme yang diberlakukan oleh Pemerintah Amerika Serikat. Berdasarkan data dari *Economy Outlook* Januari 2020, IMF memperkirakan pertumbuhan ekonomi Tiongkok di tahun 2020 sebesar 5,9%. Tensi perang dagang antara Amerika dan Tiongkok yang kian memburuk. Hal ini akan berdampak pada volume perdagangan dan pertumbuhan investasi global yang diproyeksi sedikit stagnan di 2019-2020.

Meskipun demikian, di tengah ketidakpastian prospek ekonomi global tahun 2020, IMF memproyeksikan bahwa negara-negara pasar berkembang (*emerging markets*) di Asia mampu untuk tumbuh jauh lebih baik. Dalam laporan *World Economic Outlook* Januari 2020, IMF memprediksi pertumbuhan ekonomi kelompok *emerging markets* dan negara berkembang akan berada pada kisaran 4,8% pada 2020.

PROYEKSI MAKRO EKONOMI INDONESIA 2020

Pada Juni 2019, Kementerian Koordinator Bidang Perekonomian menyiapkan beberapa kebijakan untuk perbaikan ekonomi Indonesia. Diantara kebijakan-kebijakan tersebut terdapat kebijakan terkait peningkatan ekspor untuk memperbaiki defisit neraca perdagangan Indonesia dan kebijakan terkait kawasan ekonomi khusus (KEK) yaitu *tax holiday*, *tax allowance* serta keringanan pajak pada PPh pribadi untuk KEK di sektor jasa, pendidikan, kesehatan dan ekonomi kreatif.

Dalam APBN dan Nota Keuangan 2020, Pemerintah menitikberatkan lima hal yang menjadi fokus dalam kebijakan sebagai upaya menggenjot perekonomian Indonesia di 2020. Fokus kebijakan tersebut diantaranya adalah penguatan kualitas SDM, percepatan pembangunan infrastuktur,

As the largest economy in the world, economic growth in the United States is estimated to still be slow in 2020. The IMF projects that such country's economic growth will decline at a rate of 2.0% by 2020. Meanwhile, the World Bank also projects that the economic growth of the United States is at the level of 1.8% in 2020, as an effect of the recent fiscal stimulus, which are recently diminishing.

As the largest developing country, China's growth has declined after a combination of tightened the regulations, which are necessary to control shadow banking, and increased trade tension with the United States. The Chinese economy itself is overshadowed by the risk of trade protectionism policies imposed by the United States Government. Based on data from the *Economy Outlook* in January 2020, the IMF expects China's economic growth in 2020 to be 5.9%. The tension of the trade war between America and China is getting worse. This will have an impact on trade volume and global investment growth which is projected to be slightly stagnant in 2019-2020.

Even so, in the middle of the uncertain global economic outlook for 2020, the IMF projects that emerging market countries in Asia will be able to grow much better. In the January 2020 *World Economic Outlook* report, IMF predicts that economic growth in emerging market groups and developing countries will be around 4.8% in 2020.

INDONESIA'S MACRO ECONOMIC PROJECTIONS IN 2020

In June 2019, the Coordinating Ministry for Economic Affairs prepared several policies to improve the Indonesian economy. Among these policies are policies related to increased exports to improve Indonesia's trade balance deficit and policies related to special economic zones (SEZ), which are tax holidays, tax allowance, and tax relief on personal income tax for SEZ in the sectors of services, education, health, and creative economy.

In the State Budget and Financial Note 2020, the Government emphasizes five matters that are the focus of policies as an effort to boost Indonesia's economy in 2020. The focus of the policies includes strengthening the human resources quality, accelerating infrastructure development, strengthening

penguatan perlindungan sosial, pemberlakuan desentralisasi fiskal dari sisi kualitas dan penggunaan APBN sebagai antisipasi ketidakpastian baik dari global maupun dalam negeri.

Selain itu, dalam APBN 2020 Pemerintah menetapkan asumsi dasar makro ekonomi Indonesia yang didasarkan pada proyeksi perekonomian Indonesia yang tetap dapat melanjutkan momentum positif di tengah risiko ketidakpastian global.

Faktor penting lain dari perekonomian adalah pergerakan nilai tukar Rupiah terhadap valuta asing. Dari sisi eksternal, pergerakan nilai tukar Rupiah dipengaruhi oleh ketidakpastian suku bunga acuan The Fed (*Fed Fund Rate*), tensi perdagangan antara Tiongkok dan Amerika Serikat, isu geopolitik, dinamika Brexit hingga krisis ekonomi yang terjadi di Turki dan Argentina. Sementara itu, dari sisi internal, pergerakan nilai tukar Rupiah dipengaruhi oleh keseimbangan neraca pembayaran Indonesia baik dari sisi transaksi berjalan, maupun transaksi modal dan finansial.

Nilai tukar Rupiah terhadap USD di tahun 2014-2019 mengalami fluktuasi dikisaran Rp11.878-Rp14.247 per 1 USD. Pergerakan nilai Rupiah terhadap USD tersebut diperkirakan memberikan kontribusi pada level moderat dalam perkembangan ekonomi dan pertumbuhan pasar penumpang di tahun 2019. Adapun gambaran atas pergerakan nilai tukar Rp terhadap USD dari tahun ke tahun, menunjukkan nilai tukar Rp yang diproyeksi berada di kisaran Rp14.000-Rp15.000 di tahun 2020.

Sementara itu, mempertimbangkan perkembangan terkini kondisi ekonomi, *outlook*, serta prospek ke depannya, maka pertumbuhan ekonomi Indonesia tahun 2020 diprediksi masih melambat, dengan tingkat laju pertumbuhan sebesar 5,3%. Hal ini juga didukung oleh fokus Pemerintah pada stabilitas nilai Rupiah, inflasi yang rendah, defisit fiskal yang sehat, serta defisit transaksi yang berjalan aman.

Dalam APBN 2020, asumsi laju inflasi Indonesia adalah sebesar 3,1%. Hal ini didasarkan pada kondisi makro ekonomi Indonesia yang stabil mendorong laju konsumsi dan pertumbuhan ekonomi di tahun 2020. Pemerintah juga menilai bahwa di tengah fluktuasi global, fundamental ekonomi domestik masih baik ditandai oleh pertumbuhan ekonomi yang sehat.

Dengan memperhatikan faktor permintaan dan penawaran pada pasar global dan risiko geopolitik, Pemerintah mengasumsikan bahwa harga minyak akan berada pada kisaran USD65/bbl sebagaimana tertuang dalam APBN 2020.

social protection, enacting fiscal decentralization in terms of quality and use of State Budget as an anticipation of the global and domestic uncertainties.

In addition, in the 2020 State Budget, the Government sets basic macroeconomic assumptions of Indonesia based on the projections of the Indonesian economy that can continue the positive momentum in the middle of the uncertain global risks.

Another important factor of the economy is the movement of Rupiah exchange rate against foreign currencies. From the external side, movement of Rupiah exchange rate is influenced by the uncertainty of the Fed's interest rate (*Fed Fund Rate*), trade tension between China and the United States, geopolitical issues, Brexit dynamics, to the economic crisis that occurred in Turkey and Argentina. Meanwhile, from an internal perspective, movement in Rupiah exchange rate is influenced by the balance of payments in Indonesia, either in the current account or capital and financial transactions.

The exchange rate of Rupiah against USD in 2014-2019 experienced fluctuations in the range of Rp11,878-Rp14,247 per 1 USD. The movement of Rupiah against USD is expected to contribute to a moderate level in economic development and growth of passenger market in 2019. As for the description of movement of Rp to USD exchange rate from year to year, it shows the projected exchange rate of Rp14,000-Rp15,000 in 2020.

Meanwhile, by considering the latest developments in economic conditions, outlook, and future prospects, Indonesia's economic growth in 2020 is predicted to slow down, with a growth rate of 5.3%. This is also supported by the Government's focus on Rupiah stability, low inflation, sound fiscal deficit, and safe current account deficit.

In the 2020 State Budget, the assumption of Indonesia's inflation rate is 3.1%. This is based on Indonesia's stable macroeconomic conditions that drive the pace of consumption and economic growth in 2020. The government also considers that in the middle of global fluctuations, domestic economic fundamentals are still well, which are marked by healthy economic growth.

By considering the demand and supply factors in global markets and geopolitical risks, the Government assumes that oil prices will be in the range of USD65/bbl as stated in the 2020 State Budget.

Di sisi lain, potensi pasar penumpang penerbangan juga dapat diprediksi dari komposisi jumlah masyarakat kelas menengah atau *Middle Class and Affluent Consumer* (MAC) di suatu negara. Berdasarkan studi yang dilakukan oleh Ernst and Young pada Mei 2013, populasi MAC dalam komunitas negara mampu mendorong pertumbuhan ekonomi dan menjadi sumber potensi bagi sejumlah pebisnis. Saat ini pertumbuhan jumlah masyarakat kelas menengah atau MAC di Indonesia terjadi di Pulau Jawa dan Sumatera, dengan potensi total populasi sebesar 141 juta di tahun 2020.

ANALISIS ATAS MARKET DAN TRAFIK GLOBAL TAHUN 2020

Data *market* dan *traffic* penumpang baik domestik maupun internasional tahun 2020 menunjukkan tren peningkatan. Pada 2020, pasar penumpang domestik diproyeksi tumbuh sebesar 4,3% sementara pasar penumpang internasional diproyeksikan tumbuh sebesar 6,6% sebagaimana ditunjukkan dalam berikut ini.

On the other hand, the potential market for airline passengers can also be predicted from the composition of the number of Middle Class and Affluent Consumer (MAC) in a country. Based on a study conducted by Ernst and Young in May 2013, MAC population in a country's community is able to drive economic growth and become a potential source for a number of business people. Currently, the growth of the middle class or MAC population in Indonesia is happening on Java and Sumatra islands, with a potential total population of 141 million by 2020.

The highest market growth in the period of 2020-2030 will occur in the service areas of China, Taiwan, and Hong Kong (CTH), which is 5.2%.

Selama tahun 2020, berikut adalah beberapa isu penting yang dijadikan pertimbangan dalam penyusunan rencana kerja dan strategi 2019:

1. Program Prioritas Nasional

Akselerasi pembangunan infrastuktur dengan mendorong Kementerian/Lembaga agar menggunakan skema pembiayaan kreatif dan melakukan penguatan pariwisata 5 (lima) Destinasi Super Prioritas (Danau Toba, Mandalika, Labuan Bajo, Borobudur dan Likupang). Dimulai sejak 2016, Pemerintah melalui Kementerian Pariwisata mencanangkan program pengembangan 10 (sepuluh) Bali Baru untuk meraih 20 juta wisatawan mancanegara di tahun 2019. Saat ini, Pemerintah menargetkan untuk memfokuskan akselerasi pembangunan wilayah pariwisata yang disebut dengan 5 (lima) Destinasi Super Prioritas, sebagaimana tercantum dalam Nota Keuangan dan RAPBN 2020.

Throughout 2020, there were a number of important issues that were taken into consideration in preparing the 2019 work plan and strategy:

1. National Priority Program

Accelerating infrastructure development by encouraging Ministries/Institutions to use creative financing schemes and strengthening tourism for 5 (five) Super Priority Destinations (Lake Toba, Mandalika, Labuan Bajo, Borobudur, and Likupang). Started in 2016, the Government through the Ministry of Tourism launched a development program for 10 (ten) New Bali to reach 20 million foreign tourists in 2019. Currently, the Government is targeting to focus on accelerating the development of tourism areas called 5 (five) Super Priority Destinations, as listed in the Financial Note and 2020 State Budget.

Pengembangan 5 (lima) Destinasi Super Prioritas menjadi potensi yang cukup baik bagi Garuda Indonesia untuk mengembangkan jaringan penerbangannya.

The development of 5 (five) Super Priority Destinations has good potential for Garuda Indonesia to develop its flight network.

2. Kegiatan yang akan dilaksanakan untuk mendukung akselerasi pertumbuhan Destinasi Super Prioritas tersebut antara lain:

- Pembangunan Kawasan Pariwisata Strategis Nasional (KSPN), fasilitasi event, serta gosite.
- Pembangunan embung dan jaringan air minum.
- Pembangunan jalan pelabuhan.
- Pembangunan Tempat Pemproses Akhir (TPA), Instalasi Pengolah Air Minum (IPAM) Geopark Dermaga.
- Pembangunan/rehab pelabuhan danau, runway/taxiway, bandara.
- Pengembangan dan revitalisasi desa adat.
- Pemberdayaan desa wisata.
- Penyediaan sarana ruang kreatif.

2. Activities to be carried out to support the acceleration of Super Priority Destinations growth include:

- Development of National Strategic Tourism Area (KSPN), event facilitation, and gosite.
- Construction of reservoirs and drinking water networks.
- Construction of port roads.
- Construction of Landfills (TPA), Drink Water Treatment Plant (IPAM) of Geopark Dermaga.
- Construction/rehabilitation of lake port, runway/taxiway, airport.
- Development and revitalization of indigenous villages.
- Empowerment of tourist villages.
- Provision of creative space facilities.

Pelayanan Garuda Indonesia selama ini mengunggulkan keramahtamahan para *cabin crew*. Dengan mengedepankan keramahtamahan khas Indonesia melalui Garuda Indonesia *Experience*, *cabin crew* Garuda Indonesia tercermin lebih tulus dalam melayani para penumpangnya. Semangat ini menjadi kekuatan dan keunggulan Garuda Indonesia. Hal ini semakin dibuktikan dengan penghargaan *World's Best Cabin Crew* yang diberikan oleh Skytrax untuk maskapai Garuda Indonesia selama lima tahun berturut-turut, yaitu tahun 2014, 2015, 2016, 2017, 2018 serta memperoleh peringkat kedua tahun 2019.

Furthermore, Garuda, which is developing its cargo business, won the “*The Best Cargo Airlines for Asia Pacific Sector*” and “*Finalist of Best Airlines for Europe Sector*”, which was awarded by the *Indonesia Cargo Agent Club* on August 14, 2019.

The award received by Garuda Indonesia shows that Garuda Indonesia brand is closely affiliated with service attributes, especially on Indonesian hospitality. This good image can be utilized by Garuda Indonesia Group to dominate the domestic market through Garuda Indonesia brand.

4. Services Quality of Garuda Indonesia's Cabin Crew
Garuda Indonesia services have been promoting the hospitality of the cabin crew. This makes Garuda Indonesia Group an airline with the largest market share on routes flown in Indonesia.

CARRY OVER BUSINESS OPPORTUNITY 2020

Berdasarkan asumsi yang telah dijabarkan di atas disertai adanya berbagai peluang, Garuda Indonesia optimis untuk dapat meningkatkan kinerjanya dalam jangka panjang. Dengan kata lain, Garuda Indonesia memiliki prospek usaha yang sangat baik. Garuda Indonesia Grup masih akan melakukan berapa bisnis yang sudah direncanakan pada tahun 2019 dan akan dilanjutkan pengembangannya pada tahun 2020. Berikut adalah beberapa bisnis tersebut:

1. Investasi Pabrik Ban

Ban pesawat memiliki peranan penting di industri penerbangan selain merupakan salah satu aspek *safety* yang krusial, ban juga berperan dalam memberikan kenyamanan bagi penumpang pada saat *taxis*, *landing* dan *take off*. Melihat pertumbuhan penerbangan di Asia khususnya Indonesia dan jumlah produsen ban yang masih terbatas di Indonesia, pengembangan usaha ini memiliki potensi yang cukup besar bukan hanya untuk menambah pendapatan bagi Garuda Indonesia, tetapi juga dapat meningkatkan efisiensi dari sisi pemenuhan kebutuhan *sparepart* Garuda Indonesia Grup.

Skenario *partnership* yang akan dijalankan adalah *Joint Venture (JV)* antara GMF, Batam Aero Technic, Dunlop, dan/atau Michelin. Dengan rencana JV efektif berjalan di awal tahun 2020 maka produksi ban untuk tipe pesawat Airbus 330-200 diperkirakan mulai pada tahun 2021 dan kemudian Boeing 737-800 pada tahun 2023.

2. Door to Door Logistic di Aero Wisata Grup (AWS)

Dalam era digitalisasi ini, *e-commerce business* merupakan salah satu bisnis dunia yang sedang bertumbuh pesat dan meningkat tajam, seiring dengan pergeseran proses bisnis dari pengelolaan tradisional (*human to human interaction/offline marketplace*) menjadi *online marketplace*. Pendapatan dari segmen bisnis ini diprediksi akan tumbuh 133,5% menjadi USD16,5 miliar atau sekitar Rp219 triliun pada 2022 dari posisi 2017. Di sisi lain, pertumbuhan segmen tersebut membutuhkan dukungan dan kesiapan dari aspek logistik.

Untuk dapat mengoptimalkan pemenuhan kebutuhan pengiriman produk *e-commerce* yang semakin tinggi, Garuda Indonesia melalui salah satu anak usahanya (Aero Wisata Group/AWS) akan melakukan pengembangan usaha *door to door logistics* dengan sistem yang terintegrasi dengan layanan kargo lainnya. Program ini sudah dimulai pada pertengahan tahun 2019 secara bertahap di 312 gerai kargo yang tersedia di hampir seluruh Indonesia. Pada tahun

CARRY OVER BUSINESS OPPORTUNITY IN 2020

Based on the assumptions outlined above along with the various opportunities, Garuda Indonesia is optimistic that it can improve its performance in the long run. In other words, Garuda Indonesia has very good business prospects. Garuda Indonesia Group will still conduct more businesses that were planned in 2019 and will continue to develop in 2020. Here are some of these businesses:

1. Tire Factory Investment

Airplane tires have an important role in the aviation industry besides being one of the crucial safety aspects, tires also play a role in providing comfort for passengers during taxiing, landing, and take off. Looking at the flight growth in Asia, especially Indonesia, and the limited number of tire manufacturers in Indonesia, this business development has considerable potential not only to increase Garuda Indonesia's revenue, but also to improve efficiency in terms of meeting Garuda Indonesia Group's spare parts needs.

The partnership scenario that will be implemented is Joint Venture (JV) between GMF, Batam Aero Technic, Dunlop, and/or Michelin. With an effective JV plan running in early 2020, tire production for Airbus 330-200 aircraft type is estimated to start in 2021 and then for Boeing 737-800 in 2023.

2. Door to Door Logistics at Aero Wisata Group (AWS)

In this digitalization era, e-commerce business is one of the world's businesses that is growing rapidly and increasing sharply, along with the shift in business process from traditional management (human to human interaction/offline marketplace) to online marketplace. Revenue from this business segment is predicted to grow 133.5% to USD16.5 billion or around Rp219 trillion in 2022 from 2017. On the other hand, this segment growth requires support and readiness from logistical aspect.

In order to optimize the fulfillment of the increasingly high e-commerce product delivery needs, Garuda Indonesia through one of its subsidiaries (Aero Wisata Group/AWS) will develop door to door logistics business with a system that is integrated with other cargo services. This program began in mid-2019 in stages in 312 cargo outlets available in almost all of Indonesia. In 2020, it is planned to add cargo outlets to reach 350 outlets. AWS will also activate outlets that are

2020, direncanakan untuk menambahkan gerai kargo hingga mencapai 350 gerai. AWS juga akan melakukan aktivasi gerai yang sudah tidak aktif serta melakukan *partnership* potensial untuk pembukaan gerai baru. Sehingga strategi *door to door* pada tahun 2020 ditargetkan untuk mendapat pendapatan sebesar Rp22,94 miliar.

3. Container Cargo/GIA Box

Mini Unit Load Device (ULD)/kontainer adalah sebuah inovasi yang diperuntukan untuk membawa *marine product* dan *valueable goods*, diharapkan inovasi ini dapat meminimalkan risiko kebocoran *marine product* yang biasanya menggunakan *styrofoam* dan menyebabkan terjadinya korosi di badan pesawat, selain itu mini ULD ini juga diharapkan dapat mengurangi potensi pendodosan. Penerapan mini ULD memerlukan pengembangan lebih lanjut mengingat mini ULD yang akan digunakan terbuat dari bahan ramah lingkungan dan dapat di daur ulang.

Saat ini penggunaan *styrofoam* bukan hanya merusak lingkungan namun juga tidak memberikan dampak positif untuk Garuda Indonesia dari segi finansial. Dengan mengubah *styrofoam* menjadi kemasan ramah lingkungan diharapkan dapat memberikan tambahan pendapatan kepada Perseroan sebesar USD100.000 di 2020, produk ini *launching* pada kuartal II tahun 2020.

4. Cargo Village di Cengkareng (CGK) dan Warehouse di Denpasar (DPS) dan Makassar (UPG)

Peluang bisnis kargo di stasiun domestik terutama di CGK dan DPS membutuhkan dukungan dari fasilitas dan *warehouse* yang dapat mengakomodir kebutuhan logistik yang meningkat. Kondisi saat ini Garuda Indonesia hanya memiliki *warehouse* di CGK dengan kapasitas yang terbatas sedangkan di DPS menggunakan pihak ketiga sebagai penyedia dan pengelola fasilitas *warehouse*, dimana kondisi tersebut tidak dapat menunjang *operational excellence* dan strategi meningkatkan pendapatan. Pembangunan *cargo village* di CGK dan pengelolaan *warehouse* di DPS dan UPG dengan fasilitas yang lebih modern serta *automated system*, dapat menjadi solusi mengatasi permasalahan keterbatasan fasilitas sehingga arus barang diharapkan dapat lebih cepat, lebih efisien dan juga optimal dari sisi pendapatan.

no longer active and conduct potential partnerships to open new outlets. Therefore, the door to door strategy in 2020 is targeted to achieve revenue of Rp22.94 billion.

3. Container Cargo/GIA Box

Mini Unit Load Device (ULD)/container is an innovation intended to bring marine products and valuable goods. It is expected that this innovation can minimize the risk of leakage of marine products that usually use Styrofoam and cause corrosion in the fuselage. In addition to this, the mini ULD is also expected to reduce potential waste. Implementing mini ULD requires further development considering that mini ULD to be used is made from environmentally friendly materials and can be recycled.

Currently, the use of Styrofoam does not only damage the environment but also does not have a positive impact on Garuda Indonesia in terms of finance. By changing styrofoam to environmentally friendly packaging, it is expected that it will provide additional revenue to the Company of USD100,000 in 2020. This product was launched in the second quarter of 2020.

4. Cargo Village in Cengkareng (CGK) and Warehouses in Denpasar (DPS) and Makassar (UPG)

Cargo business opportunities at domestic stations, especially at CGK and DPS, require support from the facilities and warehouses that can accommodate the increasing logistics needs. The current condition is that Garuda Indonesia only has a warehouse in CGK with limited capacity while in DPS it uses a third party as a provider and manager of warehouse facilities, thus, these conditions cannot support the operational excellence and strategies to increase revenue. The construction of cargo villages in CGK and warehouse management in DPS and UPG with more modern facilities and automated systems can be a solution to overcome the problem of limited facilities so that the flow of goods is expected to be faster, more efficient, and also optimal in terms of revenue.

Cargo Village di CGK akan bekerjasama dengan Angkasa Pura II, Garuda Indonesia akan mendapatkan area dengan luas 75% dari total luas area Terminal lini 1 (122.800 m²). Konsep yang akan diterapkan di *Cargo Village* adalah automation, perluasan storage area, implementasi *warehouse management system*, perbaikan *service road*, serta integrasi dari seluruh aspek di *cargo terminal* oleh Garuda Indonesia dengan bekerjasama dengan pihak ketiga yang berpengalaman dalam pengelolaan terminal. Pelaksanaan program pembangunan *cargo village* CGK akan dimulai pada 2020.

Dalam peningkatan fasilitas *warehouse* di UPG, Garuda Indonesia bekerjasama dengan Angkasa Pura Logistik (AP Log) akan memanfaatkan kembali terminal kargo lama untuk digunakan sebagai terminal khusus *freighter* dengan keseluruhan investasi dilakukan oleh AP Log. Pemanfaatan terminal ini sejalan dengan peningkatan *volume freighter* di tahun 2020. Inisiasi ini akan mulai dilaksanakan pada kuartal I tahun 2020.

Peningkatan fasilitas *warehouse* di DPS diinisiasi melalui kerjasama dengan entitas anak Garuda Indonesia, yaitu PT Aerojasa Perkasa (AJP), untuk penyediaan *Cold Storage*. Penyediaan *Cold Storage* ini dibutuhkan untuk memfasilitasi tingginya *volume transhipment* komoditas *perishable* yang melalui terminal DPS terutama dari pasar Australia. Dengan adanya fasilitas ini, AJP juga dapat memasarkan penggunaan *cold storage* untuk *airline* diluar Garuda Indonesia Grup sebagai bentuk sumber peningkatan pendapatan. Inisiasi penambahan fasilitas *cold storage* dengan AJP ini akan mulai dilaksanakan pada kuartal I tahun 2020.

5. Pembangunan Gedung Kantor Kebon Sirih
Garuda Indonesia saat ini melakukan analisis dan kajian bersama dengan calon investor dari salah satu BUMN Karya yang berkompeten dibidang konstruksi dan investasi. Analisis dan kajian tersebut akan menghasilkan konsep dan design rencana pembangunan gedung baru dengan skema *Build Operate Transfer* (BOT) di Jalan Kebon Sirih No. 46A, Jakarta Pusat (KS46A), baik dari sisi keuangan, bisnis dan juga aspek komersilnya. BUMN Karya tersebut juga sedang dipercaya untuk membangun Kawasan BUMN Center, yang terdiri dari: gedung Danareksa, gedung Kementerian BUMN dan gedung Telkom serta mengikutsertakan gedung KS46A ini, dimana area keempat instansi tersebut akan menjadi satu hamparan dengan pintu masuk dan keluar dapat diakses dari tiga arah yaitu: dari Jalan Medan Merdeka Selatan, dari Jalan H. Agus Salim dan dari Jalan Kebon Sirih.

Cargo Village in CGK will cooperate with Angkasa Pura II, Garuda Indonesia will get an area of 75% of the total area of Terminal 1 line (122,800 m²). The concept that will be applied in Cargo Village is automation, expansion of storage areas, implementation of warehouse management system, service road improvement, and integration of all aspects of cargo terminals by Garuda Indonesia in collaboration with third parties that are experienced in terminal management. The implementation of CGK cargo village development program will begin in 2020.

In upgrading warehouse facilities at UPG, Garuda Indonesia in collaboration with Angkasa Pura Logistik (AP Log) will reuse the old cargo terminal to be used as a special freighter terminal, in which all investments are made by AP Log. Utilization of this terminal is in line with the increase in freighter volume in 2020. This initiation will begin in the first quarter of 2020.

The increase in warehouse facilities at DPS was initiated through collaboration with a subsidiary of Garuda Indonesia, PT Aerojasa Perkasa (AJP), to provide Cold Storage. The provision of Cold Storage is needed to facilitate the high volume of perishable commodity transshipment through DPS terminal, especially from the Australian market. With this facility, AJP can also market the use of cold storage for airlines outside Garuda Indonesia Group as a source of revenue increase. The initiation of additional cold storage facilities with AJP will begin in the first quarter of 2020.

5. Construction of Kebon Sirih Office Building
Garuda Indonesia is currently conducting an analysis and joint study with potential investors from one of the BUMN Karya who are competent in the field of construction and investment. The analysis and study will produce a concept and design of a new building construction plan using the Build Operate Transfer (BOT) scheme on Jalan Kebon Sirih No. 46A, Jakarta Pusat (KS46A), in terms of financial, business, and commercial aspects. BUMN Karya is also entrusted to build BUMN Center Area, which consists of: Danareksa building, SOE Ministry building, and Telkom building, as well as includes KS46A building, where the four institutions will become one stretch with entrances and exits accessible from three directions, which are: from Jalan Medan Merdeka Selatan, from Jalan H. Agus Salim, and from Jalan Kebon Sirih.

Dengan dibangunnya gedung baru KS46A dalam Kawasan BUMN Center, Garuda Indonesia mendapatkan benefit berupa adanya kelebihan Koefisien Lantai Bangunan (KLB) sehingga gedung baru KS46A dapat dibangun maksimal sampai dengan 24 lantai. Akan berbeda halnya apabila Garuda Indonesia membangun gedung baru secara tersendiri maka maksimal ketinggian gedung hanya dapat dibangun sampai dengan 14 (empat belas) lantai saja.

Pembangunan gedung baru KS46A diperkirakan paling lambat akan dimulai pada kuartal II tahun 2020 dengan masa pembangunan maksimal selama dua tahun serta akan mulai dioperasikan secara bersama oleh pihak investor pada tahun 2022. Gedung baru KS46A direncanakan akan diprioritaskan pada fungsi-fungsi penjualan dan pelayanan kepada pelanggan Garuda Indonesia.

6. Freighter oleh Garuda/New Entity/Third Party
Potensi pengembangan kargo di negara kepulauan seperti Indonesia masih sangat besar. Hal ini ditunjukkan dengan permintaan dan *yield* yang tinggi untuk pengangkutan kargo di wilayah Indonesia Timur, namun di sisi lain belum dapat dipenuhi oleh maskapai penerbangan yang ada. Kondisi medan yang sulit dan fasilitas pendukung bandara yang terbatas merupakan risiko yang cukup besar bagi maskapai penerbangan yang akan melakukan operasional penerbangan disana.

Ditambah semakin meningkatnya transaksi *e-commerce* dari USD7 miliar pada tahun 2017 menjadi USD16 miliar pada tahun 2022, volume pergerakan barang akan semakin meningkat. Biaya logistik juga harus terus ditekan melalui terobosan operasional yang inovatif untuk memangkas rantai suplai demi menurunkan biaya tinggi.

Untuk menangkap peluang bisnis tersebut, Garuda Indonesia termasuk entitas anak akan membentuk entitas baru atau bekerja sama dengan pihak ketiga untuk menjalankan bisnis freighter dengan rute-rute potensial di Indonesia Timur dan Intra Asia. Kajian komprehensif lebih lanjut akan dibuat untuk memperhitungkan bentuk bisnis, jumlah pesawat, dan rute potensial yang akan diterbangi ke depannya.

Garuda Indonesia sebagai *flag carrier* memiliki misi untuk menghubungkan *nationwide* logistik di Indonesia dalam waktu 24 (dua puluh empat) jam dan mendukung Sistem Logistik Nasional (SISLOGNAS) melalui optimalisasi konektivitas antara pusat kegiatan ekonomi dan area yang tersebar luas di Indonesia.

With the construction of new KS46A building in the BUMN Center Area, Garuda Indonesia has benefited from an excess of Building Floor Coefficient (KLB) so that the new KS46A building can be built up to a maximum of 24 floors. It would be different if Garuda Indonesia builds a new building separately, the maximum height of the building could only be built up to 14 (fourteen) floors.

The construction of new KS46A building is expected to start at the latest in the second quarter of 2020 with a maximum construction period of two years and will begin its joint operation by investors in 2022. The new KS46A building is planned to be prioritized for sales and service functions for Garuda Indonesia customers.

6. Freighter by Garuda/New Entity/Third Party
The potential for cargo development in an archipelago such as Indonesia is still very large. This is indicated by the high demand and yield for cargo transportation in Eastern Indonesia, but on the other hand, it cannot be fulfilled by the existing airlines. Difficult terrain conditions and limited airport support facilities are a significant risk for airlines that will conduct flight operations there.

Plus the increasing e-commerce transactions from USD7 billion in 2017 to USD16 billion in 2022, the volume of movement of goods will increase. Logistics costs must also be kept down through innovative operational breakthroughs to cut supply chains to reduce high costs.

To capture this business opportunity, Garuda Indonesia, including its subsidiaries, will form a new entity or work with third party to run a freighter business with potential routes in Eastern Indonesia and Intra Asia. Further comprehensive study will be conducted to formulate the form of business, number of aircraft, and potential routes to be flown in the future.

Garuda Indonesia as a flag carrier has a mission to connect nationwide logistics in Indonesia within 24 (twenty-four) hours and support the National Logistics System (SISLOGNAS) through optimizing connectivity between centers of economic activity and the widespread areas in Indonesia.

7. Pengembangan Garuda Sentra Medika

Untuk pengembangan bisnis non aviasi, Garuda Indonesia berencana untuk memanfaatkan potensi yang ada di Garuda Sentra Medika (GSM), ke depannya GSM akan dilakukan kajian *spin off* dan berkembang menjadi entitas rumah sakit di bawah Garuda Indonesia Grup. Beberapa upaya lain yang akan dilakukan untuk mengembangkan bisnis GSM adalah:

- a. Melakukan *assessment/review* anggaran untuk pengadaan *medical check up* bagi seluruh pegawai darat Garuda Indonesia Grup (Garuda Indonesia, Citilink, GMF Aeroasia, Gapura Angkasa, Asyst, Sabre).
- b. Melakukan pendekatan kepada Kementerian Perhubungan untuk mengembalikan jasa *cockpit crew medex* Garuda Indonesia kepada GSM, mengingat keberadaan Kementerian Perhubungan sebagai regulator sekaligus sebagai penyedia layanan medex adalah tidak tepat dan tidak sesuai dengan regulasi penerbangan.
- c. Melakukan *review* atas alat-alat yang dibutuhkan untuk *medical check up* dan kebutuhan layanan kesehatan lainnya
- d. Pada tahun 2020 akan dilakukan pengembangan untuk Klinik Umum Rawat Inap. Potensi pendapatan yang akan diperoleh dari pengembangan usaha Garuda Sentra Medika diperkirakan mencapai Rp14,2 miliar serta tambahan dari efisiensi dari *medex cockpit crew* sebesar Rp 1,8 miliar.

8. Merpati Nusantara Airlines

Sinergi BUMN hadir untuk menghidupkan kembali Merpati Nusantara Airlines (MNA). Merpati Nusantara Airlines bersama dengan BUMN lainnya akan bersinergi dalam kerjasama pengangkutan kargo udara, *ground handling*, *warehousing*, dan kegiatan logistik lainnya. Kerjasama pengangkutan kargo udara ini akan dilakukan di Papua dengan tujuan untuk membantu pembangunan dan distribusi logistik nasional. Kerja sama ini mendapat dukungan dari Citilink sebagai bagian dari Garuda Indonesia Grup berupa dua pesawat *freighter* Boeing 737 Classic berkapasitas 12,5 Ton. Kedua pesawat tersebut dikonversi di Garuda Maintenance Facility (GMF) dari pesawat *passenger* menjadi *freighter*.

Potensi MNA di masa depan diharapkan dapat kembali menjadi maskapai perintis, penerbangan lintas batas dan maskapai angkutan kargo untuk menjadi jembatan udara dan turut serta dalam mempercepat pembangunan nasional. Turut mendukung industri penerbangan Indonesia dalam bidang Maintenance, Repair, Overhaul (MRO) melalui Merpati Maintenance Facility (MMF). Mendukung pengembangan SDM Indonesia melalui pelatihan tenaga ahli daya untuk penunjang kebutuhan operasional penerbangan di Merpati Training Center (MTC).

7. Development of Garuda Sentra Medika

In terms of development of non-aviation business, Garuda Indonesia plans to utilize the existing potential in Garuda Sentra Medika (GSM). In the future, GSM will conduct a spin off study and will be developed into a hospital entity under Garuda Indonesia Group. Some other efforts that will be made to develop GSM business are:

- a. Assessing/reviewing budget for procurement of medical check-ups for all Garuda Indonesia Group ground employees (Garuda Indonesia, Citilink, GMF Aeroasia, Gapura Angkasa, Asyst, Saber).
- b. Approaching the Ministry of Transportation to return Garuda Indonesia medex cockpit crew services to GSM, considering that the existence of Ministry of Transportation as a regulator and as a provider of medex services is inappropriate and not in accordance with aviation regulations.
- c. Reviewing the equipment needed for medical check-ups and other health care needs.
- d. In 2020, General Inpatient Clinic will be developed. The potential revenue to be obtained from developing Garuda Sentra Medika business is estimated to reach Rp14.2 billion and additional efficiency from medex cockpit crew of Rp1.8 billion.

8. Merpati Nusantara Airlines

SOE Synergy exists to revive Merpati Nusantara Airlines (MNA). Merpati Nusantara Airlines together with other SOEs will work in synergy in regard of air cargo transportation, ground handling, warehousing, and other logistics activities. This air cargo transportation cooperation will be conducted in Papua with the aim of assisting the development and distribution of national logistics. This cooperation has the support of Citilink as part of Garuda Indonesia Group in the form of two 12.5 Ton Boeing 737 Classic freighter aircrafts. These two aircrafts were converted at Garuda Maintenance Facility (GMF) from passenger aircraft to freighter.

MNA potential in the future is expected to be able to become a pioneer airline, cross border flight, and cargo transportation airline to become an air bridge and participate in accelerating national development. Also supporting the Indonesian aviation industry in the field of Maintenance, Repair, Overhaul (MRO) through Merpati Maintenance Facility (MMF). Supporting the development of Indonesian human resources through outsourcing training to support the flight operations needs at Merpati Training Center (MTC).

9. Pengembangan Garuda Ilmu Terapan Cakrawala (GITC) Industri penerbangan telah berkembang cukup pesat terutama di kawasan Asia Pasifik. Diprediksi bahwa selama 20 (dua puluh) tahun kedepan terjadi pertumbuhan lebih dari setengah total penumpang saat ini. Indonesia sendiri menjadi pasar penerbangan terbesar ke 10 (sepuluh) di dunia pada tahun 2017 dan diperkirakan akan menjadi peringkat ke 4 (empat) pada tahun 2030. Saat ini pertumbuhan ekonomi Indonesia diproyeksikan akan tetap di atas 5% dalam lima tahun ke depan. Pertumbuhan ini selaras dengan pertumbuhan konektivitas udara di Indonesia yang diprediksi akan meningkat sebesar 7% (Kemenhub, BPS, 2018). Akibat dari pertumbuhan ini, diperkirakan akan ada kekurangan ketersediaan pilot dan staf aviasi, kebutuhan akan pilot dan staf aviasi meningkat menjadi 230.000 orang di wilayah Asia Pasifik.

Melihat peluang yang ada, maka Garuda Indonesia telah membuat anak usaha Training Center yang mulai didirikan pada tahun 2019 dengan nama PT Garuda Ilmu Terapan Cakrawala (PT GITC). Anak usaha ini diharapkan mulai aktif pada awal tahun 2020 dengan kegiatan usaha yang dilakukan adalah pendidikan untuk *Aviation Operation (Pilot, Flight Attendant, Flight Operation Officer)*, *Aviation Maintenance (Maintenance and Engineering)*, *Aviation Business Support (Airline Commercial, Operation Support, Cargo, Airline Finance)*, dan/atau *Non Aviation (Hospitality, Management and Leadership, Marketing and Sales)*.

NEW BUSINESS OPPORTUNITY 2020

Sejalan dengan perkembangan eksternal dan internal bisnis Garuda Indonesia Grup, maka Garuda Indonesia dan entitas anak harus mampu dan tanggap dalam menangkap peluang untuk pengembangan bisnisnya. Berikut adalah beberapa peluang bisnis yang dapat dieksekusi di 2020 sebagai upaya peningkatan pendapatan Garuda Indonesia Grup:

1. Kerjasama Operasi (KSO) dengan Hotel di Jeddah Tingginya jumlah jamaah haji dan umrah yang menggunakan Garuda Indonesia yang berkisar 130.000 orang per tahun memberikan peluang untuk kerjasama dengan hotel di Jeddah. Peluang kerjasama tersebut memiliki pola kerjasama operasi sesuai kesepakatan bersama yang bertujuan untuk mencari keuntungan bersama.

Konsep nya sendiri berupa partnership kerjasama operasi dan produk ini akan ditangani oleh PT Aero Hotel Management (AHM). Dengan total kurang lebih Rp7 triliun untuk membangun sembilan tower, akan menggunakan konsep Condotel yaitu *condominium/apartment* dan Hotel. Dimana awalnya akan dijual

9. Development of Garuda Ilmu Terapan Cakrawala (GITC) The aviation industry has developed quite rapidly, especially in the Asia Pacific region. It is predicted that over the next 20 (twenty) years there will be more than half of the current total passenger growth. Indonesia itself becomes the 10th (tenth) largest airline market in the world in 2017 and is expected to rank the 4th (fourth) in 2030. Currently, Indonesia's economic growth is projected to remain above 5% in the next five years. This growth is in line with the growth of air connectivity in Indonesia, which is predicted to increase by 7% (Ministry of Transportation, Statistics Indonesia, 2018). As a result of this growth, it is estimated that there will be a shortage of pilots and aviation staff, the need for pilots and aviation staff will increase to 230,000 people in the Asia Pacific region.

Seeing the available opportunities, Garuda Indonesia has established a subsidiary of Training Center, which was established in 2019, under the name PT Garuda Ilmu Terapan Cakrawala (PT GITC). This subsidiary is expected to become active in early 2020 with business activities conducted are education for Aviation Operation (Pilot, Flight Attendant, Flight Operation Officer), Aviation Maintenance (Maintenance and Engineering), Aviation Business Support (Airline Commercial, Operation Support, Cargo , Airline Finance), and/or Non Aviation (Hospitality, Management and Leadership, Marketing and Sales).

NEW BUSINESS OPPORTUNITY IN 2020

In line with the external and internal development of Garuda Indonesia Group's business, Garuda Indonesia and its subsidiaries must be capable and responsive in capturing opportunities for business development. Below are some of the business opportunities that can be executed in 2020 in an effort to increase Garuda Indonesia Group revenue:

1. Joint Operation (KSO) with Hotels in Jeddah The high number of Hajj and Umrah pilgrims using Garuda Indonesia, which ranges around 130,000 people per year, provides opportunities for cooperation with hotels in Jeddah. The cooperation opportunity has a pattern of joint operations according to mutual agreement that aims to seek mutual benefit.

The concept itself is a joint operation partnership and this product will be handled by PT Aero Hotel Management (AHM). With a total of around Rp7 trillion to build nine towers, the Condotel concept will be used, which is condominium/apartment and hotel. Initially, it will be sold in advance (Pre Sale) for the condominiums

terlebih dahulu (*Pre Sale*) untuk kondominiumnya di Indonesia dengan *co-branding* Garuda Indonesia dan *partner*. Dari dana kondominium tersebut diharapkan dapat membangun tidak hanya *tower apartment* namun juga keseluruhan *tower*, dengan kolaborasi captive market dari Garuda Indonesia, hotel yang dibangun tersebut akan selalu terisi penuh dari *market* Indonesia.

Berlokasi di area Jabal Tsur sekitar 4 (empat) km dari Masjidil Haram, Mekah, proyek ini memiliki target *payback period* kurang lebih 5 (lima) tahun dan *Internal Rate of Return* (IRR) kurang lebih 54%, dimana Garuda Indonesia berkolaborasi dengan *zero investment* dan mengusung *investment model in-kind* yaitu penyerahan modal tidak dihitung dari *cash* namun berupa *operational rate investment* dari pengoperasian manajemen hotel selama kurang lebih 30 (tiga puluh) tahun. *Condotel* ini rencana akan dimulai *ground breaking* di tahun 2020 dan *launching* pada tahun 2024 dan beroperasi selama 30 (tiga puluh) tahun hingga 2054.

2. Mobile Food Court

Menurut *Intelligent Virtual Assistant* (IVA) bahwa pendapatan untuk *market vending machine* akan mencapai USD30 miliar pada tahun 2024. Oleh sebab itu, Aerofood ACS berencana akan membuat *vending machine* untuk produk-produk yang selama ini hanya dijual untuk *flight meals*. Saat ini Aerofood ACS memiliki kemampuan dalam pembuatan *frozen food*. Dimana produk ini digunakan oleh Garuda

Indonesia dalam penerbangan domestik maupun internasional. Pembuatan produk *vending machine* yang menjual makanan *flight meals* memiliki beberapa keunggulan, yaitu *cashless*, cepat, mudah dijangkau, tidak membutuhkan ongkos pengiriman, dapat disesuaikan dengan keinginan konsumen, menghemat waktu, dan higienis. Dari sisi perusahaan keunggulannya adalah investasi yang dibutuhkan kecil, biaya operasional kecil, ekspansi dapat dilakukan dengan cepat, dan produk dapat berpindah-pindah lokasi dengan mudah.

Untuk kedepannya, selain menjual produk ACS dapat juga bekerja sama dengan *business partner* untuk penyediaan makanan. Kemudian akan dilakukan proses *dishing, packing, frozen* dan *delivery* ke *vending machine* yang sudah tersedia. Saat ini, produk sedang dalam tahapan development dan pencarian *vending machine partners*. Dimana menurut perencanaan pada Februari 2020, akan dilakukan persiapan produksi, distribusi, dan regulasi. Sehingga pada April 2020,

in Indonesia with Garuda Indonesia co-branding and partners. The condominium funds are expected to be able to build not only apartment towers but also the entire towers, with the collaborative captive market of Garuda Indonesia, the hotel will always be fully occupied by the Indonesian market.

Located in Jabal Tsur area around 4 (four) km from the Haram Mosque, Mecca, this project has a payback period target of approximately 5 (five) years and an Internal Rate of Return (IRR) of approximately 54%, where Garuda Indonesia collaborates with zero investment and carries an in-kind investment model, which is the capital investment is not calculated from cash but from an operational investment rate from the operation of hotel management for approximately 30 (thirty) years. This Condotel plans to start ground breaking in 2020 and launch in 2024 and operate for 30 (thirty) years until 2054.

2. Mobile Food Court

According to the Intelligent Virtual Assistant (IVA), revenue for market vending machine will reach USD30 billion in 2024. Therefore, Aerofood ACS plans to make vending machines for products that have only been sold for flight meals. Currently, Aerofood ACS has the ability to manufacture frozen food. These products are used by Garuda

Indonesia in domestic and international flights. The manufacturing of vending machine products that sell food flight meals has several advantages, which are cashless, fast, easy to reach, does not require shipping costs, can be adjusted to consumer needs, save time, and hygienic. From the company side, the advantages are that the investment required is low, operating costs are low, expansion can be done quickly, and product locations can be moved easily.

In the future, besides selling ACS products, we can also work with business partners to provide food. Then the process of dishing, packing, frozen, and delivery to the vending machine will be carried out. At present, the product is in the stage of developing and searching vending machine partners. According to the plan, in February 2020 preparations for production, distribution, and regulation will be carried out. So that in April 2020, product launches will be conducted with

akan dilakukan *launching* produk dengan 10 (sepuluh) *vending machine* yang tersebar di area Jakarta. Serta pada Mei 2020, produk siap diperluas menjadi 50 (lima puluh) *vending machine*.

Dengan asumsi rata-rata harga produk adalah Rp25.000, rata-rata penjualan adalah 100 produk per hari untuk setiap *vending machine*, dan terdapat 50 (lima puluh) *vending machine*, maka diperkirakan program ini akan menghasilkan sebesar USD3 juta per tahun dengan *profit* sebesar 10%. Kemudian dengan opsi menyewa *vending machine*, maka diperkirakan bahwa *payback period* dapat diperoleh dalam empat bulan, dengan *Internal Rate of Return* (IRR) sebesar 289,1%.

3. Pengembangan Loyalty Boost Untuk Loyalty Program Garuda Indonesia akan melakukan *partnership* dengan beberapa perusahaan terkait dengan pengembangan *program loyalty* agar lebih menarik bagi anggota GarudaMiles. Dengan program yang lebih beragam dan menarik, Garuda Indonesia menargetkan memiliki 12 (dua belas) juta anggota pada akhir 2020.
4. Pembentukan Joint Venture (JV) Autonomous Aerial Vehicle /Drone

Mengingat masih banyak lokasi di Indonesia yang memiliki infrastruktur terbatas (khususnya di Indonesia Timur), angkutan kargo dapat dikembangkan dengan menggunakan *Autonomous Aerial Vehicle* (AAV). Keunggulan dari AAV adalah mampu melayani wilayah dengan fasilitas yang terbatas, dapat melayani angkutan kargo dengan volume yang tidak terlalu banyak, serta biaya yang lebih murah karena tidak menggunakan awak pesawat.

AAV akan menjadi *feeder* dari wilayah *remote/terpencil* namun memiliki potensi pasar dengan *yield* yang tinggi dan kargo tersebut selanjutnya akan diangkut ke hub yang lebih besar untuk diangkut ke tujuan internasional/domestik lainnya.

Karena saat ini regulasi untuk penerbangan komersial dengan menggunakan AAV belum tersedia, Garuda Indonesia bekerja sama dengan Direktorat Jenderal Perhubungan Udara untuk dapat mewujudkan regulasi tersebut. Program percobaan pengoperasian AAV di Indonesia Timur direncanakan pada akhir 2019 atau awal tahun 2020. Uji coba tersebut dimaksudkan bagi regulator dan operator untuk mempelajari karakteristik pengoperasian dan teknis dari AAV agar nantinya dapat beroperasi di Indonesia dengan aspek yang memenuhi standar dari sisi *safety* dan *airworthiness*-nya.

10 (ten) vending machines spread across Jakarta area, and in May 2020, the product is ready to be expanded to 50 (fifty) vending machines.

Assuming an average product price of Rp25,000, average sales is 100 products per day for each vending machine, and there are 50 (fifty) vending machines, it is estimated that this program will generate USD3 million per year with a profit of 10%. Then, with the option to rent a vending machine, it is estimated that the payback period can be obtained in four months, with an Internal Rate of Return (IRR) of 289.1%.

3. Development of Loyalty Boost for Loyalty Programs Garuda Indonesia will partner with several companies related to the development of a loyalty program to make it more attractive to GarudaMiles members. With a more diverse and interesting program, Garuda Indonesia targets to have 12 (twelve) million members by the end of 2020.

4. Establishment of Autonomous Aerial Vehicle/Drone Joint Venture (JV)

Considering that there are still many locations in Indonesia that have limited infrastructure (especially in Eastern Indonesia), cargo transportation can be developed using Autonomous Aerial Vehicles (AAV). The advantages of AAV are being able to serve areas with limited facilities, to serve cargo transportation with a volume that is not too much, and lower costs for not using flight crew.

AAV will be a feeder from remote/far areas but has a high-yield market potential and the cargo will then be transported to a larger hub to be transported to other international/domestic destinations.

Because currently regulations for commercial flights using AAV are not yet available, Garuda Indonesia cooperates with the Directorate General of Civil Aviation in order to realize these regulations. AAV operation trial program in Eastern Indonesia is planned at the end of 2019 or early 2020. The trial is intended for regulators and operators to study the operational and technical characteristics of AAV so that it can later operate in Indonesia with aspects that meet standards in terms of safety and airworthiness.

STRATEGI KE DEPAN

Strategi Garuda tahun 2020 dalam menangkap peluang dari prospek usaha diuraikan sebagai berikut.

QUICK WINS 2020

FUTURE STRATEGIES

Garuda's strategy in 2020 to capture opportunities from business prospects is described as follows.

QUICK WINS 2020

1

Corporate Culture Transformation through the Development of People, Process, and Technology.

2

Revenue Enhancement.

3

Redefine Cost Structure Based on Shared Service Organization.

1. Corporate Culture Transformation through the Development of People, Process, and Technology
Garuda Indonesia akan fokus kepada peningkatan kapabilitas dan kapasitas pegawai serta meningkatkan kepuasan kerja bagi para pegawai. Garuda Indonesia menjadikan pegawai sebagai pelanggan dan asset yang harus diutamakan. Dengan demikian diharapkan pegawai *happy* dan dengan sendirinya pegawai akan memberikan pelayanan terbaik kepada pelanggan.

Perputaran/rotasi pegawai lintas divisi pun terus dilakukan. Hal ini bertujuan untuk menciptakan rasa peduli dan mengerti akan *business process* secara keseluruhan. Garuda Indonesia memfasilitasi pegawai untuk dapat mengajukan perpindahan divisi dalam mencari tahu kapabilitas mereka. Pegawai Garuda Indonesia adalah keluarga besar termasuk pegawai tetap dan paruh waktu, karena seluruh pegawai adalah *One Family, One Nation and One Garuda Indonesia*.

Aviation Safety sebagai basis perubahan business process di segala lini telah dilakukan di 2018 dan berlanjut di 2019 dan 2020. Dengan *people/pegawai* yang *capable* dan *happy* akan membuat *business process* yang baik juga. Dan dengan *business process* yang baik akan membuat suatu standardisasi dan menghindari penurunan kualitas kerja *people/pegawai*.

1. Corporate Culture Transformation through the Development of People, Process, and Technology
Garuda Indonesia will focus on increasing employee capabilities and capacity, and increasing job satisfaction for employees. Garuda Indonesia makes employees as customers and assets that must be prioritized. Thus, it is expected that employees are happy and naturally, employees will provide the best service to customers.

The transfer/rotation of employees across divisions will continue. Thus aims to create a sense of caring and understanding of the overall business process. Garuda Indonesia facilitates employees to be able to propose division transfers in finding out their capabilities. Garuda Indonesia employees are large families including permanent and part-time employees, because all employees are *One Family, One Nation, and One Garuda Indonesia*.

Aviation Safety as a basis for changing business processes in all lines has been carried out since 2018 and continued in 2019 and 2020. Capable and happy people/employees will make a good business process as well. Furthermore, a good business process can certainly create a standardization and avoid reducing the quality of work of people/employees.

Kedua hal di atas (*people and process*) erat hubungannya dan interaksi keduanya harus cepat dan akurat, sehingga untuk proses transformasi tersebut diperlukan bantuan teknologi, berupa pengembangan dan penyediaan sistem yang dapat mempermudah pengambilan keputusan dan simplifikasi proses bisnis di internal Garuda Indonesia.

2. Revenue Enhancement

Peningkatan pendapatan dilakukan melalui perluasan pasar, perbaikan produk, perubahan cara berjualan, pelaksanaan *Business Integrated Logistic* (bukan hanya kargo), dan pengembangan bisnis yang berhubungan dengan dunia transportasi udara. Ke depannya, pegawai Garuda Indonesia dituntut untuk dapat mengeksekusi ide-ide baru yang muncul (*dare to change to initiate new things*).

3. Redefine Cost Structure Based On Shared Service Organisation

Memperbaiki struktur biaya melalui organisasi yang berbasis *shared service*, termasuk sentralisasi pengadaan, sehingga dapat meningkatkan kepuasan *internal customer* yang akhirnya berujung pada peningkatan kepuasan *external customer*.

SASARAN STRATEGIS MILESTONE 2020

Dengan tema tahun 2020 "Accelerate Growth Beyond Core" dan dengan melihat perkembangan serta kondisi Garuda Indonesia, maka Garuda Indonesia menetapkan untuk Milestones 2020 adalah *net profit* Garuda Group USD36,7 juta, *enhance business model for loyalty*, dan pengoperasian Garuda Indonesia freighter. Garuda Indonesia akan lebih berfokus terhadap *net profit* yang akan dihasilkan (*net profit oriented*). Kemudian Garuda Indonesia melihat potensi dari pengembangan business loyalty program. Di sisi lain, pengembangan Garuda Indonesia *Freighter* yang dilihat berpotensi dalam pengembangan bisnis Garuda Indonesia ke depan.

Milestone Garuda Indonesia 2020 akan menjadi dasar dalam pembentukan program-program yang akan dijalankan dengan deskripsi sebagai berikut:

1. Net Profit Garuda Group USD36,7 juta

Orientasi bisnis Garuda Indonesia Grup pada tahun 2020 adalah menghasilkan *net profit* sebesar USD36,7 juta. Target tersebut didukung oleh entitas anak dengan mengoptimalkan sinergi proses kerja dan menjalin kerjasama dengan *partner* lain yang dapat membawa tambahan *profit* bagi Garuda Indonesia Grup.

2. Enhance Business Model for Loyalty

Pengembangan *loyalty business* Garuda Indonesia dengan meningkatkan kualitas dan jumlah layanan yang disediakan agar dapat menambah jumlah member

The two matters above (people and process) are closely related and their interactions shall be fast and accurate, therefore, such transformation process needs technology assistance in the form of developing and providing systems that can facilitate decision making and simplifying the business process in Garuda Indonesia's internal environment.

2. Revenue Enhancement

The increase in revenue is done through market expansion, improving products, changing the way of selling, running Business Integrated Logistics (not just Cargo), and business development related to the air transportation world. In the future, Garuda Indonesia employees are required to be able to execute new emerging ideas (dare to change to initiate new things).

3. Redefine Cost Structure Based On Shared Service Organisation

Improving cost structure through shared-service based organizations, including centralized procurement, in order to increase customer internal satisfaction, which ultimately results in increased external customer satisfaction.

MILESTONE STRATEGIC TARGETS IN 2020

With the 2020 theme of "Accelerate Growth Beyond Core" and by looking at the development and conditions of Garuda Indonesia, Garuda Indonesia determined the Milestones 2020 to be Garuda Group net profit of USD36.7 million, enhance business model for loyalty, and operate Garuda Indonesia freighter. Garuda Indonesia will focus more on the net profit to be generated (net profit oriented). Then, Garuda Indonesia saw the potential of developing the business loyalty program. On the other hand, the development of Garuda Indonesia Freighter is seen as having the potential to develop Garuda Indonesia business in the future.

Garuda Indonesia Milestone 2020 will be the basis for the formation of programs to be carried out with the following description:

1. Garuda Group's Net Profit of USD36.7 million

Garuda Indonesia Group's business orientation in 2020 is to generate a net profit of USD36.7 million. The target is supported by subsidiaries by optimizing work process synergies and establishing partnerships with other partners that can bring additional profit to Garuda Indonesia Group.

2. Enhance Business Model for Loyalty

Development of Garuda Indonesia's loyalty business is by increasing the quality and number of services provided in order to increase the number of members

serta menambahkan *revenue*. Oleh sebab itu, Garuda Indonesia akan melakukan beberapa langkah strategis yaitu, membuat proses *redeem* lebih mudah dan dapat dilakukan dalam jaringan (*online*), memperbaiki *database*, mengoptimalkan *analytics support system*, dan bekerjasama dengan lebih banyak *partner* sehingga meningkatkan performa dari *customer experience (pre-journey, pre/in/post flight hingga post-journey)*. Bentuk kerjasama yang akan dilakukan adalah kerjasama dengan *partner* yang akan berinvestasi baik dalam bentuk permodalan, teknologi, bisnis, maupun sumber daya manusia yang handal.

3. Garuda Indonesia Freighter Operation

Pengembangan bisnis kargo dilakukan melihat industri yang dinilai memiliki *market* yang besar namun belum tercukupinya kapasitas jasa pengiriman udara. Oleh sebab itu, pengadaan freighter baik milik sendiri dan/ atau bekerja sama dengan pihak ketiga akan menjadi peluang yang baik dalam pengiriman kargo Garuda Indonesia. Di samping itu bisnis kargo dituntut dapat bersinergi dengan jasa logistik dan pergudangan di Indonesia agar lebih memberikan nilai tambah bagi pelanggan.

Strategi dan kebijakan Perseroan yang relevan dengan rencana kerja Garuda Indonesia 2020 adalah mengoptimalkan rute melalui konektivitas jaringan khususnya di rute internasional, serta dengan pemasaran dan penjualan yang lebih baik. Dari sisi pesawat, Garuda Indonesia akan mengoptimalkan biaya armada melalui negosiasi ulang kontrak pesawat dan mesin serta *seat reconfiguration*. Garuda Indonesia juga akan berfokus pada pengembangan *carter, freighter, cargo village, dan loyalty program*. Selain itu, sinergi Garuda Indonesia Grup harus semakin ditingkatkan terutama dalam hal rute dan pengembangan sumber daya. Garuda Indonesia juga dituntut untuk dapat bekerjasama dengan partnership yang potensial baik dalam industri aviasi maupun non aviasi. Salah satunya adalah dengan kerjasama dalam pengoperasian *Autonomous Aerial Vehicle (AAV)*.

Strategi Armada Garuda Indonesia dalam mendukung Milestone 2020 adalah sebagai berikut:

1. Memperpanjang Masa Sewa Beberapa Pesawat Boeing 737-800 NG dan Airbus 330-200

Akibat dari grounded 1 pesawat Boeing 737 Max dan penundaan delivery Boeing 737 Max di tahun 2020 akan terjadi kekurangan pesawat *narrow body*. Oleh sebab itu, Garuda Indonesia memperpanjang beberapa pesawat Boeing 737-800 NG yang sudah akan habis masa sewanya. Selain itu, Boeing 737-800 NG sedang banyak diminati dipasaran karena alasan

and increase revenue. Therefore, Garuda Indonesia will take a number of strategic steps, which are making redeem process easier and can be done online, repairing databases, optimizing analytics support system, and collaborating with more partners, in order to improve the performance of customer experience (pre-journey, pre/in/post flight to post-journey). The form of cooperation that will be carried out is cooperation with partners that will invest in the forms of capital, technology, business, and reliable human resources.

3. Garuda Indonesia Freighter Operation

The cargo business development is conducted by looking at industries which are considered to have a large market but have not yet fulfilled the capacity of air shipping services. Therefore, procuring a freighter, of your own or working with third parties, will be a good opportunity for Garuda Indonesia cargo shipments. In addition, the cargo business is required to be able to synergize with logistics and warehousing services in Indonesia in order to better provide added value for customers.

The Company's strategies and policies relevant to Garuda Indonesia 2020 work plan are optimizing routes through network connectivity, especially on international routes, with better marketing and sales. In terms of aircraft, Garuda Indonesia will optimize fleet costs through renegotiation of aircraft and engine contracts and seat reconfiguration. Garuda Indonesia will also focus on developing charter, freighter, cargo village, and loyalty program. In addition, the synergy of Garuda Indonesia Group must be further enhanced, especially in terms of route and resource development. Garuda Indonesia is also required to be able to cooperate with potential partnerships both in the aviation and non-aviation industries. One of them is through cooperation in the operation of Autonomous Aerial Vehicle (AAV).

Garuda Indonesia's Fleet Strategy in supporting Milestone 2020 is as follows:

1. Extend the Charter Period of some Boeing 737-800 NG and Airbus 330-200 aircrafts

As a result of grounded of 1 Boeing 737 Max and postponement of delivery of Boeing 737 Max in 2020, there will be a shortage of narrow body aircraft. Therefore, Garuda Indonesia extends several Boeing 737-800 NG aircrafts which will expire. In addition, Boeing 737-800 NG is in high demand in the market because of the same reason which is Boeing 737 Max

yang sama yaitu diberhentikannya pengoperasian Boeing 737 Max karena alasan *safety*. Kemudian dalam rangka menurunkan *fleet cost* armada Airbus 330-200 yang dioperasikan, Garuda Indonesia akan melakukan *lease extension* untuk beberapa pesawat Airbus 330-200 tersebut.

2. **Seat Reconfiguration Beberapa Jenis Pesawat**
Garuda Indonesia akan melakukan *seat reconfiguration* untuk beberapa jenis pesawat seperti Airbus 330-200 dan Boeing 777-300ER yang dimiliki. Dengan *seat reconfiguration* tersebut diharapkan Garuda Indonesia dapat memperoleh pendapatan yang lebih dari sebelumnya. Di samping itu, Garuda Indonesia memperpanjang masa sewa beberapa Airbus 330-200 guna memperpanjang masa pemanfaatan atas *seat reconfiguration* tersebut.
3. **Restrukturisasi untuk CRJ-1000**
Pada tahun 2019, Garuda Indonesia memiliki 18 (delapan belas) armada CRJ-1000. Namun dengan jumlah tersebut, Garuda Indonesia belum mendapatkan keuntungan dari tipe tersebut. Oleh sebab itu, Garuda Indonesia berusaha untuk melakukan restrukturisasi pesawat CRJ-1000 agar dapat mengurangi kerugian saat ini atau bahkan berpotensi memperoleh keuntungan.
4. **Lanjutan Pengalihan ATR 72-600 ke Citilink**
Proses pengalihan ATR 72-600 ke Citilink telah dilakukan sejak tahun 2019 dan akan dilanjutkan pada tahun 2020. Hal ini dilakukan karena model bisnis ATR 72-600 lebih cocok digunakan untuk low cost carrier yang saat ini dijalankan oleh Citilink sebagai entitas anak Garuda Indonesia.

Dari segi strategi rute Garuda Indonesia yang akan dilakukan adalah melakukan ekspansi di rute-rute yang memiliki potensi baik domestik maupun internasional. Untuk domestik, Garuda akan melakukan ekspansi di Sibisa, Sumatera Utara dengan rute KNO-SIW. Sedangkan untuk internasional, Garuda Indonesia akan melakukan ekspansi di Tiongkok yaitu Nanjing dan Hangzhou serta ke Turki yaitu Istanbul. Dalam rangka mendukung pariwisata Indonesia, Garuda Indonesia juga memiliki rute ke Labuan Bajo (LBJ) yaitu dari Jakarta (CGK) dan Denpasar (DPS).

Strategi Kargo Garuda Indonesia di tahun 2020 adalah pengembangan bisnis *Go-Freighter*, *Go-Logistic*, *Go-Express*, dan *Go-Excellent*. Garuda Indonesia akan menambah kapasitas dan peningkatan layanan dari segi komersial kargo pada tahun 2020, yaitu dengan cara penggunaan pesawat *freighter*, pengembangan *cargo*

was in ceased operation due to safety reasons. Then, in order to reduce the fleet cost of the operated Airbus 330-200 fleet, Garuda Indonesia will conduct lease extensions for some of the Airbus 330-200 aircrafts.

2. **Seat Reconfiguration of Several Types of Aircrafts**
Garuda Indonesia will conduct seat reconfiguration for several types of its aircrafts such as Airbus 330-200 and Boeing 777-300ER. By conducting seat reconfiguration, it is expected that Garuda Indonesia can earn more revenue than before. In addition, Garuda Indonesia extended the lease period for several Airbus 330-200 aircrafts in order to extend the utilization period for the seat reconfiguration.
3. **Restructuring for CRJ-1000**
In 2019, Garuda Indonesia had 18 (eighteen) CRJ-1000 fleets. However, with this number, Garuda Indonesia has not yet benefited from this type. Therefore, Garuda Indonesia is trying to restructure the CRJ-1000 aircrafts in order to reduce current losses or instead potentially gain profits.
4. **Continued Transfer of ATR 72-600 to Citilink**
The transfer process of ATR 72-600 to Citilink has been carried out since 2019 and will continue in 2020. The transfer is made because ATR 72-600 business model is more suitable for low cost carriers currently operated by Citilink as a subsidiary of Garuda Indonesia.

In terms of route strategy that will be carried out, Garuda Indonesia expands the potential routes both domestically and internationally. Domestically, Garuda will expand in Sibisa, North Sumatra by KNO-SIW route. Internationally, Garuda Indonesia will expand in China, which is Nanjing and Hangzhou, as well as Turkey, which is Istanbul. In order to support Indonesian tourism, Garuda Indonesia also has a route to Labuan Bajo (LBJ), from Jakarta (CGK) and Denpasar (DPS).

Garuda Indonesia's Cargo Strategy in 2020 is developing *Go-Freighter*, *Go-Logistics*, *Go-Express*, and *Go-Excellent* businesses. Garuda Indonesia will increase capacity and improve services in terms of commercial cargo in 2020 by using freighter aircraft, developing cargo villages (*Go Logistic Program*) in Cengkareng, Makassar, and Denpasar,

village (*Go Logistic Program*) di Cengkareng, Makassar dan Denpasar, pengintegrasian layanan *door to door*, dan pengembangan teknologi informasi di bidang logistik (aplikasi *online* untuk logistik, sistem operasi kargo, dan pengembangan layanan *drone*). Hal ini merupakan salah satu bentuk dari pengembangan ekosistem *digital*.

Di sisi layanan, Garuda Indonesia akan menggunakan *wireless In-flight Entertainment* (IFE) sebagai bagian peningkatan fasilitas layanan. *Wireless IFE* merupakan sistem yang memungkinkan penumpang untuk memperoleh hiburan dari perangkat *portabel* penumpang. Terjadi pendistribusian konten yang telah disediakan oleh Garuda Indonesia ke masing-masing perangkat penumpang. Selain itu, Garuda Indonesia akan memberikan sensasi baru kepada para penumpang dengan adanya *Virtual Reality* (VR) *on-board* pada beberapa penerbangan rute internasional.

INFORMASI KELANGSUNGAN USAHA

HAL-HAL YANG BERPOTENSI BERPENGARUH TERHADAP KELANGSUNGAN USAHA

Di tahun 2019, Garuda Indonesia Grup menghasilkan laba sebesar USD6,46 juta (2018: rugi USD 228.89 juta). Peningkatan profitabilitas dicapai terutama melalui perbaikan

1. Manajemen harga tiket
2. Program efisiensi biaya dan
3. Pengurangan frekuensi penerbangan

Strategi tersebut berdampak pada kenaikan *passenger yield*, penurunan rerata kursi tersedia per kilometer (ASK), kenaikan rerata faktor muat penumpang (SLF) dan penurunan biaya operasi.

Pada tanggal 31 Desember 2019, Garuda Indonesia Grup memiliki modal kerja negatif sebesar USD2,11 miliar (2018: USD 1,95 miliar). Modal kerja negatif terutama disebabkan oleh pinjaman jangka panjang Perseroan yang akan jatuh tempo di tahun 2020 dan pinjaman jangka panjang GMF diklasifikasikan sebagai liabilitas jangka pendek karena GMF tidak dapat memenuhi rasio keuangan tertentu yang disyaratkan oleh pemberi pinjaman. Selain itu, beberapa pinjaman Perusahaan yang jatuh tempo di tahun 2020 tidak memenuhi pembatasan keuangan.

Sebagai bagian dari usaha berkesinambungan untuk menghadapi dan mengelola kondisi di atas, Garuda Indonesia Grup mengambil langkah-langkah yang telah dan akan dilaksanakan secara berkelanjutan sebagai berikut:

1. Optimalisasi pendapatan penumpang berjadwal dari rute-rute tertentu dengan meningkatkan harga jual rata-rata dan optimalisasi produksi.
2. Menumbuhkan pendapatan kargo berjadwal dengan meningkatkan harga jual rata-rata serta fokus pada pasar yang lebih tinggi dan mengoptimalkan rute dengan pencapaian yang rendah.
3. Meningkatkan *revenue charter* yang berkelanjutan dengan membuat kerjasama kemitraan jangka panjang.
4. Meningkatkan arus kas dengan mengganti cadangan pemeliharaan dengan jaminan pembayaran (SBLC) dari pihak perbankan.
5. Secara aktif mencari alternatif pendanaan terkait utang dan pinjaman yang akan jatuh tempo.

BUSINESS CONTINUITY INFORMATION

MATTERS WITH POTENTIAL SIGNIFICANT IMPACT TO THE BUSINESS CONTINUITY

In 2019, Garuda Indonesia Group made a profit of USD6.46 million (2018: loss of USD 228.89 million). The increased profitability was achieved mainly through improvements of

1. Ticket price management;
2. Cost efficiency program; and
3. Reduction of flight frequency.

This strategy has an impact on increasing passenger yield, decreasing average available seats per kilometer (ASK), increasing average seat load factor (SLF), and reducing operating costs.

On December 31, 2019, Garuda Indonesia Group had a negative working capital of USD2.11 billion (2018: USD 1.95 billion). The negative working capital was mainly due to the Company's long-term loans that will mature in 2020 and GMF's long-term loans that are classified as short-term liabilities because GMF cannot meet certain financial ratios required by lenders. In addition, some of the Company's loans that mature in 2020 do not meet the financial restrictions.

As part of a continuing effort to deal with and manage the conditions above, Garuda Indonesia Group is taking the steps that have been and will be carried out in a sustainable manner as follows:

1. Optimizing scheduled passenger revenue from certain routes by increasing average selling prices and optimizing production.
2. Growing scheduled cargo revenue by increasing average selling prices, focusing on a higher market, and optimizing routes with low achievements.
3. Increasing sustainable charter revenue by entering long-term cooperative partnerships.
4. Increasing cash flow by replacing maintenance reserves with collateral payments (SBLC) from banks.
5. Actively looking for alternative funding related to debt and loans that will due.

6. Sinergi Garuda Indonesia Grup melalui keselarasan rute dan penetapan jadwal penerbangan yang disesuaikan dengan permintaan pasar.
7. Re-negosiasi kontrak pesawat dengan *lessor* untuk menurunkan biaya sewa pesawat.

Tantangan-tantangan berikut ini diluar kendali Garuda Indonesia Grup dan dapat memberikan dampak buruk terhadap kinerja keuangan dan kemampuan Grup dalam mempertahankan kelangsungan usahanya:

1. Kebijakan Pemerintah tentang Tarif Batas Atas dan Tarif Batas Bawah yang memengaruhi fleksibilitas Garuda Indonesia Grup dalam mengelola harga tiket untuk penerbangan domestik.
2. Volatilitas harga avtur yang memengaruhi arus kas dan beban operasional penerbangan.
3. Volatilitas kurs Rupiah terhadap USD yang memengaruhi arus kas operasional dan pendapatan usaha.
4. Persaingan ketat dalam penerbangan internasional
5. Epidemi COVID-19 yang berakibat masyarakat menghadapi pembatasan perjalanan untuk rute-rute penerbangan tertentu dan menghindari perjalanan yang tidak penting. Hal ini termasuk larangan sementara kunjungan keagamaan ke Arab Saudi.

Manajemen Garuda Indonesia Grup secara aktif memantau situasi di atas dan mengeksplorasi opsi-opsi berikut untuk mengantisipasi penurunan jumlah penumpang yang signifikan akibat dari epidemi COVID-19:

1. Penyesuaian kapasitas.
2. Diskon untuk rute-rute penerbangan tertentu.
3. Optimalisasi potensi untuk layanan kargo dan *charter*.
4. Koordinasi erat dengan Pemerintah.
5. Efisiensi biaya dan negosiasi ulang dengan *vendor-vendor* Garuda Indonesia Grup.

Kemampuan Garuda Indonesia Grup untuk mempertahankan kelangsungan usahanya dan menghadapi tantangan-tantangan eksternal di atas bergantung pada kemampuan Garuda Indonesia Grup untuk menghasilkan arus kas yang cukup untuk membayar liabilitas secara tepat waktu dan mematuhi persyaratan dan ketentuan perjanjian kredit, serta kemampuan Garuda Indonesia Grup memperbaiki operasi, kinerja, dan posisi keuangannya.

6. Synergizing Garuda Indonesia Group through route alignment and flight schedules that are adjusted to market demand.
7. Re-negotiating aircraft contracts with lessors to reduce aircraft rental costs.

The following challenges are outside the control of Garuda Indonesia Group and can have a negative impact on the Group's financial performance and ability to maintain its business continuity:

1. Government policies on Upper Limit and Lower Limit Tariffs that affect the flexibility of Garuda Indonesia Group in managing ticket prices for domestic flights.
2. Avtur price volatility that affects cash flow and flight operations expenses.
3. The volatility of Rupiah exchange rate against USD which affects operating cash flow and operating revenue.
4. Tight competition in international flights.
5. The COVID-19 epidemic resulted in people facing travel restrictions for certain flight routes and avoiding unnecessary trips. This includes a temporary ban on religious visits to Saudi Arabia.

The Management of Garuda Indonesia Group actively monitors the above situation and explores the following options to anticipate a significant reduction in the number of passengers due to the COVID-19 pandemic:

1. Capacity adjustment.
2. Discounts on certain flight routes.
3. Optimization of potential for cargo and charter services.
4. Close coordination with the Government.
5. Cost efficiency and renegotiation with Garuda Indonesia Group vendors.

The ability of Garuda Indonesia Group to maintain its business continuity and deal with external challenges above depends on the ability of Garuda Indonesia Group to generate sufficient cash flow to pay liabilities in a timely manner and comply with the terms and conditions of loan agreement, as well as the ability of Garuda Indonesia Group to improve operations, performance, and financial position.

Sepanjang tahun 2019, Perseroan tidak memiliki hal-hal yang berpotensi berpengaruh signifikan terhadap kelangsungan usahanya. Hal tersebut dapat dilihat dari pencapaian kinerja operasional dan finansial Perseroan yang optimal dan meningkat di tahun 2019. Perseroan yakin akan kelangsungan usahanya meski di tahun 2019 volatilitas harga komoditas terutama bahan bakar pesawat masih terjadi. Peningkatan harga bahan bakar ini sangat dipengaruhi cadangan minyak mentah dan kondisi perekonomian dunia. Sampai dengan akhir tahun 2019, Perseroan tidak memiliki hal-hal yang berpotensi berpengaruh signifikan terhadap kelangsungan usaha.

ASSESSMENT MANAJEMEN ATAS HAL-HAL YANG BERPENGARUH SIGNIFIKAN TERHADAP KELANGSUNGAN USAHA

Perseroan senantiasa melakukan evaluasi dan penilaian atas kemampuan Perseroan untuk melanjutkan kelangsungan usahanya dan berkeyakinan bahwa Perseroan memiliki sumber daya untuk melanjutkan usahanya di masa mendatang. *Assessment* dilakukan dengan berdasarkan berbagai faktor seperti analisis kekuatan kondisi keuangan maupun non keuangan serta pencapaian kinerja operasional dan finansial Perseroan. Berdasarkan hasil *assessment*, Manajemen Perseroan tidak melihat adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Perseroan untuk melanjutkan usahanya.

ASUMSI YANG DIGUNAKAN MANAJEMEN DALAM MELAKUKAN ASSESMENT

Asumsi yang mendasari manajemen dalam meyakini bahwa tidak terdapat hal-hal yang berpotensi berpengaruh signifikan terhadap kelangsungan usaha adalah sebagai berikut:

1. Kondisi perekonomian global, nasional dan industri perbankan, khususnya penerbangan.
2. Analisis *Strength Weakness Opportunity Threats* (SWOT) dalam menentukan posisi Garuda Indonesia pada industri penerbangan.

Throughout 2019, there were no issues that potentially affected the Company's business continuity significantly. This can be seen from the achievement of optimal and improved operational and financial performance of the Company in 2019. The Company is confident of its business continuity even though in 2019 the commodity price volatility, especially aircraft fuel, continued. The increase in fuel prices is greatly influenced by crude oil reserves and world economic conditions. Until the end of 2019, there were no issues that potentially affected the Company's business continuity significantly.

MANAGEMENT ASSESSMENT ON MATTERS WITH SIGNIFICANT IMPACT TO BUSINESS CONTINUITY

The Company always evaluates and assesses the Company's ability to continue its business sustainability and believes that the Company has the resources to continue its business in the future. The assessment is carried out based on various factors such as analysis of strength of financial and non-financial conditions and achievement of the Company's operational and financial performance. Based on the assessment results, the Company's Management does not see any material uncertainty that can cause significant doubts on the Company's ability to continue its business.

ASSUMPTION USED BY MANAGEMENT IN CONDUCTING ASSESSMENT

Assumptions underlying the Management in believing that there are no potential matters may significantly influence the business continuity are as follows:

1. Global and national economic conditions, and banking industries, especially airlines.
2. Strength Weakness Opportunity Threats (SWOT) analysis in determining Garuda Indonesia's position in the aviation industry.

TINGKAT KESEHATAN PERSEROAN

Dalam melaksanakan penilaian tingkat kesehatan Perseroan, Dewan Komisaris mempertimbangkan beberapa faktor yaitu aspek keuangan dan pasar, aspek fokus pelanggan, efektivitas produk dan proses, fokus tenaga kerja dan aspek kepemimpinan, tata kelola, dan tanggung jawab kemasyarakatan.

Dari aspek keuangan dan pasar, Perseroan telah berhasil meningkatkan pendapatan usaha tahun 2019 sebesar USD4,54 miliar, meningkat 4,84% dibandingkan dengan tahun 2018 sebesar USD4,33 miliar. Peningkatan pendapatan usaha tersebut kemudian diikuti dengan peningkatan laba tahun berjalan tahun 2019 yang mencapai USD6,46 juta, meningkat sebesar 102,82% dibandingkan tahun 2018 mengalami kerugian sebesar USD228,89 juta. Posisi keuangan pada tahun 2019, Perseroan telah berhasil meningkatkan aset dan ekuitas. Aset tahun 2019 mencapai USD4,46 miliar meningkat 7,22% dibandingkan tahun 2018 yang mencapai USD4,15 miliar. Ekuitas tahun 2019 mencapai USD720,62 juta, meningkat 12,63% dibandingkan tahun 2018 yang mencapai USD639,81 juta.

Dari aspek fokus pelanggan, meskipun pangsa pasar di Indonesia mengalami penurunan dibandingkan tahun 2018, namun Perseroan berhasil meningkatkan pangsa pasar domestik Group sebesar 3,22% dibanding tahun 2018. Pada tahun 2019, Garuda Indonesia domestik memiliki pangsa pasar sebesar 29,14% sedangkan Citilink sebesar 13,26% sehingga secara total Perseroan memiliki pangsa pasar domestik sebesar 42,40% peningkatan pangsa pasar domestik ini seiring dengan peningkatan kepuasan pelanggan terhadap pelayanan yang diberikan Perseroan secara Group.

Selain itu Garuda Indonesia juga mencapai *The Best on Time Performance (OTP)* sebagai *five star airline* dengan nilai OTP sebesar 91,6% tertinggi di dunia sesuai dengan penghargaan yang resmi diberikan oleh *Official Airline Guide Flight View* pada 27 Juni 2019.

Berdasarkan aspek efektivitas produk dan proses, *Cost per unit ASK (CASK)* sebesar 6,42 USc mengalami peningkatan sebesar 5,25% dibandingkan dengan tahun 2018 hal ini disebabkan oleh penyesuaian kapasitas produksi yang dilakukan Perseroan. Namun di sisi lain Perseroan dapat menutupi kenaikan biaya per unit dengan meningkatkan yield untuk menjaga profitabilitas perseroan dan melakukan efisiensi biaya operasional terutama dari biaya bahan bakar dan sewa pesawat.

COMPANY SOUNDNESS LEVEL

In assessing the Company's soundness level, the Board of Commissioners considers several factors, which are financial and market aspects, aspects of customer focus, product and process effectiveness, workforce focus, and aspects of leadership, governance, and social responsibility.

From the financial and market aspects, the Company succeeded in increasing operating revenues in 2019 by USD4.54 billion, an increase of 4.84% compared to that of 2018 of USD4.33 billion. The increase in operating revenue was then followed by an increase in income for the year 2019 which reached USD6.46 million, an increase of 102.82% compared to that of 2018, which suffered a loss of USD228.89 million. Financial position in 2019, the Company succeeded in increasing Assets and Equity. Asset in 2019 was USD4.46 billion, an increase of 7.22% compared to that of 2018 which was USD4 billion. Equity in 2019 reached USD720.62 million, an increase of 12.63% compared to that of 2018 which was USD639.81 million.

In 2019, Garuda Indonesia domestically had a market share of 29.14% while Citilink of 13.26%, thus in total, the Company had a domestic market share of 42.40%. Furthermore, Garuda Indonesia achieved the Best On Time Performance (OTP) as a five-star airline with OTP value of 91.6%, the highest in the world according to the official award given by the Official Airline Guide Flight View on June 27, 2019.

Based on aspects of product and process effectiveness, the Cost per unit of ASK (CASK) of USc 6.42 increased by 5.25% compared to that of 2018. This was due to the adjustment of production capacity performed by the Company. However on the other hand, the Company can cover the increase in unit costs by increasing yields to maintain the Company's profitability and perform operational cost efficiency, especially of fuel costs and aircraft rental.

Berdasarkan aspek fokus tenaga kerja, setelah 5 (lima) tahun berturut-turut Garuda Indonesia memperoleh penghargaan sebagai *The Best Cabin Crew*, pada tahun 2019 Garuda Indonesia masih mencapai kedua setelah Singapore Airlines.

BRIEF REPORT ON THE IMPLEMENTATION OF NOMINATION AND REMUNERATION COMMITTEE ACTIVITIES IN 2019

In 2019 there were no positions in either the Directors or the Board of Commissioners whose term of office expired, so there was no proposed replacement. However, in the aftermath of the temporary dismissal of some Directors by the Board of Commissioners, the Board of Commissioners uses its authority to make selections in accordance with applicable provisions for candidates for Directors from internal companies and submit proposals to the Series A Dwiwarna Shareholders according to the provisions in the Articles of Association.

As for the remuneration aspect, based on the decision of the Annual GMS on 24 April 2019, it was determined that the GMS gave the Board of Commissioners the power to determine the income of the Directors and the Board of Commissioners in 2019 after obtaining approval from the Dwiwarna Series A Shareholders. For this reason, after the Dwiwarna Series A Shareholders submitted approval for the earnings of the Board of Commissioners and Directors for 2019, the Board of Commissioners stipulated it in the Decree of the Board of Commissioners.

MANAJEMEN RISIKO

Industri penerbangan merupakan salah satu industri padat modal dan rentan terhadap faktor-faktor eksternal seperti kondisi makroekonomi, fluktuasi harga bahan bakar serta mata uang asing, dan tingkat kompetisi yang tinggi. Selain faktor eksternal, Perseroan juga menghadapi tantangan dari sisi internal khususnya dalam menjaga keamanan dan keselamatan operasional penerbangan, kemampuan organisasi untuk beradaptasi dengan perubahan kondisi eksternal dan pengelolaan keuangan.

Adanya karakteristik tersebut menunjukkan bahwa Perseroan membutuhkan manajemen risiko yang sistematis untuk mengidentifikasi, menilai dan mengelola risiko. Dengan adanya implementasi manajemen risiko di setiap bagian Perseroan, maka diharapkan risiko-risiko dapat dikelola dan dikendalikan secara efektif dan efisien agar tidak mengganggu dalam pencapaian kinerja dan target Perseroan.

SISTEM MANAJEMEN RISIKO

Proses ERM adalah pendekatan sistematis untuk mengelola risiko di Perseroan. Proses ERM memungkinkan perusahaan untuk mengidentifikasi risiko dari setiap Unit Kerja. Selain itu, proses ERM memungkinkan Perseroan untuk mengidentifikasi risiko yang terdapat di dalam bisnis strategisnya. Ini memungkinkan ERM untuk menyelaraskan risiko yang diidentifikasi dari pendekatan *bottom-up* dan *top-down*.

Proses ERM harus membantu Garuda Indonesia untuk mengelola ketidakpastian, oleh karena itu Garuda Indonesia bisa lebih efektif dalam meminimalkan ancaman dan memaksimalkan tujuan bisnis Garuda Indonesia.

Sebelum melakukan proses ERM, Unit ERM Garuda Indonesia bersama dengan Unit lainnya harus menyusun *Risk Assessment Criteria Matrix* (RACM) yang akan digunakan untuk proses penilaian risiko. Proses pengembangan RACM harus dipisahkan dari proses ERM karena RACM hanya akan diperbarui jika dianggap perlu sementara proses ERM harus dilakukan setiap tahun.

Proses ERM yang konsisten akan membantu Garuda Indonesia untuk:

1. Identifikasi semua risiko yang ada di Garuda Indonesia;
2. Menilai dan memprioritaskan risiko signifikan yang dapat menghambat tujuan strategis Garuda Indonesia;
3. Mengatasi risiko signifikan dengan cara yang efektif dan efisien;
4. Memantau risiko dan kegiatan manajemen risiko yang relevan secara berkelanjutan.

OTHER SERVICES THAT ACCOUNTANT IS PROVIDED

In 2019, the Accountant will not provide other services other than auditing the Consolidated Financial Statements for the Company.

RISK MANAGEMENT

The aviation industry is one of the capital-intensive industries and is vulnerable to external factors such as macroeconomic conditions, fluctuations in fuel prices and foreign currencies, and high levels of competition. In addition to external factors, the company also faces internal challenges, especially in maintaining the security and safety of aviation operations, the organization's ability to adapt to changing external conditions and financial management.

The existence of these characteristics shows that companies need systematic risk management to identify, assess and manage risk. With the implementation of risk management in every part of the company, it is expected that risks can be managed and controlled effectively and efficiently so as not to interfere in achieving the company's performance and targets.

RISK MANAGEMENT SYSTEM

The ERM process is a systematic approach to managing risk in the Company. The ERM process allows companies to identify risks from each Work Unit. In addition, the ERM process allows the Company to identify the risks inherent in its strategic business. This allows ERM to align the risks identified from the bottom-up and top-down approaches.

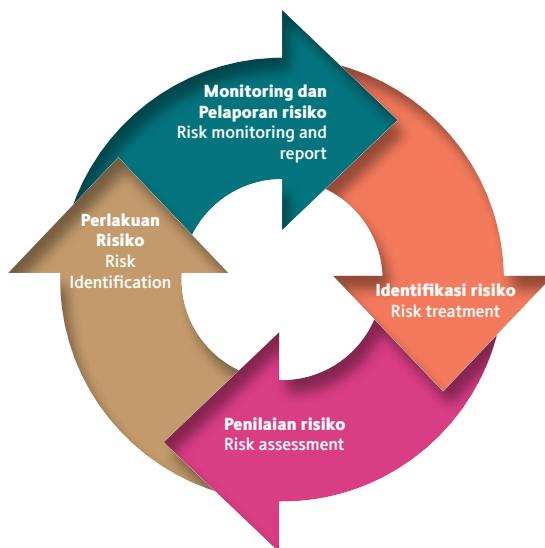

The ERM process must help Garuda Indonesia manage uncertainty, therefore Garuda Indonesia can be more effective in minimizing threats and maximizing Garuda Indonesia's business objectives.

Before conducting the ERM process, the Garuda Indonesia ERM Unit together with other Units must prepare a Risk Assessment Criteria Matrix (RACM) which will be used for the risk assessment process. The RACM development process must be separated from the ERM process because the RACM will only be updated if deemed necessary while the ERM process must be carried out annually.

The consistent ERM process will help Garuda Indonesia to:

1. Identification of all risks that exist in Garuda Indonesia;
2. Assessing and prioritizing significant risks that could hamper Garuda Indonesia's strategic objectives;
3. Overcome significant risks in an effective and efficient manner;
4. Monitor risk and relevant risk management activities on an ongoing basis.

Proses ERM di Garuda Indonesia terdiri dari empat langkah utama:

Empat langkah utama tersebut dapat dibagi menjadi dua proses utama yaitu:

1. Proses Penilaian Risiko Perseroan (ERA) mengidentifikasi dan menilai risiko yang mungkin menghambat Tujuan Bisnis Garuda Indonesia.

Identifikasi risiko adalah proses untuk mengidentifikasi risiko atau “apa yang bisa salah” seperti potensi ancaman suatu peristiwa atau tindakan yang akan berdampak buruk bagi Garuda Indonesia dalam mencapai strategi dan tujuannya.

Identifikasi risiko di Garuda Indonesia dapat dilakukan melalui:

- **Identifikasi risiko bisnis strategis:** Identifikasi risiko dilakukan selama pengembangan program strategis, untuk mengenali potensi risiko strategis yang mungkin timbul dan menghambat program strategis Garuda Indonesia. Identifikasi risiko bisnis strategis pada program strategis dapat memberikan rekomendasi untuk membantu manajemen Garuda Indonesia dalam menyetujui program strategis (“go” atau “no-go”).
- **Routine risk identification:** Risk identification is conducted during the annual planning cycle (during development of Corporate Long Term Planning (Rencana Jangka Panjang Perusahaan (RJPP) and/or Annual Operational Planning (Rencana Kerja dan Anggaran Perusahaan (RKAP)).

Proses penilaian risiko akan menghasilkan tingkat eksposur risiko dari setiap risiko yang diidentifikasi

The ERM process at Garuda Indonesia consists of four main steps:

The four main steps can be divided into two main processes, namely:

1. The Company Risk Assessment Process (ERA) identifies and assesses risks that might hamper Garuda Indonesia Business Goals.

Risk identification is the process of identifying risks or “what could be wrong” such as the potential threat of an event or action that will adversely affect Garuda Indonesia in achieving its strategies and objectives.

Risk identification in Garuda Indonesia can be done through:

- **Identification of strategic business risks:** Risk identification is carried out during the development of strategic programs, to identify potential strategic risks that may arise and hinder Garuda Indonesia’s strategic programs. Identifying strategic business risks in strategic programs can provide recommendations to assist Garuda Indonesia management in approving strategic programs (“go” or “no-go”).
- **Routine risk identification:** Risk identification is carried out during the annual planning cycle (during the development of Corporate Long Term Planning (RJPP) and / or Annual Operational Planning (RKAP)).

The risk assessment process will produce risk exposure levels for each identified risk (ie impact x likelihood) which will

(yaitu dampak x kemungkinan) yang akan diplot pada peta risiko dan digunakan sebagai dasar bagi Garuda Indonesia dalam memprioritaskan risiko.

2. Perlakuan dan Pemantauan Risiko (memperlakukan dan memantau risiko signifikan yang diidentifikasi dalam Proses ERA).

Proses perlakuan risiko akan memastikan bahwa risiko telah ditangani oleh pemilik risiko dan hasil perlakuan konsisten dengan kapasitas risiko Garuda Indonesia, *appetite* risiko, dan toleransi risiko. Proses pemantauan risiko akan membentuk mekanisme pelaporan risiko kepada manajemen senior dan Direksi sehingga risiko yang signifikan (risiko yang terus berulang dan insidental) dapat secara memadai dan tepat waktu dipantau dan ditangani.

Untuk membantu Unit ERM dalam mengembangkan statistik risiko, risiko yang diidentifikasi dikategorikan ke dalam lima (5) kategori risiko utama, adalah sebagai berikut:

- Risiko Keuangan
Risiko yang terkait dengan kondisi keuangan Perseroan, biasanya dikategorikan lebih lanjut ke dalam risiko pasar, risiko likuiditas, dan risiko rekanan.
- Risiko Strategis
Risiko yang terkait dengan pelanggan, pesaing dan investor dan secara fundamental melemahkan posisi kompetitif Perseroan.
- Risiko Kepatuhan
Risiko kerugian akibat pelanggaran atau ketidaksesuaian dengan aturan, hukum, dan peraturan eksternal dan/atau internal.
- Risiko Operasional
Risiko kehilangan karena kegagalan kebijakan, proses, sistem, orang dan karena peristiwa eksternal lainnya.
- Risiko Keselamatan dan Keamanan
Risiko kerugian karena pelanggaran infrastruktur / sistem keselamatan dan keamanan (mis. Pelanggaran kebijakan, pelanggaran pengukuran keselamatan dan keamanan).

Untuk membantu Pemilik Risiko memitigasi risiko yang diidentifikasi secara lebih efektif, penyebab risiko harus dikategorikan. Penyebab risiko sering dikategorikan ke dalam lima (5) kategori berikut:

- Tenaga kerja, ini adalah penyebab risiko yang timbul dari faktor internal yang berkaitan dengan sumber daya manusia, beberapa contoh adalah:
 - Kurangnya jumlah karyawan;
 - Kurangnya kemampuan karyawan;
 - Pengembangan karyawan yang tidak memadai;

be plotted on the risk map and used as a basis for Garuda Indonesia in prioritizing risks.

2. Risk Treatment and Monitoring (treating and monitoring significant risks identified in the ERA Process).

The risk treatment process will ensure that the risk has been handled by the risk owner and the results of the treatment are consistent with Garuda Indonesia's risk capacity, risk appetite, and risk tolerance. The risk monitoring process will establish a risk reporting mechanism to senior management and the Board of Directors so that significant risks (risks that continue to be recurrent and incidental) can be adequately monitored and dealt with in a timely manner.

To assist the ERM Unit in developing risk statistics, the identified risks are categorized into five (5) main risk categories, as follows:

- Financial Risk**
Risks related to a company's financial condition are usually further categorized into market risk, liquidity risk and partner risk.
- Strategic Risk**
The risks are related to customers, competitors and investors and fundamentally weakens the company's competitive position.
- Compliance Risk**
Risk of loss due to violations or non-compliance with external and / or internal rules, laws and regulations.
- Operational Risk**
Risk of loss due to failure of policies, processes, systems, people and due to other external events.
- Safety and Security Risks**
Risk of loss due to violations of infrastructure / safety and security systems (eg policy violations, violations of safety and security measures).

To help Risk Owners mitigate identified risks more effectively, the causes of risks must be categorized. Causes of risk are often categorized into the following five (5) categories:

- Labor, this is the cause of risks arising from internal factors related to human resources, some examples are:
 - Lack of employees;
 - Lack of employee ability;
 - Inadequate employee development;

- Pelanggaran etika karyawan (mis. Penipuan, ketidakpatuhan terhadap kode etik Perseroan), dll.
- b. Bahan/bahan baku, bahan habis pakai atau informasi, ini adalah penyebab risiko yang timbul dari kualitas bahan baku (berwujud atau tidak berwujud), beberapa contoh adalah:
 - Jumlah inventaris penerbangan yang tidak mencukupi;
 - Kekurangan bahan baku, dll.
- c. Metode/kebijakan, proses dan prosedur, ini adalah penyebab risiko yang timbul dari faktor internal sehubungan dengan kebijakan, prosedur, dan proses Perseroan, beberapa contohnya adalah:
 - Kurangnya koordinasi antar personel;
 - Tidak jelas atau tidak adanya kebijakan dan prosedur formal;
 - Proses tidak mematuhi kebijakan dan prosedur yang ditetapkan;
 - Pemisahan tugas yang tidak jelas dan proses birokrasi yang panjang;
 - Kurangnya pengawasan / kontrol, dll.
- d. Mesin/sistem dan teknologi, ini adalah penyebab risiko yang timbul dari faktor internal sehubungan dengan adopsi/penerapan teknologi, beberapa contoh adalah:
 - Sistem dan teknologi pendukung yang ketinggalan zaman.
 - Kurangnya perencanaan darurat jika terjadi gangguan sistem.
 - Kegagalan peralatan, dll.
- e. Bencana alam/peristiwa eksternal. ini adalah penyebab risiko yang timbul dari faktor eksternal, beberapa contoh adalah:
 - Bencana alam (mis. Gempa bumi, banjir, kebakaran, dll.);
 - Kekurangan pasokan bahan bakar;
 - Demonstrasi dari pihak luar;
 - Perubahan peraturan pemerintah;
 - Faktor ekonomi global (mis. Nilai tukar mata uang asing atau suku bunga).

Berbagai opsi umum dalam perawatan risiko/Rencana Tindakan meliputi:

Perlakuan Risiko

- Menerima Risiko
Mempertahankan risiko pada level saat ini dengan tidak mengambil tindakan lebih lanjut. Opsi ini biasanya dipilih untuk risiko tertentu yang dianggap tidak signifikan atau memiliki signifikansi rendah bagi Perseroan.
- Memindahkan Risiko
Menyerahkan/mengalihkan risiko ke pihak ketiga yang independen (misal Perusahaan asuransi) dengan biaya ekonomi yang wajar berdasarkan pengaturan yang dapat ditegakkan secara hukum.

Risk Treatment

- Accept Risk
Maintain risk at the current level by not taking further action. This option is usually chosen for certain risks that are considered insignificant or have low significance for the company.
- Transfer of Risk
Transfer / transfer risk to an independent third party (eg insurance company) at a reasonable economic cost based on legally enforceable arrangements.

- Menghindari Risiko
Menghindari eksposur terhadap peristiwa risiko yang mungkin terjadi di masa depan. Opsi ini dapat dipilih untuk risiko dengan tingkat risiko keseluruhan yang tidak dapat ditoleransi atau diterima oleh Perseroan karena akan memiliki dampak signifikan.
- Mengurangi Risiko
Strategi untuk mengambil tindakan yang dapat menurunkan risiko ke tingkat yang dapat diterima dengan berfokus pada pengurangan kemungkinan dan tingkat dampak (misal Mengurangi risiko saat ini dengan menerapkan kontrol tambahan atau meningkatkan kontrol dan/atau proses yang ada).

Mekanisme pengelolaan risiko menggunakan ERM proses dilakukan secara rutin dan berkelanjutan. Keseluruhan proses tersebut juga terintegrasi dengan *corporate strategy* dan dilakukan baik melalui pendekatan *top-down* maupun *bottom-up* serta dilakukan oleh seluruh anak perusahaan yang dimiliki. Hal tersebut untuk memastikan bahwa seluruh potensi risiko yang dapat menghambat pencapaian kinerja dan target Perseroan telah teridentifikasi, dinilai dan ditangani dengan baik.

Hasil dari ERM proses berupa *Corporate Risk Profile* (CRP). Secara rutin Perseroan melakukan pemantauan terhadap *Corporate Risk Profile* (CRP) dan melaporkannya kepada *stakeholders* perusahaan.

PROFIL RISIKO DAN UPAYA PENGELOLAANNYA

Besarnya peluang ketidakpastian yang mungkin dihadapi oleh Perseroan telah mendorong manajemen untuk melakukan upaya pengelolaan dan pengendalian atas risiko-risiko utama yang telah diidentifikasi sepanjang tahun 2019, diantaranya sebagai berikut:

1. **Tekanan dalam menghadapi faktor ekonomi**
Dalam industri penerbangan, faktor makroekonomi mempengaruhi produksi dan berdampak pada keuangan Perseroan. Faktor ekonomi tersebut berupa fluktuasi harga bahan bakar pesawat, fluktuasi nilai tukar rupiah dan kenaikan suku bunga pinjaman. Pergerakan pada tiga faktor tersebut diluar kendali Perseroan dan sangat dipengaruhi oleh isu geopolitik serta penawaran dan permintaan. Dampak keuangan yang terjadi cukup signifikan mengingat kontribusi biaya *fuel* yang cukup besar. Mayoritas penerimaan Perseroan diperoleh dalam mata uang rupiah sedangkan pengeluaran Perseroan menggunakan mata uang asing.
Dengan penuh prinsip kehati-hatian Perseroan telah melakukan pengelolaan risiko melalui mekanisme lindung nilai (*hedging*) terhadap *bahan bakar pesawat* dan pergerakan perubahan mata uang asing.

- Avoiding Risk
Avoiding exposure to risk events that may occur in the future. This option can be chosen for risks with an overall risk level that cannot be tolerated or accepted by the company because it will have a significant impact.
- Reducing Risk
Strategies for taking actions that can reduce risk to an acceptable level by focusing on reducing the likelihood and level of impact (e.g. Reducing current risks by implementing additional controls or improving existing controls and / or processes).

The risk management mechanism using ERM processes is carried out routinely and continuously. The entire process is also integrated with the corporate strategy and is carried out through both a top-down and bottom-up approach and is carried out by all of its subsidiaries. This is to ensure that all potential risks that can hinder the achievement of performance and company targets have been identified, assessed and handled properly.

The results of the ERM process are in the form of a Corporate Risk Profile (CRP). The company routinely monitors the Corporate Risk Profile (CRP) and reports it to the company's stakeholders.

RISK PROFILES AND THE MANAGEMENT EFFORTS

The large uncertainty opportunities that may be faced by the company has encouraged management to make efforts to manage and control the main risks that have been identified during 2019, including the following:

1. **Pressure in dealing with economic factors**
In the aviation industry, macroeconomic factors affect production and impact on corporate finance. These economic factors are in the form of fluctuations in aircraft fuel prices, fluctuations in the rupiah exchange rate and an increase in lending rates. Movements on these three factors are beyond the control of the company and are strongly influenced by geopolitical issues and supply and demand. The financial impact that occurred was quite significant considering the significant contribution of fuel costs. The majority of company revenues are obtained in rupiah while corporate expenses are in foreign currencies.
With full prudential principles, the company has carried out risk management through a hedging mechanism against aircraft fuel and changes in foreign currency movements.

2. Tingginya tingkat persaingan

Peningkatan kapasitas hingga tahun 2025 di area Asia Pasifik menjadikan tekanan tersendiri bagi Perseroan untuk berkompetisi dengan kompetitor lainnya. Pengelolaan kapasitas yang kurang tepat akan berpengaruh terhadap biaya produksi. Kondisi tersebut akan bertambah berat apabila tidak diimbangi dengan produksi yang sesuai dengan kebutuhan pasar sehingga memberikan tambahan tekanan kepada pendapatan Perseroan. Untuk meminimalisir dampak dari risiko tersebut Perseroan secara komprehensif melakukan perencanaan produksi yang didasarkan kepada kebutuhan pasar, melakukan evaluasi secara periodik untuk produksi yang sedang berjalan serta melakukan restrukturisasi *rute-rute* yang ada.

3. Tantangan dalam pemenuhan *crew strength*

Standar kualifikasi *crew* yang dimiliki perusahaan serta peningkatan jumlah armada menjadi suatu tantangan dalam melakukan perencanaan pemenuhan *crew strength*. Namun, dengan jumlah armada yang saat ini dimiliki Perseroan tidak mengalami perubahan dibandingkan dengan tahun sebelumnya sehingga tidak berdampak signifikan terhadap pemenuhan *crew strength* yang ada. Perseroan saat ini fokus terhadap pengembangan kualitas dan utilisasi *crew* yang ada.

4. Tingginya tekanan likuiditas

Tidak tercapainya target perencanaan terkait dengan arus kas masuk dan arus kas keluar dapat mengakibatkan adanya gangguan terhadap pembiayaan kegiatan operasional Perseroan. Hal tersebut bisa disebabkan oleh penjualan yang tidak mencapai target, adanya pengeluaran signifikan yang tidak direncanakan. Kondisi tersebut juga dapat menghambat pemenuhan pembayaran kepada pihak ketiga. Adapun Perseroan melakukan inisiatif-inisiatif yang dapat menghasilkan efisiensi baik dari sisi operasional maupun dari sisi lainnya.

EVALUASI PELAKSANAAN MANAJEMEN RISIKO

Untuk mendukung pencapaian tujuan Perseroan melalui implementasi ERM yang semakin baik ke depan, dilakukan evaluasi atas implementasi ERM di setiap tahunnya. Evaluasi tersebut mencakup beberapa area, yaitu *governance and organization, risk management strategy, risk management activity, reporting and communication, tools and technology* serta *culture and capabilities*. Hasil dari evaluasi tersebut berupa nilai yang disebut dengan *Enterprise Risk Management (ERM) Maturity*. Perbaikan dari area tersebut diharapkan dapat meningkatkan tingkat maturitas implementasi manajemen risiko. Hasil evaluasi atas *Enterprise Risk Management (ERM) Maturity* 2019

2. High level of competition

Increased capacity until 2025 in the Asia Pacific area puts pressure on the company to compete with other competitors. Improper capacity management will affect production costs. This condition will get worse if it is not matched with production that is in accordance with market needs, thus giving additional pressure to the company's revenue. To minimize the impact of these risks, the company comprehensively carries out production planning based on market needs, conducts periodic evaluations of ongoing production and restructures existing routes.

3. Challenges in fulfilling crew strength

Crew qualification standards owned by the company and increasing the number of fleets is a challenge in planning crew fulfillment. However, the number of fleets currently owned by the company has not changed compared to the previous year so it does not have a significant impact on the fulfillment of existing crew strength. The company is currently focused on developing the quality and utilization of existing crews.

4. High liquidity pressure

Failure to achieve planning targets related to cash inflows and outflows can result in disruption to the financing of the company's operational activities. This can be caused by sales that do not reach the target, there are significant unplanned expenses. This condition can also hamper the fulfillment of payments to third parties. The company is carrying out initiatives that can produce efficiencies both from the operational and other sides.

EVALUATION OF IMPLEMENTATION OF RISK MANAGEMENT

To support the achievement of the Company's goals through the better implementation of ERM going forward, an evaluation of ERM implementation is carried out every year. The evaluation covers several areas, namely governance and organization, risk management strategy, risk management activities, reporting and communication, tools and technology as well as culture and capabilities. The results of the evaluation in the form of a value called Enterprise Risk Management (ERM) Maturity. The improvement in these areas is expected to increase the maturity level of risk management implementation. The results of the 2019 Enterprise Risk Management (ERM) Maturity evaluation are

1.	On December 17, 2007, the Company received a Notice to Furnish Information and Produce Documents from the Australian Competition and Commerce Commission (“ACCC”) together with other international airlines in setting Fuel Surcharge for Cargo.	The legal process of this case in the Federal Court of New South Wales, Australia, began from October 22, 2012 to May 15, 2013 with various agendas including revision of claims from the ACCC, defense of the Company, and collection of evidence and witnesses. The last session was held on 15 May 2013 with the conclusion of each party as an agenda. In the final session, the Company submitted its defense based on the provisions in Aviation Law, International Treaty Law through the Air Service Agreement (ASA) and International Competition Law related to the relevant market. On October 31, 2014, the Federal Court of NSW Australia issued a case ruling, which stated the ACCC's lawsuit against the Company was rejected. In response to the decision, the ACCC appealed to the Full Court Australia court on 16 December 2014. On March 21 2016, Full Court Australia handed down a decision granting the ACCC appeal, so that the Company and Air New Zealand were found guilty of alleged price fixing jointly with other airlines. The decision of the Full Court has not been legally enforceable, and the Company has exercised its right to submit an appeal to the High Court of Australia on 13 May 2016. On 14 June 2017, the High Court of Australia issued a ruling that granted the ACCC's claim and rejected the Company's cassation argument. As a result, the Company and Air New Zealand have been found guilty of alleged price fixing conducted with other airlines. As for the amount of the fine, it will be determined by the Australian Federal Court in the trial process. On 30 May 2019 the Federal Court of Australia issued a fine which sentenced the Company to pay AUD 19,000,000 to the Australian Government and pay the legal costs incurred by the ACCC. On June 26, 2019, the Company's Lawyers filed an appeal against the Federal Court of Australia's Decision. The company has submitted a postponement of the execution of the decision and currently has not carried out the implementation of the Decision because the Decision is still in the process of appeal. On September 26, 2019 the ACCC filed a stay of appeal to the Federal Court for an appeal that had been submitted by Garuda on June 26, 2019 and the Court had not yet scheduled a trial schedule. The company has also coordinated with the Indonesian Ministry of Foreign Affairs and the Ministry of SOEs, in handling this case. This issue has also been discussed directly by the President of Indonesia with the Prime Minister of Australia at the G20 event in Japan		Financially significant which has the potential to influence the Company's finance and Company's brand image.

The gratification control program is a program initiative in the framework of implementing corporate values, especially honesty and integrity values as well as the implementation of the principles of Good Corporate Governance, especially the principles of transparency, responsibility and independence.

The Company's gratification control policy is that every Garuda Indonesia employee is not permitted to accept gratuities and must make a report (*disclose*) to the company in the event that gratuity is inevitable because it is faced with conditions that are difficult to refuse.

The Company has issued provisions regarding gratification control as regulated in Decree of the President Director No. JKTDZ / SKEP / 50001/13 dated January 9, 2013 concerning Gratification Control in the Environment of PT Garuda Indonesia (Persero) Tbk. In 2017, the company made

Garuda Indonesia menjalin kerja sama dengan Komisi Pemberantasan Korupsi (KPK) dalam membangun program pengendalian gratifikasi di Garuda Indonesia. KPK memberikan bantuan teknis dalam bentuk *assessment* atas kesiapan Garuda Indonesia untuk menjalankan program pengendalian gratifikasi dan pelatihan bagi Tim Program Pengendalian Gratifikasi (PPG) yang dibentuk Perseroan, serta melakukan *monitoring* dan evaluasi atas pelaksanaan program pengendalian gratifikasi.

PENGELOLAAN PENGENDALIAN GRATIFIKASI

Unit pengendali gratifikasi (UPG) sebagai pengelola laporan gratifikasi menerima laporan penerimaan/penolakan gratifikasi yang disampaikan oleh Insan Garuda Indonesia. UPG merekapitulasi laporan penerimaan/penolakan gratifikasi dan menyampaikan kepada KPK secara berkala. KPK akan menetapkan status kepemilikan atas laporan penerimaan gratifikasi dan menyampaikannya kepada Perseroan melalui UPG untuk ditindaklanjuti.

SOSIALISASI KEBIJAKAN GRATIFIKASI

Perseroan melakukan sosialisasi program pengendalian gratifikasi secara intensif dan konsisten ke seluruh pegawai Garuda Indonesia melalui media komunikasi Perusahaan secara elektronik, seperti email. Pada tahun 2019, Perseroan melakukan sosialisasi Gratifikasi kepada Direksi, Dewan Komisaris, dan pegawai dengan bekerjasama dengan Komisi Pemberantasan Korupsi.

Program sosialisasi yang intensif atas prinsip dan kebijakan pengendalian gratifikasi Perseroan bertujuan untuk menumbuhkan kesadaran dan pemahaman bagi pegawai maupun para pemangku kepentingan bahwa pengendalian gratifikasi merupakan salah satu aspek penting yang diupayakan oleh Perusahaan dalam membangun dan menumbuhkembangkan lingkungan kerja yang bersih dan berintegritas.

improvements to the gratification control provisions with the issuance of Decree of the President & CEO No. JKTDZ / SKEP / 50048/17 dated 22 November 2017 concerning Gratification Control in the Environment of PT Garuda Indonesia (Persero) Tbk which was then re-elaborated in the Decree of the Director of HR & General No. JKTDI / SKEP / 50042/17 dated 12 December 2017 concerning Guidelines for Giving, Receiving and Reporting Procedures for Acceptance and Rejection of Gratuities in PT Garuda Indonesia (Persero) Tbk.

Garuda Indonesia cooperates with the Corruption Eradication Commission (KPK) in developing gratuity control programs in Garuda Indonesia. The KPK provided technical assistance in the form of an assessment of Garuda Indonesia's readiness to carry out the gratification control program and training for the Gratification Control Team (PPG) formed by the Company, as well as monitoring and evaluating the implementation of the gratification control program.

GRATIFICATION CONTROL MANAGEMENT

The gratuity control unit (UPG) as the manager of gratuity reports receives reports of acceptance / rejection of gratuities submitted by Garuda Indonesia personnel. UPG recapitulates reports of acceptance / rejection of gratuities and submits them to the KPK regularly. The KPK will determine the ownership status of the gratuity receipt report and submit it to the Company through the UPG for further action.

GRATIFICATION POLICY SOCIALIZATION

The Company disseminates intensive and consistent gratification control programs to all Garuda Indonesia employees through the Company's electronic communication media, such as e-mail. In 2019, the Company conducted a socialization on Gratification to the Directors, Board of Commissioners, and employees in collaboration with the Corruption Eradication Commission.

KEGIATAN LINGKUNGAN HIDUP TERKAIT DENGAN KEGIATAN OPERASIONAL PERSEROAN

BIOPORI

Perseroan telah membuat lubang resapan biopori semenjak tahun 2012. Lubang biopori ini menurut riset berguna untuk mengurangi bencana banjir, meningkatkan cadangan air tanah, serta mempercepat terjadinya penyerapan air hujan. Secara alami lubang biopori merupakan lubang-lubang di dalam tanah yang terbentuk akibat adanya aktivitas organisme di dalamnya, seperti cacing, pengakaran tanaman, semut, rayap dan organisme tanah lainnya. Lubang-lubang yang

In line with the concept of Green Economy, which makes the aspects of People, Planet, and Profit as the three main focus, then this also concerns the Company in preparing the Green Strategy which consists of Green Campaign (People), Green Action (Planet), and Green Responsibility (Profit). The Company also carries out a number of savings activities, especially in saving energy and other resources. In relation to the fleet, the Company runs a fleet development program through simplification and rejuvenation (fleet revitalization).

ENVIRONMENTAL ACTIVITIES RELATED TO THE COMPANY'S OPERATIONAL ACTIVITIES

BIOPORE

The company has made biopori infiltration holes since 2012. According to research, biopori holes are useful to reduce flood disasters, increase groundwater reserves, and accelerate the absorption of rainwater. Naturally, biopori holes are holes in the soil formed by the activity of organisms in them, such as worms, plant rooting, ants, termites and other soil organisms. The holes that are formed will be filled with air and become the passage of water in the soil. If holes

terbentuk akan terisi udara dan menjadi tempat berlalunya air di dalam tanah. Apabila lubang-lubang seperti ini dibuat dalam jumlah banyak maka kemampuan sebidang batang untuk meresap air akan meningkat yang akan memperkecil peluang terjadinya aliran air di permukaan tanah. Hal ini akan mengurangi bahaya banjir yang mungkin terjadi. Namun di daerah perkotaan, keberadaan pepohonan semakin tergusur oleh bangunan-bangunan sehingga lubang biopori menjadi semakin langka, sehingga dibutuhkan lubang biopori buatan yang digunakan untuk menggantikan keberadaan dan fungsi lubang biopori alami tersebut. Lubang biopori dapat diisi dengan sampah organik yang berasal dari dedaunan pangkas rumput dari halaman, atau pun sampah dapur yang berfungsi sebagai kompos. Dengan pembuatan lubang biopori di area perkantoran, hal ini diharapkan akan turut mendorong para pegawai Perseroan untuk dapat turut membuat lubang biopori di rumahnya masing-masing sebagai salah satu langkah sederhana dalam perlindungan lingkungan.

Sampai dengan tahun 2019, Perseroan telah membuat sebanyak 1.934 titik biopori di Area Garuda City Cengkareng, Garuda Indonesia Training Centre (GITC) Duri Kosambi, Garuda Sentra Medika Kemayoran dan beberapa aset lainnya yang terletak di Jakarta.

KONSERVASI AIR

Upaya penghematan air yang dilakukan melalui aspek pengelolaan sumber daya air di seluruh area kerja Perseroan. Upaya ini dilakukan dengan mengurangi tingkat debit air dan penggunaan *hand wash detector*. Dari upaya penghematan energi air yang dilakukan, yaitu dengan mengatur *debit* air dan menggunakan *hand wash detector* di toilet di gedung kantor pusat Garuda City Centre maka didapatkan jumlah penghematan air meningkat.

Pipa-pipa air bersih di seluruh perkantoran Perseroan juga secara rutin di pelihara. Setiap tahunnya pihak pengelola aset gedung perkantoran melakukan peremajaan pipa-pipa air bersih, sehingga kebocoran-kebocoran air di pipa tersebut dapat diminimalisir. Hal ini juga menjadi wujud kepedulian dari Perseroan dalam melestarikan air sebagai sumber daya yang harus digunakan seefisien mungkin.

KONSERVASI ENERGI LISTRIK PERKANTORAN

Dalam rangka mencapai penghematan listrik telah dilakukan berbagai upaya terutama pengaturan penggunaan peralatan:

- Mengurangi penggunaan cahaya lampu dengan pemasangan dinding kaca;
- Penataan lampu sesuai dengan letak untuk mendapatkan pencahayaan yang optimal;
- Mematikan pendingin ruangan, lampu, komputer dan peralatan listrik lainnya bila sudah tidak digunakan;
- Penandatanganan komitmen penggantian lampu LED untuk perkantoran secara bertahap.

such as these are made in large quantities, the ability of a piece of stem to absorb water will increase which will reduce the chances of water flow on the ground surface. This will reduce the danger of flooding that might occur. But in urban areas, the presence of trees is increasingly displaced by buildings so that biopori holes become increasingly scarce, so we need artificial biopori holes that are used to replace the existence and function of these natural biopori holes. Biopori holes can be filled with organic waste originating from leaves of grass trimming from the yard, or even kitchen waste that functions as compost. By making biopori holes in the office area, it is hoped that this will also encourage the Company's employees to be able to participate in making biopori holes in their homes as a simple step in protecting the environment.

Until 2019, the Company has made as many as 1,934 biopore points in the Garuda City Cengkareng Area, Garuda Indonesia Training Center (GITC) Duri Kosambi, Garuda Sentra Medika Kemayoran and several other assets located in Jakarta.

WATER CONSERVATION

Water conservation efforts are carried out through the management of water resources in all work areas of the Company. This effort is done by reducing the level of water discharge and the use of hand wash detectors. From the efforts to save water energy, which is done by regulating water discharge and using a hand wash detector in the toilet in the Garuda City Center headquarters building, the amount of water savings is increased.

Clean water pipes throughout the Company's offices are also routinely maintained. Every year the office building manager conducts rejuvenation of clean water pipes, so that water leaks in the pipes can be minimized. This is also a manifestation of the Company's concern in conserving water as a resource that must be used as efficiently as possible.

OFFICE CONSERVATION OFFICE ELECTRICITY

In order to achieve electricity savings various efforts have been made, especially in regulating the use of equipment:

- Reducing the use of light from lamps by mounting glass walls;
- Arrangement of lamps according to location to get optimal lighting;
- Turn off the air conditioner, lights, computers and other electrical equipment when it is not used;
- Signing the commitment to replace LED lamps for offices in stages.

FUEL CONSERVATION PROGRAM

Emisi gas buang memiliki korelasi dengan penggunaan bahan bakar (*fuel*), sehingga penghematan bahan bakar atau yang biasa disebut dengan *fuel conservation* dapat mengurangi jumlah emisi gas buang. *Fuel conservation* merupakan program penghematan pemakaian bahan bakar (*fuel*) yang telah dan akan terus dijalankan oleh Perseroan. Melalui program *fuel conservation* ini beberapa langkah strategis terus dijalankan dan ditingkatkan pencapaiannya dengan melakukan:

1. Potable Water Management

Potable water management adalah salah satu cara mengurangi beban pesawat dengan melakukan pengelolaan volume air yang diangkut dalam pesawat yang disesuaikan dengan jumlah *souls on board* dan waktu tempuh dari setiap penerbangan. Semakin banyak volume air yang diangkut, maka semakin besar konsumsi bahan bakar pesawat. Oleh karenanya diperlukan perhitungan yang cermat dan teliti untuk menentukan berapa volume air yang harus diangkut untuk suatu penerbangan.

2. Optimum Centre of Gravity

Optimum Centre of Gravity adalah pengaturan posisi beban pesawat yang optimum sehingga diperoleh konsumsi bahan bakar yang paling efisien.

3. Nearest Alternate

Penggunaan *Nearest Alternate* merupakan kebijakan dalam pemilihan *airport alternate* pada setiap penerbangan adalah yang terdekat jaraknya dari *airport* destinasi. Dengan pemilihan jarak yang lebih dekat maka berakibat pada bahan bakar yang dibawa akan lebih sedikit.

4. Cost Index

Cost Index adalah pengaturan kecepatan pesawat untuk memperoleh efisiensi bahan bakar, dengan menerapkan suatu "nilai speed" tertentu pada masing-masing *aircraft type* untuk setiap *station* keberangkatan.

5. ATC Coordination (Direct Routes & Optimum Flight Level)

Dengan melakukan koordinasi yang baik dengan pihak *Air Traffic Controller* (ATC), diharapkan pada setiap penerbangan Garuda mendapatkan *Direct Routing* dan *Optimum Flight Level*, yang tentunya berdampak pada konsumsi bahan bakar yang lebih efisien.

6. Pilot Flight Technique

Demikian pula dengan *Flight Technique* yang senantiasa dilakukan modifikasi dari waktu ke waktu sesuai dengan perkembangan teknologi yang ada, untuk menghasilkan penerbangan yang efisien namun tetap aman dan nyaman.

7. Aircraft Performance Monitoring

Regular *maintenance* program dilakukan oleh jajaran Teknik dalam menunjang *fuel conservation* program. Hal ini terus dilakukan untuk mengendalikan tingkat keborosan mesin pesawat (*engine high consume*).

8. Optimum GPU Usage

Optimalisasi penggunaan GPU merupakan upaya mengoptimalkan penggunaan GPU sebagai pengganti

FUEL CONSERVATION PROGRAM

Exhaust emissions have a correlation with the use of fuel (*fuel*), so that fuel savings or commonly referred to as fuel conservation can reduce the amount of exhaust emissions. Fuel conservation is a program of saving the use of fuel (*fuel*) that has been and will continue to be run by the Company. Through this fuel conservation program several strategic steps have been continued and their achievements have been enhanced by:

1. Potable Water Management

Potable water management is one way to reduce aircraft load by managing the volume of water carried on an aircraft that is adjusted to the number of souls on board and the travel time of each flight. The more volume of water is transported, the greater the aircraft's fuel consumption. Therefore a careful and careful calculation is needed to determine what volume of water must be transported for a flight.

2. Optimum Center of Gravity

Optimum Center of Gravity is setting the optimum aircraft load position in order to obtain the most efficient fuel consumption.

3. Nearest Alternate

The use of Nearest Alternate is a policy in the selection of alternate airports on each flight that is the closest distance from the destination airport. With the choice of a shorter distance, it will result in less fuel being taken.

4. Cost Index

Cost Index is an aircraft speed regulation to obtain fuel efficiency, by applying a certain "speed value" on each aircraft type for each departure station.

5. ATC Coordination (Direct Routes & Optimum Flight Level)

By coordinating well with the Air Traffic Controller (ATC), it is expected that every Garuda flight will get Direct Routing and Optimum Flight Level, which will certainly have an impact on more efficient fuel consumption.

6. Pilot Flight Technique

Likewise, Flight Technique, which is always modified from time to time in accordance with the development of existing technology, to produce flights that are efficient but still safe and comfortable.

7. Aircraft Performance Monitoring

Regular maintenance programs are carried out by technical staff in supporting the fuel conservation program. This continues to be done to control the level of waste of aircraft engines (*engine high consume*).

8. Optimum GPU Usage

Optimizing the use of GPU is an effort to optimize the use of GPU as a substitute for Auxiliary Power Units

Auxiliary Power Unit (APU) di bandara domestik dan internasional untuk pesawat RON (*Remain Over Night*; Pesawat yang menginap di bandara hingga melewati hari), pesawat penerbangan pertama setelah RON dan untuk pesawat yang transit lebih dari 2 jam.

FLEET REJUVENATION

Perseroan menjalankan program pengembangan armada melalui penyederhanaan dan peremajaan pesawat (*fleet revitalization*) secara signifikan dengan armada-armada baru seperti Airbus A330, Boeing 737-MAX 8, Boeing 777-300 ER, dan Airbus A330-900. Hal ini bertujuan untuk meningkatkan kualitas pelayanan, efisiensi biaya operasi, menurunkan tingkat emisi, serta mengurangi tingkat kebisingan (*noise reduction*) yang ditimbulkan dari penerbangan. Dengan jajaran armada baru yang didukung teknologi mutakhir dan hemat bahan bakar, Perseroan akan mampu meningkatkan efisiensi secara signifikan. Perseroan menargetkan rata-rata usia pesawat pada tahun 2019, di bawah 8 tahun.

(APU) at domestic and international airports for RON (Remain Over Night; planes that stay overnight at the airport), the first flight planes after RON and for more transit flights from 2 hours.

FLEET REJUVENATION

The Company operates a fleet development program through significant simplification and rejuvenation of aircraft (fleet revitalization) with new fleets such as the Airbus A330, Boeing 737-MAX 8, Boeing 777-300 ER, and Airbus A330-900. This aims to improve service quality, efficiency of operating costs, reduce emission levels, and reduce the level of noise (noise reduction) arising from flights. With the new fleet supported by the latest technology and saving fuel, the Company will be able to significantly increase efficiency. The company targets the average aircraft age in 2019, under 8 years.

MORE PASSENGERS MORE TREES

Program “More Passengers More Trees” menjadi bagian komitmen Garuda Indonesia untuk mengiringi laju kenaikan penumpang dengan pertambahan jumlah pohon sebagai langkah nyata untuk mengurangi emisi karbon. Salah satu program *tree-planting* yang dimulai sejak tahun 2011 yang terselenggara atas kerjasama antara Garuda Indonesia, Yayasan KEHATI, dan LIPI, yaitu Program Pembangunan Arboretum Tumbuhan Asli Kawasan Jawa-Bali di *Ecopark Cibinong Science Center*, LIPI telah menanam 20.000 pohon dengan 70 jenis tumbuhan khas Jawa-Bali dalam dua tahapan di Kawasan Jawa-Bali di *Ecopark* tersebut. Kawasan ini merupakan replika hutan tropis Indonesia yang ditata berdasarkan ekoregion mulai Sumatera sampai Papua.

Ecopark Cibinong Science-Center-LIPI yang juga berfungsi sebagai tapak pendidikan lingkungan bagi publik untuk mempelajari dan menyelematkan tumbuhan endemik 7 (tujuh) ekoregion Indonesia ini merupakan bagian dari Kebun Raya Bogor, dan rencananya akan *launching* pada akhir tahun 2020.

MORE PASSENGERS MORE TREES

The “More Passengers More Trees” program is part of Garuda Indonesia’s commitment to accompany the rate of increase in passengers by increasing the number of trees as a concrete step to reduce carbon emissions. One of the tree-planting programs that began in 2011 was carried out in collaboration with Garuda Indonesia, the KEHATI Foundation, and LIPI, namely the Java-Bali Original Plant Arboretum Development Program at the Ecopark Cibinong Science Center, LIPI has planted 20,000 trees with 70 plant species typical of Java-Bali in two stages in the Java-Bali Region at the Ecopark. This area is a replica of Indonesia’s tropical forests arranged according to ecoregions from Sumatra to Papua.

The Ecopark Cibinong Science-Center-LIPI which also functions as an environmental education site for the public to study and save endemic plants of 7 (seven) Indonesian ecoregions is part of the Bogor Botanical Gardens, and is planned to be launched at the end of 2020.

PT GARUDA INDONESIA (PERSERO) TBK

**INDEPENDENT AUDITORS' REPORT
TO THE SHAREHOLDERS OF**

Kami telah mengaudit laporan keuangan konsolidasian PT Garuda Indonesia (Persero) Tbk dan entitas anak terlampir (bersama-sama disebut "Grup"), yang terdiri dari laporan posisi keuangan konsolidasian tanggal 31 Desember 2019, serta laporan laba-rugi dan penghasilan komprehensif lain, laporan perubahan ekuitas dan laporan arus kas konsolidasian untuk tahun yang berakhir pada tanggal tersebut, dan suatu ikhtisar kebijakan akuntansi signifikan dan informasi penjelasan lainnya.

Tanggung jawab manajemen atas laporan keuangan konsolidasian

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian ini sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Tanggung jawab auditor

Tanggung jawab kami adalah untuk menyatakan suatu opini atas laporan keuangan konsolidasian ini berdasarkan audit kami. Kami melaksanakan audit kami berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia. Standar tersebut mengharuskan kami untuk mematuhi ketentuan etika serta merencanakan dan melaksanakan audit untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian bebas dari kesalahan penyajian material.

We have audited the accompanying consolidated financial statements of PT Garuda Indonesia (Persero) Tbk and its subsidiaries (together the "Group"), which comprise the consolidated statement of financial position as at 31 December 2019, and the consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

Suatu audit melibatkan pelaksanaan prosedur untuk memperoleh bukti audit tentang angka-angka dan pengungkapan dalam laporan keuangan konsolidasian. Prosedur yang dipilih bergantung pada pertimbangan auditor, termasuk penilaian atas risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan. Dalam melakukan penilaian risiko tersebut, auditor mempertimbangkan pengendalian internal yang relevan dengan penyusunan dan penyajian wajar laporan keuangan konsolidasian entitas untuk merancang prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal entitas. Suatu audit juga mencakup pengevaluasian atas ketepatan kebijakan akuntansi yang digunakan dan kewajaran estimasi akuntansi yang dibuat oleh manajemen, serta pengevaluasian atas penyajian laporan keuangan konsolidasian secara keseluruhan.

Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

Opini

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian PT Garuda Indonesia (Persero) Tbk dan entitas anak tanggal 31 Desember 2019, serta kinerja keuangan dan arus kas konsolidasiannya untuk tahun yang berakhir pada tanggal tersebut, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

Penekanan suatu hal

Kami menaruh perhatian pada Catatan 57 atas laporan keuangan konsolidasian yang mengindikasikan Grup memiliki modal kerja negatif sebesar USD 2.124 juta dan defisit saldo laba sebesar USD 669 juta pada tanggal 31 Desember 2019. Lebih jauh, di awal tahun 2020, ekonomi dunia, khususnya industri penerbangan komersial, menghadapi ketidakpastian akibat dari epidemi Covid-19. Kondisi ini, bersama dengan hal-hal lain yang dijelaskan dalam Catatan 57, mengindikasikan adanya suatu ketidakpastian yang material yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan *going concern*-nya. Rencana manajemen untuk tindakan di masa depan dalam menghadapi kondisi-kondisi diatas telah dijelaskan dalam Catatan 57. Laporan keuangan konsolidasian terlampir telah disusun dengan menggunakan asumsi bahwa Grup akan melanjutkan usahanya secara *going concern*. Opini kami tidak dimodifikasi sehubungan dengan hal ini.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of PT Garuda Indonesia (Persero) Tbk and its subsidiaries as at 31 December 2019, and their consolidated financial performance and cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

Emphasis of matter

We draw attention to Note 57 in the consolidated financial statements, which indicates that the Group had negative working capital of USD 2,124 million and accumulated losses of USD 669 million as at 31 December 2019. Further, in early 2020, the global economy, in particular the commercial airlines industry, face an uncertainty as a result of the Covid-19 epidemic. These conditions, along with other matters as set forth in Note 57, indicate the existence of a material uncertainty that may cast significant doubt about the ability of the Group to continue as a going concern. Management's plans for future actions in responding to the conditions above are described in Note 57. The accompanying consolidated financial statements have been prepared assuming that the Group will continue to operate as a going concern. Our opinion is not modified in respect of this matter.

2. KEBIJAKAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)

b. Prinsip-prinsip konsolidasi (lanjutan)

Entitas anak (lanjutan)

Perusahaan menggunakan metode akuisisi untuk mencatat akuisisi entitas anak. Biaya perolehan termasuk nilai wajar imbalan kontinjenji pada tanggal akuisisi.

Kepentingan nonpengendali atas total laba rugi komprehensif entitas anak diidentifikasi sesuai proporsinya dan disajikan sebagai bagian dari total laba komprehensif yang dapat diatribusikan pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Bila pengendalian atas suatu entitas diperoleh dalam tahun berjalan, hasil usaha entitas tersebut dimasukkan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sejak tanggal pengendalian dimulai. Nilai tercatat awal adalah sebesar nilai wajar untuk kepentingan pengukuran kembali kepentingan yang tersisa sebagai entitas asosiasi, ventura bersama atau aset keuangan. Di samping itu, jumlah yang sebelumnya diakui pada penghasilan komprehensif lain sehubungan dengan entitas tersebut dicatat seolah-olah Grup telah melepas aset atau liabilitas terkait. Hal ini dapat berarti bahwa jumlah yang sebelumnya diakui pada penghasilan komprehensif lain direklasifikasi ke laporan laba rugi konsolidasian.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

b. Principles of consolidation (continued)

Subsidiaries (continued)

The Company used the acquisition method to account for the acquisition of subsidiaries. The cost of acquisition includes any fair value of contingent consideration at the acquisition date.

Non-controlling interests in the total comprehensive income of subsidiaries are identified at its portion and presented as part of total attributable comprehensive income in the consolidated statement of profit or loss and other comprehensive income. Noncontrolling interests in the net assets of subsidiaries are identified at the date of business combination which subsequently adjusted by proportion of changes in equity of subsidiaries and presented as part of equity in the consolidated statements of financial position.

Where control of an entity is obtained during a financial year, its results are included in the consolidated statement of profit or loss and other comprehensive income from the date when control commences. Where control ceases during a financial year, its results are included in the consolidated statement of profit or loss and other comprehensive income for the part of the year during which control exists.

Inter-company transactions, balances and unrealised gains on transactions between entities within the Group are eliminated. Unrealised losses are also eliminated.

The accounting policies adopted in preparing the consolidated financial statements in all material respects have been consistently applied by subsidiaries.

Disposal of subsidiaries

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value at the date when the control is lost, with the change in carrying amount recognised in the consolidated profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the consolidated profit or loss.

c. Kombinasi bisnis

Grup menerapkan metode akuisisi untuk mencatat kombinasi bisnis. Imbalan yang dialihkan untuk akuisisi suatu entitas anak adalah sebesar nilai wajar aset yang dialihkan, liabilitas yang diakui terhadap pemilik pihak yang diakusisi sebelumnya dan kepentingan ekuitas yang diterbitkan oleh Grup. Imbalan yang dialihkan termasuk nilai wajar aset atau liabilitas yang timbul dari kesepakatan imbalan kontinjenji. Aset teridentifikasi yang diperoleh dan liabilitas serta liabilitas kontinjenji yang diambil alih dalam suatu kombinasi bisnis diukur pada awalnya sebesar nilai wajar pada tanggal akuisisi.

Grup mengakui kepentingan nonpengendali pada pihak yang diakuisisi untuk setiap akuisisi yang dilakukan baik sebesar nilai wajar atau sebesar bagian proporsional kepentingan nonpengendali atas aset neto pihak yang diakuisisi. Kepentingan nonpengendali disajikan di ekuitas dalam laporan posisi keuangan konsolidasian, terpisah dari ekuitas pemilik entitas induk.

Imbalan kontinjenji yang masih harus dialihkan oleh Grup diakui sebesar nilai wajar pada tanggal akuisisi. Perubahan selanjutnya atas nilai wajar imbalan kontinjenji yang diakui sebagai aset atau liabilitas dan dicatat sesuai dengan PSAK 55 "Instrumen Keuangan: Pengakuan dan Pengukuran", dalam laporan laba rugi konsolidasian. Imbalan kontinjenji yang diklasifikasikan sebagai ekuitas tidak diukur kembali dan penyelesaian selanjutnya diperhitungkan dalam ekuitas.

Biaya terkait akuisisi dibebankan pada saat terjadinya.

c. Business combination

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred by the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. Non-controlling interest is reported as equity in the consolidated statement of financial position, separate from the owner of the parent's equity.

Any contingent consideration to be transferred by the Group is recognised at fair value as at the acquisition date. Subsequent changes to the fair value of the contingent consideration that are deemed to be an assets or a liabilities are recognised in accordance with PSAK 55 "Financial Instruments: Recognition and Measurement" in the consolidated profit or loss. Contingent consideration that is classified as equity is not remeasured and its subsequent settlement is accounted for within equity.

Acquisition related costs are expensed as incurred.

d. Foreign currency transactions and balances

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency").

The consolidated financial statements are presented in United States Dollar (US Dollar or USD), which is the functional and presentation currency of the Company.

Aset keuangan (lanjutan)

Pengakuan dan penghentian pengakuan

Pembelian dan penjualan aset keuangan yang lazim (reguler) diakui pada tanggal perdagangan – yaitu tanggal dimana Grup berkomitmen untuk membeli atau menjual aset. Aset keuangan dihentikan pengakuannya ketika hak untuk menerima arus kas dari investasi tersebut telah jatuh tempo atau telah ditransfer dan Grup telah mentransfer secara substansial seluruh risiko dan manfaat atas kepemilikan aset.

Pengukuran

Aset keuangan pada awalnya diakui sebesar nilai wajarnya ditambah biaya transaksi untuk seluruh aset keuangan yang tidak diukur pada nilai wajar melalui laporan laba rugi. Aset keuangan yang diukur pada nilai wajar melalui laporan laba rugi pada awalnya dicatat sebesar nilai wajar dan biaya transaksinya dibebankan pada laporan laba rugi konsolidasian.

Aset keuangan tersedia untuk dijual dan aset keuangan yang diukur pada nilai wajar melalui laporan laba rugi selanjutnya dicatat sebesar nilai wajar. Pinjaman yang diberikan dan piutang dicatat sebesar biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif.

Selisih neto yang timbul dari perubahan nilai wajar kategori “aset keuangan diukur pada nilai wajar melalui laporan laba rugi” disajikan pada laporan laba rugi konsolidasian dalam “penghasilan keuangan” dalam periode terjadinya. Penghasilan dividen dari aset keuangan diakui pada laporan laba rugi konsolidasian sebagai “pendapatan lain-lain, bersih” ketika hak Grup untuk menerima pembayaran sudah ditetapkan. Penghasilan bunga aset keuangan dicatat pada “penghasilan keuangan”.

Pada setiap akhir periode pelaporan, Grup menilai apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan telah mengalami penurunan nilai. Aset keuangan atau kelompok aset keuangan diturunkan nilainya dan kerugian penurunan nilai terjadi hanya jika terdapat bukti objektif bahwa penurunan nilai merupakan akibat dari satu atau lebih peristiwa yang terjadi setelah pengakuan awal aset (peristiwa kerugian) dan peristiwa kerugian (atau peristiwa) tersebut memiliki dampak pada estimasi arus kas masa datang atas aset keuangan atau kelompok aset keuangan yang dapat diestimasi secara andal.

Financial assets (continued)

Recognition and derecognition

Regular purchases and sales of financial assets are recognised on the trade date – the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

Measurement

A financial asset are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value and transaction costs are expensed in the consolidated profit or loss.

Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables are carried at amortised cost using the effective interest method.

Net differences arising from changes in the fair value of the “financial assets at fair value through profit or loss” category are presented in the consolidated profit or loss within “finance income” in the period in which they arise. Dividend income from financial assets is recognised in the consolidated profit or loss as part of “other income, net” when the Group’s right to receive payments is established. Interest income from financial assets is included in the “finance income”.

Impairment of financial assets

At the end of each reporting period, the Group assesses whether there is objective evidence that a financial asset or Group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a loss event) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Aset keuangan (lanjutan)

Penurunan nilai aset keuangan (lanjutan)

Untuk kategori pinjaman yang diberikan dan piutang, jumlah kerugian diukur sebesar selisih antara nilai tercatat aset dan nilai kini dari estimasi arus kas masa datang diestimasi (tidak termasuk kerugian kredit masa depan yang belum terjadi) yang didiskonto menggunakan suku bunga efektif awal dari aset tersebut. Nilai tercatat aset dikurangi dan jumlah kerugian diakui pada laporan laba rugi konsolidasian. Jika pinjaman yang diberikan memiliki tingkat bunga mengambang, tingkat diskonto yang digunakan untuk mengukur kerugian penurunan nilai adalah tingkat bunga efektif saat ini yang ditentukan dalam kontrak. Untuk alasan praktis, Grup dapat mengukur penurunan nilai berdasarkan nilai wajar instrumen dengan menggunakan harga pasar yang dapat diobservasi.

Jika, pada periode selanjutnya, jumlah penurunan nilai berkurang dan penurunan tersebut dapat dihubungkan secara objektif dengan peristiwa yang terjadi setelah penurunan nilai diakui (misalnya meningkatnya peringkat kredit debitir), pemulihan atas jumlah penurunan nilai yang telah diakui sebelumnya diakui pada laporan laba rugi konsolidasian.

Saling hapus aset keuangan dan liabilitas keuangan

Aset keuangan dan liabilitas keuangan disalinghapuskan dan jumlah netonya dilaporkan pada laporan posisi keuangan konsolidasian ketika terdapat hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut dan adanya niat untuk menyelesaikan secara neto, atau untuk merealisasikan aset dan menyelesaikan liabilitas secara bersamaan.

Liabilitas keuangan

Grup mengklasifikasikan liabilitas keuangan dalam dua kategori berikut: diukur pada nilai wajar melalui laporan laba rugi dan liabilitas keuangan yang diukur pada biaya perolehan yang diamortisasi.

Pada tanggal 31 Desember 2019 dan 2018, Grup memiliki liabilitas keuangan yang diukur pada biaya perolehan diamortisasi. Setelah pengakuan awal, yang sebesar nilai wajar ditambah biaya transaksi, Grup mengukur semua liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi menggunakan metode suku bunga efektif, jika dampak dari diskonto signifikan.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

f. Financial instruments (continued)

Financial assets (continued)

Impairment of financial assets (continued)

For the loans and receivables category, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in the consolidated profit or loss. If a loan has a floating interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using an observable market price.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the reversal of the previously recognised impairment loss is recognised in the consolidated profit or loss.

Offsetting financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount is reported in the consolidated statements of financial position when there is a legally enforceable right to offset the recognised amounts and there is intent to either settle on a net basis or realise the asset and settle the liability simultaneously.

Financial liabilities

The Group classifies its financial liabilities into two categories: at fair value through profit or loss and financial liabilities measured at amortised cost.

As at 31 December 2019 and 2018, the Group had financial liabilities measured at amortised cost. After initial recognition, which is at fair value plus transaction costs, the Group measures all financial liabilities at amortised cost using the effective interest rates method, if the impact of discounting is significant.

Liabilitas keuangan (lanjutan)

Liabilitas keuangan Grup meliputi utang usaha, utang lain-lain, liabilitas anjak piutang, akrual, pinjaman, utang obligasi, liabilitas sewa pembiayaan, pinjaman efek beragun aset dan liabilitas keuangan jangka panjang lain-lain. Liabilitas keuangan diklasifikasikan sebagai liabilitas jangka panjang jika jatuh tempo melebihi 12 bulan dan sebagai liabilitas jangka pendek jika jatuh tempo yang tersisa kurang dari 12 bulan.

Penghentian pengakuan liabilitas keuangan

Liabilitas keuangan dihentikan pengakuananya jika, dan hanya jika, liabilitas Grup telah dilepaskan, dibatalkan atau kadaluarsa. Selisih antara jumlah tercatat liabilitas keuangan yang dihentikan pengakuananya dan imbalan yang dibayarkan dan utang diakui dalam laba rugi konsolidasian.

g. Instrumen keuangan derivatif

Derivatif pada awalnya diakui sebesar nilai wajar pada tanggal kontrak derivatif disepakati dan selanjutnya diukur kembali sebesar nilai wajarnya. Metode pengakuan keuntungan atau kerugian yang timbul tergantung dari apakah derivatif tersebut dimaksudkan sebagai instrumen lindung nilai, dan jika demikian, sifat dari item yang dilindungi nilai.

Perubahan nilai wajar derivatif yang ditetapkan dan memenuhi kriteria lindung nilai atas arus kas untuk tujuan akuntansi, bagian efektifnya, diakui di penghasilan komprehensif lain di dalam "Cadangan atas perubahan nilai wajar lindung nilai arus kas." Ketika instrumen derivatif tersebut kadaluarsa atau tidak lagi memenuhi kriteria lindung nilai untuk tujuan akuntansi, maka keuntungan atau kerugian kumulatif di penghasilan komprehensif lain diakui pada laporan laba rugi konsolidasian.

Perubahan nilai wajar derivatif yang tidak memenuhi kriteria lindung nilai untuk tujuan akuntansi diakui langsung pada laporan laba rugi konsolidasian.

Suatu derivatif disajikan sebagai aset tidak lancar atau liabilitas jangka panjang jika sisa jatuh tempo dari instrumen lebih dari 12 bulan dan tidak diharapkan akan direalisasi atau diselesaikan dalam jangka waktu 12 bulan. Derivatif lainnya disajikan sebagai aset lancar atau liabilitas jangka pendek.

f. Financial instruments (continued)

Financial liabilities (continued)

The Group's financial liabilities include trade payables, other payables, factoring liabilities, accruals, loans, bonds payable, finance lease liabilities, asset-backed securitisation loan and other non-current financial liabilities. Financial liabilities are classified as non-current liabilities when the remaining maturity is more than 12 months, and as current liabilities when the remaining maturity is less than 12 months.

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, its obligations are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the consolidated profit or loss.

g. Derivative financial instruments

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

Changes in the fair value of derivatives that are designated and qualify as cash flow hedges for accounting purposes and that are effective, are recognised in other comprehensive income within "Reserve for changes in fair value of cash flow hedge." When a hedging instrument expires, or when a hedge no longer meets the criteria for hedge accounting, the cumulative gain or loss in other comprehensive income is recognised in the consolidated profit or loss.

Changes in the fair value of derivatives that do not meet the criteria of hedging for accounting purposes are recorded immediately in the consolidated profit or loss.

A derivative is presented as a non-current asset or non-current liability if the remaining maturity of the instrument is more than 12 months and is not expected to be realised or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

h. Kas dan setara kas

Kas dan setara kas terdiri dari kas, bank dan deposito berjangka yang tidak dibatasi penggunaannya dan jatuh tempo dalam waktu tiga bulan atau kurang dari tanggal penempatan serta tidak dijaminkan sebagai jaminan utang. Pada laporan arus kas konsolidasian, kas dan setara kas disajikan setelah dikurangi cerukan.

Rekening yang dibatasi penggunaannya dan atau digunakan sebagai jaminan diklasifikasi sebagai bagian aset lancar jika jatuh temponya kurang dari 12 bulan setelah akhir periode pelaporan.

i. Piutang usaha dan piutang lain-lain

Piutang usaha merupakan jumlah yang terutang dari pelanggan atas penjualan barang atau jasa yang dilakukan dalam kegiatan usaha biasa. Jika piutang diperkirakan dapat ditagih dalam waktu satu tahun atau kurang, piutang usaha diklasifikasikan sebagai aset lancar. Jika tidak, piutang usaha disajikan sebagai aset tidak lancar.

Piutang usaha dan piutang lain-lain pada awalnya diakui sebesar nilai wajar dan selanjutnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode bunga efektif, apabila dampak pendiskontoan signifikan, dikurangi provisi atas penurunan nilai.

Kolektibilitas piutang usaha dan piutang lain-lain ditinjau secara berkala. Piutang yang diketahui tidak tertagih, dihapuskan secara langsung dengan mengurangi nilai tercatatnya. Akun penyiangan digunakan ketika terdapat bukti yang objektif bahwa Grup tidak dapat menagih seluruh nilai terutang sesuai dengan persyaratan awal piutang. Kesulitan keuangan signifikan yang dialami debitur, kemungkinan debitur dinyatakan pailit atau melakukan reorganisasi keuangan dan gagal bayar atau menunggak pembayaran merupakan indikator yang dianggap dapat menunjukkan adanya penurunan nilai piutang. Jumlah penurunan nilai adalah sebesar selisih antara nilai tercatat aset dan nilai kini dari estimasi arus kas masa depan pada tingkat suku bunga efektif awal. Provisi atas penurunan nilai piutang dibebankan ke laba rugi konsolidasian. Arus kas terkait dengan piutang jangka pendek tidak didiskontokan apabila efek diskonto tidak material.

j. Persediaan

Persediaan dinyatakan berdasarkan biaya perolehan atau nilai realisasi bersih, mana yang lebih rendah. Biaya ditentukan dengan metode rata-rata tertimbang. Nilai realisasi bersih merupakan taksiran harga jual persediaan dikurangi taksiran biaya penyelesaian dan biaya yang diperlukan untuk menjual.

In the consolidated statement of cash flows, cash and cash equivalents are presented net of overdraft.

Current accounts which are restricted and or used as security are classified as current assets when the maturities of less than 12 months after the end of reporting period.

i. Trade and other receivables

Trade receivables are amounts due from customers for good sold or services performed in the ordinary course of business. If collection is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets.

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, if the impact of discounting is significant, less any provision for impairment.

The collectibility of trade and other receivables is reviewed on an ongoing basis. Receivables which are known to be uncollectible are directly written off by reducing the carrying amount. An allowance account is used when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the impairment provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Provision for impairment of receivables is charged to the consolidated profit or loss. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

j. Inventories

Inventories are stated at cost or net realisable value, whichever is lower. Cost is determined using the weighted average method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

2. KEBIJAKAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)

k. Investasi pada entitas asosiasi

Entitas asosiasi adalah semua entitas dimana Grup memiliki pengaruh signifikan namun tidak mengendalikan, biasanya melalui kepemilikan hak suara antara 20% dan 50%. Investasi pada entitas asosiasi dicatat dengan metode ekuitas. Berdasarkan metode ekuitas, investasi pada awalnya diakui sejumlah nilai perolehan dan nilai tercatat akan meningkat atau menurun untuk mengakui bagian laba atau rugi investor dari laba atau rugi entitas asosiasi setelah tanggal akuisisi.

Jika kepemilikan kepentingan pada entitas asosiasi berkurang, namun tetap memiliki pengaruh signifikan, hanya suatu bagian proporsional atas jumlah yang telah diakui sebelumnya pada penghasilan komprehensif lainnya yang direklasifikasi ke laporan laba rugi konsolidasian.

Bagian Grup atas laba atau rugi entitas asosiasi pasca akuisisi diakui dalam laporan laba rugi konsolidasian dan bagian atas mutasi penghasilan komprehensif lainnya pasca akuisisi diakui di dalam penghasilan komprehensif lainnya dengan melakukan penyesuaian atas jumlah tercatat investasi. Jika bagian Grup atas kerugian entitas asosiasi sama dengan atau melebihi kepentingannya pada entitas asosiasi, termasuk piutang tanpa agunan, Grup menghentikan pengakuan bagian kerugiannya, kecuali jika Grup memiliki kewajiban atau melakukan pembayaran atas nama entitas asosiasi.

Pada setiap tanggal pelaporan, Grup menentukan apakah terdapat bukti objektif bahwa telah terjadi penurunan nilai atas investasi pada entitas asosiasi. Jika demikian, maka Grup menghitung besarnya penurunan nilai sebagai selisih antara jumlah yang terpulihkan dan nilai tercatat atas investasi pada entitas asosiasi dan mengakui selisih tersebut pada "bagian atas hasil bersih entitas asosiasi" dalam laporan laba rugi konsolidasian.

I. Properti investasi

Properti investasi adalah properti (tanah atau bangunan atau bagian dari suatu bangunan atau keduanya) untuk menghasilkan sewa atau untuk kenaikan nilai atau keduanya.

Properti investasi awalnya diukur sebesar biaya perolehan dan selanjutnya setelah penilaian awal, properti investasi diukur dengan menggunakan nilai wajar. Keuntungan atau kerugian yang timbul dari perubahan nilai wajar diakui pada laba rugi konsolidasian pada saat terjadinya.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

k. Investments in associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investment is initially recognised at cost and the carrying amount is increased or decreased to recognise the investor's share of profit or loss of the investee after the date of acquisition.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amount previously recognised in other comprehensive income is reclassified to the consolidated profit or loss where appropriate.

The Group's share of post-acquisition profits or losses is recognised in the consolidated profit or loss and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the investment in associate and its carrying value and recognises the amount to "share of results of associates" in the consolidated profit or loss.

I. Investment properties

Investment properties are properties (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both.

Investment properties are measured initially at cost and subsequent to initial recognition, investment properties are measured at fair value. Gains and losses arising from changes in fair value are recognised in consolidated profit or loss in the period in which they arise.

I. Properti investasi (lanjutan)

Properti investasi dihentikan pengakuan pada saat dilepaskan atau tidak digunakan lagi secara permanen dan tidak memiliki manfaat ekonomi masa depan yang diperkirakan dari pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan properti investasi (ditentukan dari selisih antara hasil neto pelepasan dan jumlah tercatat aset) diakui dalam laba rugi konsolidasian pada periode terjadinya penghentian atau pelepasan.

m. Aset tetap

Aset tetap meliputi aset pesawat dan non-pesawat. Aset tetap, kecuali tanah, bangunan dan aset pesawat yang terdiri dari rangka pesawat dan mesin yang dimiliki langsung, dinyatakan berdasarkan biaya perolehan dikurangi akumulasi penyusutan dan penurunan nilai, jika ada.

Biaya perolehan aset tetap merupakan biaya yang secara langsung diatribusikan dengan pembelian atau pembangunan, meliputi setiap biaya yang secara langsung diatribusikan untuk membawa aset ke lokasi dan kondisi yang diperlukan agar dapat beroperasi dengan cara yang dimaksudkan oleh manajemen.

Grup mendapatkan insentif dari vendor sehubungan dengan perolehan peralatan penerbangan tertentu (*manufacturer's incentive*). Insentif ini akan dicatat sebagai pengurang biaya perolehan peralatan penerbangan tersebut.

Aset dalam penyelesaian dinyatakan sebesar biaya perolehan termasuk biaya pinjaman yang terjadi selama masa pembangunan yang timbul dari utang yang digunakan untuk pembangunan aset tersebut. Akumulasi biaya perolehan akan dipindahkan ke masing-masing aset tetap yang bersangkutan pada saat selesai dan siap digunakan.

Biaya inspeksi besar pesawat, *overhaul* mesin dan biaya pengembangan aset sewa dan biaya lainnya yang terjadi setelah pengakuan awal untuk menambah, mengganti atau memperbaiki aset tetap dicatat sebagai aset tetap jika dan hanya jika besar kemungkinan manfaat ekonomis di masa datang berkenaan dengan aset tersebut akan mengalir ke entitas dan biaya perolehan aset dapat diukur secara andal. Beban pemeliharaan dan perbaikan rutin dibebankan pada saat terjadinya.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

I. Investment properties (continued)

Investment properties are derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated profit or loss in the period in which the property is derecognised or disposed.

m. Fixed assets

Fixed assets comprise of aircraft assets and non-aircraft assets. Fixed assets, except for land, building and owned aircraft assets which consist of airframes and engines, are stated at cost less accumulated depreciation and impairment, if any.

The cost of fixed assets is directly attributable to their purchase or construction, which includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

*The Group receives incentive from vendors in connection with the acquisition of certain avionic equipment (*manufacturer's incentives*). These credits are recorded as a reduction to the cost of the related avionic equipment.*

Construction in progress is stated at cost which includes borrowing costs during construction on debts incurred to finance the construction. Construction in progress is transferred to the respective fixed assets accounts when complete and ready to use.

The major aircraft inspection, engine overhaul and cost of leasehold improvement and other costs that are incurred subsequently to add to, replace part of, or service an item of fixed assets, are recognised as assets if, and only if it is probable that future economic benefits associated with the item of the assets will flow to the entity and the cost of the item can be measured reliably. The cost of routine maintenance and repairs is charged to operations as incurred.

m. Aset tetap (lanjutan)

Tanah, bangunan dan aset pesawat yang terdiri dari rangka pesawat dan *overhaul* mesin yang dimiliki langsung disajikan sebesar nilai wajar, berdasarkan penilaian yang dilakukan oleh penilai independen eksternal yang terdaftar di OJK, dikurangi penyusutan. Revaluasi dilakukan secara berkala untuk memastikan bahwa nilai wajar aset yang direvaluasi tidak berbeda secara material dengan jumlah tercatatnya. Akumulasi penyusutan pada tanggal revaluasi dieliminasikan terhadap nilai tercatat bruto aset dan nilai netonya disajikan kembali sebesar jumlah revaluasi aset.

Kenaikan nilai tercatat yang timbul dari revaluasi dikreditkan pada "cadangan revaluasi aset" sebagai bagian dari penghasilan komprehensif lainnya. Penurunan yang menghapus nilai kenaikan yang sebelumnya atas aset yang sama dibebankan terhadap "cadangan revaluasi aset" sebagai bagian dari penghasilan komprehensif lainnya; penurunan lainnya dibebankan pada laporan laba rugi konsolidasian. Setiap periode pelaporan, selisih antara penyusutan berdasarkan nilai revaluasi aset yang diakui di dalam laporan laba rugi konsolidasiaan dan penyusutan berdasarkan harga perolehan awal aset ditransfer dari "cadangan revaluasi aset" ke dalam "saldo laba/akumulasi kerugian".

Jika aset yang direvaluasi dijual, jumlah yang dicatat di dalam ekuitas dipindahkan ke saldo laba/akumulasi kerugian.

Tanah tidak disusutkan. Penyusutan aset lain dihitung dengan menggunakan metode garis lurus untuk mengalokasikan harga perolehan atau jumlah revaluasi sampai dengan nilai sisanya selama masa manfaat yang diestimasi, sebagai berikut:

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

m. Fixed assets (continued)

Land, buildings and owned aircraft assets which consist of airframes and overhauled engines are shown at fair value, based on valuations performed by external independent valuers which are registered with OJK, less depreciation. Revaluations are performed periodically to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset.

Increases in the carrying amount arising on revaluation are credited to "asset revaluation reserve" as part of other comprehensive income. Decreases that offset previous increases of the same asset are debited against "asset revaluation reserve" as part of other comprehensive income; all other decreases are charged to the consolidated profit or loss. At each reporting period, the difference between depreciation based on the revalued carrying amount of the asset charged to the consolidated profit or loss and depreciation based on the asset's original cost is transferred from "asset revaluation reserve" to "retained earnings/accumulated losses".

When revalued assets are sold, the amounts included in equity are transferred to retained earnings/accumulated losses.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost or revalued amounts to their residual values over their estimated useful lives, as follows:

2. KEBIJAKAN AKUNTANSI YANG SIGNIFIKAN (lanjutan)

m. Aset tetap (lanjutan)

Taksiran masa manfaat, nilai residu dan metode penyusutan ditelaah setiap akhir tahun buku, dan pengaruh dari setiap perubahan estimasi akuntansi diterapkan secara prospektif.

Aset tetap dihentikan pengakuannya pada saat pelepasan atau ketika tidak ada manfaat ekonomis masa datang yang diharapkan timbul dari penggunaan aset secara berkelanjutan. Keuntungan atau kerugian yang timbul dari pelepasan atau penghentian pengakuan suatu aset tetap ditentukan sebagai perbedaan antara hasil penjualan dan nilai tercatat aset tetap dan diakui dalam laba rugi konsolidasian.

n. Biaya pinjaman

Biaya pinjaman yang langsung berkaitan dengan akuisisi, konstruksi dari aset kualifikasi, yang membutuhkan waktu yang cukup lama agar siap untuk digunakan sesuai dengan intensinya atau dijual, ditambahkan ke biaya perolehan aset, sampai dengan waktu yang secara substansial aset tersebut telah siap untuk dijual atau digunakan.

Biaya pinjaman yang dikapitalisasi diterapkan dengan tarif kapitalisasi terhadap pengeluaran atas aset kualifikasi, yang merupakan rata-rata tertimbang biaya pinjaman atas saldo pinjaman selama periode kapitalisasi karena pinjaman tidak spesifik untuk memperoleh aset.

Semua biaya pinjaman lainnya diakui dalam laba rugi pada periode pada saat terjadinya.

o. Sewa

Sewa diklasifikasikan sebagai sewa pembiayaan jika sewa tersebut mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan aset. Sewa lainnya, yang tidak memenuhi kriteria tersebut, diklasifikasikan sebagai sewa operasi.

Sebagai lessor

Dalam sewa pembiayaan, jumlah terutang oleh lessee diakui sebagai piutang sebesar jumlah yang sama dengan investasi sewa neto Grup. Pengakuan penghasilan sewa pembiayaan dialokasikan pada periode akuntansi yang mencerminkan suatu tingkat pengembalian periodik yang konstan atas investasi bersih lessor.

Pendapatan sewa dari sewa operasi diakui sebagai pendapatan dengan dasar garis lurus selama masa sewa. Biaya langsung awal yang terjadi dalam proses negosiasi dan pengaturan sewa operasi ditambahkan dalam jumlah tercatat aset sewaan dan diakui dengan dasar garis lurus selama masa sewa.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

m. Fixed assets (continued)

The estimated useful lives, residual values and depreciation method are reviewed at each year end and the effect of any changes in estimate accounted for on a prospective basis.

An item of fixed assets is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of fixed assets is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the consolidated profit or loss.

n. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Capitalised borrowing costs are applied with a capitalisation rate to the expenditures on qualifying assets, which is the weighted average of the borrowing costs applicable to total outstanding borrowing during the period of capitalisation because loans are not specifically attributable to acquisition of the asset.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

o. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases, which do not meet these criteria, are classified as operating leases.

As lessor

Amounts due from lessee under finance leases are recorded as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

o. Sewa (lanjutan)

Sebagai lessee

Aset yang diperoleh melalui sewa pembiayaan dicatat pada awal masa sewa sebesar nilai wajar asset sewaan Grup yang ditentukan pada awal kontrak atau, jika lebih rendah, sebesar nilai kini dari pembayaran sewa minimum. Liabilitas kepada lessor disajikan di dalam laporan posisi keuangan konsolidasian sebagai liabilitas sewa pembiayaan.

Aset sewa pembiayaan disusutkan berdasarkan taksiran masa manfaat ekonomis yang sama dengan aset yang dimiliki sendiri atau disusutkan selama jangka waktu yang lebih pendek antara periode masa sewa dan umur manfaatnya.

Pembayaran sewa dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pengurangan dari liabilitas sewa sehingga mencapai suatu tingkat bunga yang konstan (tetap) atas saldo liabilitas. Beban keuangan dibebankan langsung ke laba rugi konsolidasian. Sewa kontijensi dibebankan pada periode terjadinya.

Pembayaran sewa operasi diakui sebagai beban dengan dasar garis lurus selama masa sewa, kecuali terdapat dasar sistematis lain yang dapat lebih mencerminkan pola waktu dari manfaat aset yang dinikmati pengguna. Sewa kontijensi diakui sebagai beban di dalam periode terjadinya.

Dalam hal insentif diperoleh dalam sewa operasi, insentif tersebut diakui sebagai liabilitas. Keseluruhan manfaat dari insentif diakui sebagai pengurangan dari biaya sewa dengan dasar garis lurus kecuali terdapat dasar sistematis lain yang lebih mencerminkan pola waktu dari manfaat yang dinikmati pengguna.

Jual dan sewa-balik

Aset yang dijual berdasarkan transaksi jual dan sewa-balik diperlakukan sebagai berikut:

Jika suatu transaksi jual dan sewa-balik merupakan sewa pembiayaan, selisih lebih hasil penjualan diatas nilai tercatat, tidak segera diakui sebagai pendapatan tetapi ditangguhkan dan diamortisasi selama masa sewa.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

o. Leases (continued)

As lessee

Assets held under finance leases are initially recognised as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statement of financial position as a finance lease obligation.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or where shorter, the term of the relevant lease.

Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly to the consolidated profit or loss. Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate amount of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Sale and leaseback

Assets sold under a sale and leaseback transaction are accounted for as follows:

If the sale and leaseback transaction results in a finance lease, any excess of sales proceeds over the carrying amount of the asset is deferred and amortised over the lease term.

p. Ijarah

Ijarah merupakan sewa menyewa obyek Ijarah tanpa perpindahan risiko dan manfaat yang terkait kepemilikan aset terkait, dengan atau tanpa Wa'ad untuk memindahkan kepemilikan dari pemilik (Mu'jur) kepada penyewa (Mustajir) pada saat-saat tertentu.

Beban sewa diakui selama masa akad pada saat manfaat atas aset telah diterima. Biaya provisi Ijarah dicatat sebagai biaya dibayar dimuka dan diamortisasi selama masa akad.

q. Aset takberwujud

Lisensi dan perangkat lunak dikapitalisasi berdasarkan biaya yang terjadi untuk memperoleh dan mempersiapkan aset hingga siap digunakan. Biaya ini diamortisasi dengan menggunakan metode garis lurus berdasarkan estimasi manfaat 3 - 8 tahun.

Biaya pengurusan perpanjangan dan pembaharuan legal hak atas tanah dikapitalisasi dan diamortisasi sepanjang umur hukum atau umur ekonomis tanah, mana yang lebih pendek.

r. Beban tangguhan

Biaya-biaya lain yang memenuhi kriteria pengakuan aset akan ditangguhan dan diamortisasi dengan metode garis lurus berdasarkan masa manfaatnya.

s. Penurunan nilai aset non-keuangan

Pada setiap akhir periode pelaporan, Grup menelaah nilai tercatat aset non-keuangan untuk menentukan apakah terdapat indikasi bahwa aset tersebut telah mengalami penurunan nilai. Kerugian akibat penurunan nilai diakui sebesar selisih antara nilai tercatat aset dengan nilai yang dapat diperoleh kembali dari aset tersebut.

Nilai yang dapat diperoleh kembali adalah nilai yang lebih tinggi antara nilai wajar dikurangi biaya untuk menjual dan nilai pakai aset. Dalam rangka mengukur penurunan nilai, aset dikelompokkan hingga unit terkecil yang menghasilkan arus kas terpisah.

Setiap tanggal pelaporan, aset non-keuangan yang telah mengalami penurunan nilai ditelaah untuk menentukan apakah terdapat kemungkinan pemulihan penurunan nilai. Pemulihan nilai langsung diakui dalam laba rugi konsolidasian, tetapi tidak boleh melebihi akumulasi rugi penurunan nilai yang telah diakui sebelumnya.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

p. Ijarah

Ijarah is a lease to rent an Ijarah object without transfer of risks and benefits related to ownership of related assets, with or without Wa'ad to transfer ownership from the owner (Mu'jur) to the tenant (Mustajir) at a certain moment.

Rental expense is recognised during the contract period when the benefit of the asset has been received. Ijarah provision fees are recorded as prepaid expenses and amortised over the contract period.

q. Intangible assets

Software and licenses are capitalised on the basis of the cost incurred to acquire and to prepare the assets for intended use. These costs are amortised using the straight-line method over the estimated useful life of 3 - 8 years.

The cost of arranging legal extension and renewal of land rights is capitalised and amortised over the legal life or economic life of land, which ever is shorter.

r. Deferred charges

Other charges that meet the asset recognition criteria are deferred and amortised using the straight-line method over their beneficial periods.

s. Impairment of non-financial asset

At the end of each reporting period, the Group reviews the carrying amounts of non-financial asset to determine whether there is any indication that the assets have suffered an impairment loss. An impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount.

Recoverable amount is the higher of its fair value less cost to sell and the value in use of the assets. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows.

At each reporting date, non-financial assets that suffered impairment are reviewed for possible reversal of the impairment. Recoverable amount is immediately recognised in the consolidated profit or loss, but not in excess of any accumulated impairment loss previously recognised.

t. Sukuk

Sukuk diakui sebesar nilai nominal, disesuaikan dengan premium atau diskonto dan biaya transaksi terkait. Perbedaan antara nilai tercatat dan nilai nominal diakui pada laporan laba rugi sebagai beban transaksi sukuk menggunakan metode suku bunga efektif.

Imbalan hasil terkait dibebankan dalam laporan laba rugi konsolidasi sebagai biaya keuangan.

Sukuk, setelah disesuaikan dengan premium atau diskonto dan biaya transaksi yang belum diamortisasi, disajikan sebagai bagian dari liabilitas.

u. Imbalan kerja

Kewajiban pensiun

Grup memiliki berbagai program pensiun sesuai dengan undang-undang dan peraturan ketenagakerjaan yang berlaku dan kebijakan Grup. Grup memiliki program imbalan pasti dan iuran pasti.

Program iuran pasti

Program pensiun iuran pasti adalah sebuah program pensiun dimana Grup akan membayar iuran tetap kepada sebuah entitas yang terpisah (dana pensiun) dan tidak memiliki kewajiban hukum atau konstruktif untuk membayar kontribusi lebih lanjut apabila dana pensiun tersebut tidak memiliki aset yang memadai untuk membayar seluruh imbalan karyawan yang berhubungan dengan pelayanan yang diberikan oleh karyawan pada tahun kini dan sebelumnya.

Program imbalan pasti

Program pensiun imbalan pasti adalah program pensiun yang menentukan jumlah imbalan pensiun yang akan diberikan, biasanya berdasarkan pada satu faktor atau lebih seperti usia, masa kerja atau kompensasi.

Kewajiban program pensiun imbalan pasti yang diakui di laporan posisi keuangan konsolidasian adalah nilai kini kewajiban imbalan pasti pada tanggal laporan posisi keuangan konsolidasian dikurangi nilai wajar aset program. Kewajiban imbalan pasti dihitung setiap tahun oleh aktuaris independen dengan menggunakan metode *projected-unit-credit*. Nilai kini kewajiban imbalan pasti ditentukan dengan mendiskontokan estimasi arus kas keluar di masa depan dengan menggunakan tingkat bunga obligasi pemerintah dalam mata uang yang sama dengan mata uang imbalan yang akan dibayarkan dan waktu jatuh temponya kurang lebih sama dengan kewajiban yang bersangkutan.

t. Sukuk

Sukuk is recognised initially at nominal value, adjusted with premium or discount and the related transaction costs incurred. Any differences between carrying amount and nominal value is recognised in the profit or loss as sukuk transaction costs using the effective interest method.

The related return element is charged to the consolidated profit or loss as finance cost.

Sukuk, adjusted with premium or discount and unamortised transaction costs, is presented as part of liabilities.

u. Employee benefits

Pension obligations

The Group has various pensions schemes in accordance with prevailing labor-related laws and regulations and the Group's policy. The Group has both defined benefit and defined contribution plans.

Defined contribution plan

A defined pension contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity (a pension fund) and will have no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior years.

Defined benefits plan

A defined pension benefit plan is a pension plan that defines an amount of pension benefit to be provided, usually as a function of one or more factors, such as age, years of service or compensation.

The liability recognised in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the consolidated statement of financial position date, less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected-unit-credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the interest rates of government bonds that are denominated in the currency in which the benefit will be paid and that have terms to maturity approximating the terms of the related pension liability.

Contingent liabilities are not recognised in the consolidated financial statements. They are disclosed in the notes to consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognised in the consolidated financial statements but are disclosed in the notes to consolidated financial statements when an inflow of economic benefits is probable.

y. Perpajakan

Beban pajak penghasilan terdiri dari pajak penghasilan kini dan pajak penghasilan tangguhan. Pajak tersebut diakui dalam laporan laba rugi konsolidasian, kecuali apabila pajak tersebut terkait dengan transaksi atau kejadian yang langsung diakui ke ekuitas atau penghasilan komprehensif lain. Dalam hal ini, pajak tersebut diakui langsung pada ekuitas atau penghasilan komprehensif lain.

Grup menggunakan metode liabilitas neraca (*balance sheet liability method*) pada akuntansi pajak tangguhan yang timbul akibat perbedaan temporer yang ada antara aset dan liabilitas atas dasar pajak dengan nilai tercatat aset dan liabilitas dalam laporan keuangan konsolidasian. Untuk masing-masing entitas anak yang dikonsolidasi, aset atau liabilitas pajak tangguhan disajikan dalam jumlah bersih.

Beban pajak kini dihitung berdasarkan peraturan perpajakan yang berlaku atau secara substantif telah berlaku pada akhir periode pelaporan. Manajemen secara periodik mengevaluasi posisi yang dilaporkan di Surat Pemberitahuan Tahunan (SPT) sehubungan dengan situasi dimana aturan pajak yang berlaku membutuhkan interpretasi. x. Frequent flyer programme (continued)

The deferment of revenue from issuance or selling of Garuda Miles is recorded as unearned revenue. Subsequently, the unearned revenue is measured at its fair value by taking into account the proportion of points awarded that are expected to expire (breakage) based on historical trends.

y. Taxation

The income tax expense is comprises of current and deferred income tax. Tax is recognised in the consolidated statements of profit or loss, except to the extent that it relates to items recognised directly in equity or other comprehensive income. In this case, the tax is also recognised directly in equity or other comprehensive income.

The Group applies the balance sheet liability method of deferred tax accounting which arises on temporary differences between tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. For each of the consolidated subsidiaries, the deferred tax assets or liabilities are shown at the applicable net amounts.

Deferred income tax is determined using tax rates based on laws that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred tax asset is recognised or the deferred tax liability is settled.

Deferred tax assets are recognised to the extent it is probable that future taxable profits will be available against which the temporary differences can be utilised.

The current income tax charge is calculated on the basis of the tax laws enacted or substantially enacted at the reporting date. Management periodically evaluates positions taken in its annual tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes a provision, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

z. Laba/(rugi) per saham

Laba/(rugi) per saham dasar dihitung dengan membagi laba/(rugi) bersih yang dapat diatribusikan kepada pemilik entitas induk dengan jumlah rata-rata tertimbang saham yang beredar pada periode yang bersangkutan.

Laba bersih per saham dilusian dihitung dengan menyesuaikan jumlah rata-rata terimbang saham biasa yang beredar dengan dampak dari semua efek berpotensi saham biasa yang dilutif yang diterbitkan oleh Perusahaan.

aa. Pelaporan segmen

Grup melakukan segmentasi pelaporan berdasarkan informasi keuangan yang digunakan oleh pengambil keputusan operasi utama dalam mengevaluasi kinerja segmen dan menentukan alokasi sumber daya yang dimilikinya. Direksi adalah pengambil keputusan operasional Grup. Segmentasi berdasarkan sifat usaha. Seluruh transaksi antar segmen telah dieliminasi.

Pendapatan, beban, hasil, aset dan liabilitas segmen termasuk item-item yang dapat diatribusikan langsung kepada suatu segmen serta item-item yang dapat dialokasikan dengan dasar yang sesuai dengan segmen tersebut. Segmen ditentukan sebelum saldo dan transaksi antar perusahaan dieliminasi sebagai bagian dari proses konsolidasi.

3. PERTIMBANGAN AKUNTANSI SIGINIFIKAN, ESTIMASI DAN ASUMSI

Penyusunan laporan keuangan konsolidasian Grup mensyaratkan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan atas pendapatan, beban, aset dan liabilitas, serta pengungkapan liabilitas kontingen, pada akhir periode pelaporan. Namun, ketidakpastian estimasi dan asumsi ini dapat menyebabkan hasil yang memerlukan penyesuaian material atas nilai tercatat aset atau liabilitas yang terpengaruh di masa mendatang.

Pertimbangan, estimasi dan asumsi berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Grup yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian.

a. Pertimbangan penting dalam penerapan kebijakan akuntansi

Komitmen sewa operasi - Sebagai lessee

Grup mengadakan perjanjian sewa komersial untuk pesawat. Grup menetapkan berdasarkan evaluasi atas substansi syarat dan kondisi yang ada dalam perjanjian, bahwa pihak *lessor* menanggung seluruh risiko secara signifikan dan manfaat kepemilikan atas pesawat sehingga perjanjian sewa diakui sebagai sewa operasi.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

z. Earnings/(loss) per share

Basic earnings/(loss) per share are computed by dividing net profit/(loss) attributable to owners of the Company by the weighted average number of outstanding shares during the period.

Diluted earnings per share are computed by adjusting the weighted average number of outstanding ordinary shares to assume conversion of all dilutive potential ordinary shares issued by the Company.

aa. Segment reporting

The Group segments its financial reporting based on the financial information used by the chief operating decision-maker in evaluating the performance of segments and in the allocation of resources. Board of Directors is the Group's chief operating decision-maker. The segments are based on the nature of business. All transactions between segments have been eliminated.

Segment revenue, expenses, results, assets and liabilities include items directly attributable to a segment, as well as those that can be allocated on a reasonable basis to that segment. They are determined before intragroup balances and intra-group transactions are eliminated as part of the consolidation process.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these estimates and assumptions could result in outcomes that require a material adjustment to the carrying amounts of assets or liabilities affected in future periods.

The following judgments, estimates and assumptions were made by management in the process of applying the Group's accounting policies and have the most significant effects on the amounts recognised in the consolidated financial statements.

a. Critical judgements in applying accounting policies

Operating lease commitments - As lessee

The Group has entered into commercial leases on its aircraft. The Group has determined based on an evaluation of the substance of the terms and conditions of the arrangements, that the lessor retains all the significant risks and rewards of ownership of these aircrafts and therefore accounts for the contracts as operating leases.

**3. PERTIMBANGAN AKUNTANSI SIGINIFIKAN, ESTIMASI

a. Pertimbangan penting dalam penerapan kebijakan akuntansi (lanjutan)

Komitmen sewa operasi - Sebagai lessee (lanjutan)

Grup juga mengadakan perjanjian jual dan sewa-balik untuk pesawat tertentu yang baru diperoleh. Grup menetapkan berdasarkan evaluasi atas substansi syarat dan kondisi yang ada dalam perjanjian, bahwa transaksi jual dan sewa-balik merupakan sewa operasi dan transaksi tersebut dilakukan pada nilai wajar.

Komitmen sewa operasi pesawat tersebut diungkapkan dalam Catatan 48.

Penentuan mata uang fungsional

Dalam proses penerapan kebijakan akuntansi Grup, manajemen harus membuat pertimbangan dalam penentuan mata uang fungsional Perusahaan dan setiap entitas anggota Grup, yang memiliki pengaruh signifikan terhadap jumlah yang dicatat dalam laporan keuangan konsolidasian.

Mata uang fungsional dari masing-masing entitas di dalam Grup adalah mata uang masing-masing dari lingkungan ekonomi utama dimana entitas tersebut beroperasi. Faktor utama adalah mata uang yang mempengaruhi secara signifikan harga jual barang dan jasa dari negara yang kekuatan persaingan dan peraturannya sebagian besar menentukan harga jual barang dan jasa; dan mata uang yang terutama mempengaruhi beban usaha dan biaya lainnya. Faktor lainnya adalah mata uang atas dana yang dihasilkan dari kegiatan pembiayaan.

Ketidakpastian kewajiban perpajakan

Dalam situasi tertentu, Grup tidak dapat menentukan secara pasti jumlah utang pajak kini atau masa mendatang atau jumlah klaim restitusi pajak yang dapat terpulihkan karena proses pemeriksaan yang masih berlangsung atau negosiasi dengan otoritas perpajakan. Ketidakpastian timbul terkait dengan interpretasi dari peraturan perpajakan yang kompleks dan jumlah dan waktu dari penghasilan kena pajak di masa depan. Dalam menentukan jumlah yang harus diakui terkait dengan utang pajak yang tidak pasti atau klaim restitusi pajak yang dapat terpulihkan terkait dengan ketidakpastian posisi perpajakan, Grup menerapkan pertimbangan yang sama yang akan digunakan dalam menentukan jumlah provisi yang harus diakui sesuai dengan PSAK 57, "Provisi, Liabilitas Kontinjenji, dan Aset Kontinjenji" dan PSAK 46, "Pajak Penghasilan". Grup membuat analisa untuk semua ketidakpastian posisi perpajakan untuk menentukan jika utang pajak atas manfaat pajak yang tidak pasti atau cadangan atas klaim restitusi pajak yang tidak dapat terpulihkan harus diakui.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,
ESTIMATES AND ASSUMPTIONS** (continued)

a. *Critical judgements in applying accounting policies* (continued)

Operating lease commitments - As lessee (continued)

The Group has also entered into sale and leaseback of certain newly acquired aircrafts. The Group has determined, based on an evaluation of the substance of the terms and conditions of the arrangements, that sale and leaseback transaction results in an operating lease, and the transaction is established at fair value.

The operating lease commitments are disclosed in Note 48.

Determination of functional currency

In the process of applying the Group's accounting policies, management has to make a judgment on the determination of the functional currency of the Company and each of the Group's entities which has significant effects on the amounts recognised in consolidated financial statements.

The functional currency of each entity within the Group is the currency of the primary economic environment in which each entity operates. Key factors are the currency that mainly influences the sales prices for goods and services of the country whose competitive forces and regulations mainly determine the sales prices of its goods and services; and the currency that mainly influences operating expenses and other costs. Another factor is the currency in which funds from financing activities are generated.

Uncertainty of tax exposures

In certain circumstances, the Group may not be able to determine the exact amount of its current or future tax liabilities or recoverable amount of the claim for tax refund due to ongoing investigations by, or negotiation with, the taxation authority. Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. In determining the amount to be recognised in respect of an uncertain tax liability or the recoverable amount of the claim for tax refund related to uncertain tax positions, the Group applies similar considerations as it would use in determining the amount of a provision to be recognised in accordance with PSAK 57, "Provisi, Contingent Liabilities and Contingent Assets" and PSAK 46, "Income Taxes". The Group makes an analysis of all uncertain tax positions to determine if a tax liability for uncertain tax benefit or a provision for unrecoverable claim for tax refund should be recognised.

3. PERTIMBANGAN AKUNTANSI SIGINIFIKAN, ESTIMASI
DAN ASUMSI (lanjutan)

b. Estimasi dan asumsi akuntansi yang signifikan

Pengakuan pendapatan

GMFAA, entitas anak, mengakui pendapatan dari pekerjaan dalam progress berdasarkan metode persentase penyelesaian. Asumsi signifikan diperlukan dalam menentukan tahapan penyelesaian (persentase penyelesaian) dan jumlah estimasi pendapatan. Dalam membuat asumsi, GMFAA melakukan evaluasi berdasarkan realisasi di waktu yang lama.

Penyisihan penurunan nilai piutang

Grup menilai penurunan nilai piutang pada setiap tanggal pelaporan. Grup menentukan kerugian penurunan nilai piutang dengan mempertimbangkan beberapa faktor yaitu kesulitan keuangan yang signifikan dari debitur, kemungkinan debitur mengalami pailit, reorganisasi keuangan yang dilakukan oleh debitur, serta wanprestasi atau tunggakan pembayaran. Penyisihan penurunan nilai dibuat berdasarkan estimasi jumlah yang tidak dapat terpulihkan yang ditentukan dari rekam jejak tunggakan masa lalu.

Penurunan nilai aset nonkeuangan

Aset tetap dan aset tidak lancar lainnya ditelaah untuk penurunan nilai apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa jumlah tercatat aset melebihi nilai yang dapat diperoleh kembali. Nilai yang dapat diperoleh kembali suatu aset atau unit penghasil kas ditentukan berdasarkan yang lebih tinggi antara harga jual bersih dan nilai pakai, dihitung berdasarkan asumsi dan estimasi manajemen.

Estimasi masa manfaat aset tetap

Grup mengestimasi masa manfaat dari aset tetap berdasarkan ekspektasi utilisasi dari aset dengan didukung rencana dan strategi usaha yang juga mempertimbangkan perkembangan teknologi di masa depan dan perilaku pasar. Estimasi masa manfaat aset tetap didasarkan pada penelaahan Grup secara kolektif terhadap praktik industri, evaluasi teknis internal dan pengalaman untuk aset yang setara. Estimasi masa manfaat ditelaah paling sedikit setiap akhir tahun pelaporan dan diperbarui jika ekspektasi berbeda dari estimasi sebelumnya dikarenakan pemakaian dan kerusakan fisik, keusangan secara teknis atau komersial dan hukum atau pembatasan lain penggunaan aset. Namun, ada kemungkinan, hasil operasi di masa depan dapat dipengaruhi secara material oleh perubahan-perubahan dalam estimasi yang diakibatkan oleh perubahan faktor-faktor yang disebutkan di atas.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS,
ESTIMATES AND ASSUMPTIONS (continued)

b. *Critical accounting estimates and assumptions*

Revenue recognition

GMFAA, a subsidiary, recognises revenues from the project in progress based on percentage of completion method. Critical assumptions are required in determining the stage of completion (percentage of completion) and the amount of estimated income. In making assumptions, GMFAA evaluates them based on past realisation.

Provision for impairment of receivables

The Group assesses its receivables for impairment at each reporting date. The Group determines the impairment losses of receivables by considering significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy, financial reorganisation and default or delinquency in payment. An allowance for impairment is made based on the estimated irrecoverable amount determined by reference to past default experience.

Impairment of non-financial assets

Fixed assets and other non-current assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset exceeds its recoverable amount. The recoverable amount of an asset or cash generating unit is determined based on the higher of its fair value less costs to sell and its value in use, calculated on the basis of management's assumptions and estimates.

Estimated useful lives of fixed assets

The Group estimates the useful lives of its property and equipment based on expected asset utilisation as anchored on business plans and strategies that also consider expected future technological developments and market behavior. The estimation of the useful lives of fixed assets is based on the Group's collective assessment of industry practice, internal technical evaluation and experience with similar assets. The estimated useful lives are reviewed at least each financial year end and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limitations on the use of the assets. It is possible, however, that future results of operations could be materially affected by changes in the estimates brought about by changes in the factors mentioned above.

b. Estimasi dan asumsi akuntansi yang signifikan (lanjutan)

Estimasi masa manfaat aset tetap (lanjutan)

Jumlah dan saat beban dicatat setiap periode akan terpengaruh oleh perubahan atas faktor-faktor dan kondisi tersebut. Pengurangan dalam estimasi masa manfaat dari aset tetap Grup akan meningkatkan beban usaha dan menurunkan aset tidak lancar yang tercatat. Penambahan dalam estimasi masa manfaat aset tetap Grup menurunkan beban usaha dan meningkatkan aset tidak lancar yang tercatat.

Nilai wajar pada aset tetap dan properti investasi

Nilai wajar dari aset tetap dan properti investasi ditentukan menggunakan teknik valuasi yang dilakukan oleh penilai independen profesional yang memiliki kualifikasi yang relevan dan memiliki pengalaman yang berhubungan dengan aset tetap dan segmen properti investasi yang akan dinilai. Setiap perubahan dalam asumsi penilaian yang dilakukan oleh penilai independen eksternal akan berdampak pada nilai tercatat aset tetap dan properti investasi. Informasi tambahan diungkapkan di Catatan 13 dan 14.

Provisi pengembalian dan pemeliharaan pesawat

Sebelum pengembalian pesawat yang disewa oleh entitas Grup kepada *lessor*, entitas Grup diharuskan untuk memenuhi persyaratan pengembalian sewa yang dapat mencakup penyelesaian perawatan tertentu untuk kerangka pesawat dan mesin serta penataan kembali kursi di dalam pesawat. b. Critical accounting estimates and assumptions (continued)

Estimated useful lives of fixed assets (continued)

The amounts and timing of recorded expenses for any period are affected by changes in these factors and circumstances. A reduction in the estimated useful lives of the Group's fixed asset increases the recorded operating expenses and decreases recorded non-current assets. An extension in the estimated useful lives of the Group's fixed assets decreases the recorded operating expenses and increases non-current assets.

Fair value of fixed assets and investment property

The fair value of fixed assets and investment property is determined by using valuation techniques which were applied by independent professionally qualified valuers who hold a recognised relevant professional qualification and have recent experience in the locations and fixed assets segment of the investment properties valued. Each change in assumption and valuation performed by external independent appraisers would affect the carrying amount of the Group's assets. Additional information is disclosed in Note 13 and 14.

Provision for aircraft return and maintenance cost

Prior to the return of aircraft leased by the Group entities to the lessor, the Group entities are required to fulfil certain lease return conditions which may include the completion of certain maintenance activities to the airframe and engines and the reconfiguration of seats within the aircraft. The provision for lease return costs for these leased aircraft is determined based on the best estimate of the costs that will be incurred to fulfil the stipulated lease return conditions.

Aircraft maintenance and overhaul expenditure under power-by-hour agreements

The Group entered into several power-by-hour ("PBH") engine maintenance agreements with original equipment manufacturers of aircraft engines. The monthly payments are based on the number of flying hours flown.

The proportion of the amount to be expensed off and capitalised is determined based on the best estimate of the proportion of day-to-day maintenance compared to maintenance which extends the useful lives of the engine.

**b. Estimasi dan asumsi akuntansi yang signifikan
(lanjutan)**

Liabilitas imbalan kerja

Nilai kini kewajiban imbalan kerja tergantung pada sejumlah faktor yang ditentukan dengan menggunakan sejumlah asumsi aktuarial. Asumsi yang digunakan dalam menentukan biaya bersih untuk pensiun termasuk tingkat pengembalian jangka panjang yang diharapkan atas investasi dana program pensiun iuran pasti dan tingkat diskonto yang relevan. Setiap perubahan dalam asumsi ini akan berdampak pada nilai tercatat kewajiban imbalan kerja.

Asumsi penting lainnya untuk kewajiban imbalan kerja sebagian didasarkan pada kondisi pasar saat ini.

Pemulihan dari aset pajak tangguhan

Grup melakukan penelaahan atas nilai tercatat aset pajak tangguhan pada setiap akhir periode pelaporan dan mengurangi nilai tersebut sampai dengan nilai dimana kemungkinan besar penghasilan kena pajak akan tersedia untuk penggunaan seluruh atau sebagian dari aset pajak tangguhan tersebut. Penelaahan Grup atas pengakuan aset pajak tangguhan untuk perbedaan temporer yang dapat dikurangkan dan rugi fiskal yang masih dapat dimanfaatkan didasarkan atas tingkat dan waktu dari penghasilan kena pajak yang ditaksirkan untuk periode pelaporan berikutnya. Taksiran ini berdasarkan hasil pencapaian Grup di masa lalu dan ekspektasi di masa depan terhadap pendapatan dan beban, sebagaimana juga dengan strategi perencanaan perpajakan di masa depan. Namun, tidak terdapat kepastian bahwa Grup dapat menghasilkan penghasilan kena pajak yang cukup untuk memungkinkan penggunaan sebagian atau seluruh bagian dari aset pajak tangguhan tersebut.

**3. SIGNIFICANT ACCOUNTING JUDGEMENTS,
ESTIMATES AND ASSUMPTIONS** (continued)

**b. Critical accounting estimates and assumptions
(continued)**

Liabilities for employee benefits

The present value of the employee benefits obligation depends on a number of factors that are determined on a number of actuarial assumptions. The assumptions used in determining the net cost for pensions include the expected long-term rate of return on investment of the defined contribution pension fund and the relevant discount rate. Any changes in these assumptions will impact the carrying amount of the employee benefits obligation.

Other key assumptions for the employee benefits obligation are based in part on current market conditions.

Recoverability of deferred tax assets

The Group reviews the carrying amounts of deferred tax assets at the end of each reporting period and reduces these to the extent that it is probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilised. The Group's assessment on the recognition of deferred tax assets on deductible temporary differences and tax loss carried forward is based on the level and timing of forecasted taxable income of the subsequent reporting period. This forecast is based on the Group's past results and future expectations on revenues and expenses as well as future tax planning strategies. However, there is no assurance that the Group will generate sufficient taxable income to allow all or part of the deferred tax assets to be utilised.

Beban penyusutan yang dibebankan ke dalam laba/(rugi) sebesar USD 181.972.648 (31 Desember 2018: USD 177.964.733).

Pelepasan aset tetap adalah sebagai berikut:

	<u>31/12/2019</u>	<u>31/12/2018</u>	
Nilai tercatat	-	8,043	<i>Net carrying value</i>
Hasil penjualan setelah dikurangi biaya penjualan	17,775	16,022	<i>Proceeds net of selling expenses</i>
Keuntungan pelepasan aset tetap	17,775	7,979	<i>Gain on disposal of fixed assets</i>

Penilaian atas nilai wajar aset tetap berupa pesawat yang disajikan dalam komponen terpisah yang terdiri dari rangka pesawat dan mesin, serta tanah dan bangunan dilakukan oleh KJPP Iskandar & Rekan dalam laporannya tertanggal 18 Februari 2020. Metode penilaian yang digunakan adalah pendekatan nilai pasar dan biaya.

Rincian pesawat, tanah dan bangunan Grup serta informasi mengenai hirarki nilai wajar per 31 Desember 2019 dan 2018, adalah sebagai berikut:

	<u>Level 1/Level 1</u>	<u>Level 2/Level 2</u>	<u>Level 3/Level 3</u>	
Tanah	-	√	-	<i>Land</i>
Bangunan	-	-	√	<i>Building</i>
Pesawat	-	√	-	<i>Aircraft</i>

Tidak ada perpindahan antara level 1 dan level 2 selama periode tersebut.

Selisih nilai wajar aset dengan nilai tercatat dikurangi dengan pajak tangguhan, dibukukan pada penghasilan komprehensif lain dalam ekuitas pada bagian surplus revaluasi.

Jika pesawat, tanah, dan bangunan dicatat sebesar biaya perolehan, nilai tercatatnya adalah sebagai berikut:

	<u>31/12/2019</u>	<u>31/12/2018</u>	
Pesawat	107,810,299	133,324,615	<i>Aircraft</i>
Tanah	50,860,667	51,221,059	<i>Land</i>
Bangunan	104,675,487	100,708,949	<i>Building</i>
	<u>263,346,453</u>	<u>285,254,623</u>	

Manajemen berpendapat bahwa tidak ada perbedaan yang signifikan antara nilai wajar dan nilai tercatat aset, jika aset lainnya (selain pesawat, tanah dan bangunan) diukur menggunakan nilai wajar.

The revaluation of aircraft presented under separate components consisting of airframes and engines, land and buildings was performed by KJPP Iskandar & Rekan as stated in its report dated 18 February 2020. Appraisal method was based on the market value and cost approach.

Details of the Group's aircraft, land and building and information about the fair value hierarchy as at 31 December 2019 and 2018, are as follows:

	<u>Level 1/Level 1</u>	<u>Level 2/Level 2</u>	<u>Level 3/Level 3</u>	
Tanah	-	√	-	<i>Land</i>
Bangunan	-	-	√	<i>Building</i>
Pesawat	-	√	-	<i>Aircraft</i>

There was no transfer between level 1 and level 2 during the period.

The difference between the fair value and carrying amount of the assets net of tax, was recorded in other comprehensive income in equity as revaluation reserve.

If aircraft, land, and building were stated at the historical cost basis, the carrying amount would be as follows:

Management believes that there is no significant difference between the fair value and carrying value of fixed assets, if those assets (excluding aircraft, land and building) have been measured at fair value.

Surplus revaluasi timbul dari revaluasi pesawat, tanah dan bangunan di aset tetap. Ketika pesawat, tanah dan bangunan yang telah dinilai kembali tersebut dijual, porsi surplus revaluasi yang terkait dengan aset dipindahkan langsung ke defisit. Bagian penghasilan komprehensif lain yang termasuk dalam surplus revaluasi selanjutnya tidak akan direklasifikasi ke laba rugi.

The revaluation reserve arises on the revaluation of aircraft, land and buildings in the fixed assets. When revalued aircraft, land and buildings are sold, the portion of the revaluation reserve that related to that asset is transferred directly to deficit. Items of other comprehensive income included in revaluation reserve will not be reclassified subsequently to profit or loss.

h. PT Merpati Nusantara Airlines ("MNA")

Perusahaan memiliki piutang jangka panjang kepada PT Merpati Nusantara Airlines (MNA) atas jasa perawatan pesawat. MNA merupakan entitas afiliasi karena kepemilikan pemerintah.

Pada bulan Maret 2009, Perusahaan dan MNA telah menandatangani Nota Kesepahaman dimana kedua belah pihak setuju bahwa MNA akan memenuhi liabilitasnya kepada Perusahaan sebesar USD 33.273.256 dan Rp 999.003.673 dalam jangka waktu 13 (tiga belas) tahun terhitung sejak ditandatanganinya perjanjian Restrukturisasi Utang. Pada tanggal 28 Februari 2012, nota kesepahaman ini telah diperpanjang sampai dengan 11 Maret 2013. Di samping itu, pada tanggal 10 Januari 2012, Perusahaan juga memperoleh surat dari Kementerian Negara Badan Usaha Milik Negara ("BUMN"), yang menyatakan bahwa utang Merpati kepada Perusahaan akan dilakukan penjadwalan kembali pembayaran secara cicilan dimulai pada tahun 2016.

Pada tanggal 6 Februari 2018, Hakim Pengawas memutuskan bahwa saat ini MNA berada dalam proses PKPU Tetap sampai dengan 17 Oktober 2018 dan meminta MNA untuk menyusun Proposal Perdamaian yang dapat disepakati para Kreditur. Dikarenakan kondisi MNA yang telah berhenti beroperasi dan hampir seluruh aset MNA telah dijaminkan kepada Kreditur Separatis, maka MNA melakukan pencarian Mitra Strategis untuk mendukung MNA dapat beroperasi kembali.

Sepanjang periode April 2018 hingga Juni 2018, MNA menyelenggarakan Program Pencarian investor dan kemudian berhasil mendapatkan investor potensial (yang disebut sebagai "Mitra Strategis") yang akan mendukung MNA agar dapat beroperasi kembali dengan melakukan penyertaan modal tambahan yang akan digunakan dalam pembelian armada, suku cadang dan infrastrukturnya.

Mitra Strategis akan melakukan penyertaan modal pasca diperolehnya Putusan Homologasi dan seluruh persetujuan yang dibutuhkan. Atas penyertaan modal tersebut, Pemegang Saham lama dan Kreditur hasil konversi akan terdilusi menjadi sebesar 12% sedangkan Mitra Strategis akan memperoleh kepemilikan atas saham MNA sebesar 88%. Dalam kaitannya dengan Garuda sebagai salah satu Kreditor Konkuren, MNA mengajukan usulan Rancangan Proposal Perdamaian dengan mengkonversi utang Garuda menjadi saham tanpa deviden. Hal tersebut berdampak pada kepemilikan saham Garuda yang kemudian terdilusi dari yang semula 3,01%, pasca PKPU menjadi 0,8%. Namun, hasil keputusan akhir akan tetap diambil oleh pemegang saham mayoritas dalam hal ini adalah Kementerian BUMN.

h. PT Merpati Nusantara Airlines ("MNA")

The Company has long term receivables from PT Merpati Nusantara Airlines ("MNA") which arose from the maintenance of aircrafts. MNA is an affiliated entity due to government ownership.

In March 2009, the Company and MNA have signed a Memorandum of Understanding where both parties agreed that MNA will settle its liabilities to the Company of USD 33,273,256 and Rp 999,003,673 in 13 (thirteen) years since the signing of Debt Restructuring Agreement. On 28 February 2012, this memorandum of understanding was extended until 11 March 2013. Moreover, on 10 January 2012, the Company received a letter from the Ministry of State-Owned Enterprise ("SOE"), which stated that the loan owed by Merpati to the Company will be rescheduled with installment payments to start by 2016.

On 6 February 2018, the Judge determined that currently MNA was in the PKPU Permanent process until 17 October 2018 and asked MNA to prepare a Reconciliation Proposal that could be agreed upon by the Creditors. Due to the MNA having stopped operating and almost all of MNA's assets having been pledged to the Separatist Creditors, the MNA is seeking a Strategic Partners to support MNA to be able to operate again.

Throughout the April 2018 period until June 2018, the MNA organised an Investor Search Program and then managed to get potential investors (called "Strategic Partners") who would support the MNA to be able to operate again by taking additional capital to be used in fleet purchases, spare parts and infrastructure.

Strategic Partners will make available post-deposit capital obtained by the Homologation Decision and all necessary approvals. Upon depositing the capital, the existing Shareholders and Convertible Creditors will be diluted to 12% while the Strategic Partners will obtain 88% ownership of MNA shares. In relation to Garuda as one of the concurrent creditors, MNA submitted a draft of Reconciliation Proposal by converting Garuda debt into shares without dividends. This had an impact on Garuda's share ownership which was subsequently diluted from the original 3.01% after PKPU to 0.8%. However, the results of the final decision will still be taken by the majority shareholders, which in this case is the Ministry of SOE.

50. MANAJEMEN RISIKO KEUANGAN (lanjutan)

Faktor risiko keuangan (lanjutan)

a. **Risiko pasar** (lanjutan)

- (i) Risiko nilai tukar mata uang non-fungsional (lanjutan)

Pada tanggal 31 Desember 2019 dan 2018, sensitivitas untuk perubahan 100 *basis point* nilai tukar mata uang fungsional (USD) terhadap saldo mata uang non-fungsional yang signifikan pada akhir periode pelaporan, dengan variabel lain konstan terhadap laba setelah pajak Grup adalah sebagai berikut:

	Perubahan kurs/ Changes in Currency rate	Dampak terhadap laba/(rugi) setelah pajak/Effect on profit/(loss) after tax	
		31/12/2019	31/12/2018

Selain mata uang fungsional
Penguatan/(pelemahan)

Rupiah	1%	(7,062,097)	(6,590,586)
Renminbi China	1%	32,619	78,965
Yen Jepang	1%	683	671

- (ii) Risiko nilai bahan bakar pesawat

Laba Grup dipengaruhi oleh perubahan harga bahan bakar pesawat. Strategi Grup untuk meminimalisasi risiko fluktuasi kenaikan harga bahan bakar pesawat adalah melakukan lindung nilai arus kas dengan instrumen lindung nilai "forward fuel hedge". Grup menerapkan akuntansi lindung nilai arus kas untuk instrumen lindung nilai ini karena memiliki efektivitas lindung nilai yang tinggi.

Sensitivitas risiko harga bahan bakar pesawat dianalisa berdasarkan asumsi bahwa semua faktor tetap termasuk biaya-biaya lain dan uplifted volume. Analisa risiko harga bahan bakar pesawat berdasarkan kontrak penerbangan regular dan haji yang outstanding pada periode pelaporan. Jika terjadi kenaikan/(penurunan) harga sebesar USD 1 per barrel, sebagai akibat perubahan harga bahan bakar, maka laba setelah pajak Grup akan mengalami (penurunan)/kenaikan USD 4.952.055 (31 Desember 2018: rugi setelah pajak akan mengalami kenaikan/(penurunan) USD 6.971.393).

50. FINANCIAL RISK MANAGEMENT (continued)

Financial risk factors (continued)

a. **Market risk** (continued)

- (i) Non-functional currency exchange risk (continued)

As at 31 December 2019 and 2018, the sensitivity to a 100 basis point change in exchange rate of functional currency of USD against significant outstanding non-functional currency at the end of reporting period, with other variables held constant, of the Group's profit after tax are as follows:

Other functional currency rates
Strengthening/(weakening)
Rupiah
Chinese Renminbi
Japanese Yen

- (ii) Aircraft fuel price risk

The Group's earnings are affected by changes in the price of aircraft fuel. The Group's strategy for minimising the risk on fluctuation in aircraft fuel price is to use cash flow hedge with a hedge instruments "forward fuel hedge". The Group has applied cash flow hedge accounting to these derivatives as they are considered to be highly effective hedging instruments.

The aircraft fuel price risk sensitivity analysis is based on the assumption that all other factors, such as uplifted volume and other costs remain constant. The aircraft fuel price risk analysis is based on regular and hajj flight contracts that are still outstanding at reporting date. If the aircraft fuel price had increased/(decreased) in price of USD 1 per barrel, as the result of change in price of fuel, the profit after tax of the Group would have (decreased)/increased by USD 4,952,055 and (31 December 2018: loss after tax would increase.)/(decrease) by USD 6,971,393).

50. MANAJEMEN RISIKO KEUANGAN (lanjutan)

Faktor risiko keuangan (lanjutan)

a. Risiko pasar (lanjutan)

(iii) Risiko tingkat suku bunga

Risiko suku bunga Grup terutama timbul dari pinjaman dalam mata uang Dolar AS dan Rupiah. Risiko suku bunga dari kas tidak signifikan dan semua instrumen keuangan lainnya tidak dikenakan bunga. Pinjaman yang diterbitkan dengan tingkat bunga variabel mengekspos Grup terhadap risiko suku bunga arus kas. Grup mengelola risiko ini dengan melakukan *cross currency interest rate swap* dari porsi pinjamannya untuk mengurangi pengaruh dari perubahan suku bunga mengambang.

Grup menganalisis eksposur dari risiko bunga secara dinamis. Beberapa skenario disimulasikan dengan beberapa pertimbangan seperti pembiayaan kembali, memperbarui dari kondisi yang ada dan alternatif lain pembiayaan. Berdasarkan skenario tersebut diatas, Grup mengelola risiko arus kas dari suku bunga dengan melakukan pembiayaan pinjaman dengan suku bunga yang lebih rendah.

Berikut ini analisis sensitivitas, ditentukan berdasarkan eksposur suku bunga terhadap liabilitas keuangan yang menggunakan suku bunga mengambang pada akhir periode pelaporan. Analisis ini disajikan dengan asumsi liabilitas keuangan pada akhir periode pelaporan masih beredar sepanjang periode, dengan variabel lain konstan terhadap laba setelah pajak Grup.

Pada tanggal 31 Desember 2019, jika suku bunga meningkat/menurun 0,1% dengan semua variabel lainnya termasuk tarif pajak tetap konstan, maka laba setelah pajak akan menurun/meningkat sebesar USD 411.454 (2018: USD 393.442).

b. Risiko kredit

Risiko kredit yang dihadapi Grup adalah risiko ketidakmampuan dari debitur untuk memenuhi liabilitas keuangannya sesuai dengan persyaratan-persyaratan yang telah disepakati bersama. Eksposur tersebut terutama berasal dari risiko pelanggan akan gagal memenuhi liabilitasnya.

Semua kas di bank, deposito berjangka, dan deposito berjangka yang dibatasi penggunaannya ditempatkan di bank asing dan lokal yang memiliki reputasi.

50. FINANCIAL RISK MANAGEMENT (continued)

Financial risk factors (continued)

a. Market risk (continued)

(iii) Interest rate risk

The Group's interest rate risk arises from long-term borrowing denominated in US Dollars and Rupiah. The interest rate risk on cash is not significant and all other financial instruments are not interest bearing. Borrowings issued at variable rates expose the Group to cash flow interest rate risk. The Group has managed this risk by entering into cross currency interest rate swap agreements on a portion of its debt to reduce the impact of changes in interest rates on its floating rate debt.

The Group analyses its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration the refinancing of existing positions, and alternative financing. Based on the above scenarios, the Group manages its cash flows interest rate risk by refinancing borrowings at a lower interest rate.

The sensitivity analysis below had been determined based on the exposure of the financial liabilities to floating interest rates at the end of reporting period. The analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole period, with other variables held constant, of the Group's profit after tax.

As at 31 December 2019, if the interest rate had increased/decreased by 0.1% with all variables including tax rates being held constant, the Company's profit after tax would decrease/increase by USD 411,454 (2018: USD 393,442).

b. Credit risk

The credit risk faced by the Group is the risk of inability of debtors to fulfill their financial obligations in accordance with the terms of the agreement. This exposure derives mainly from risk of customers failing to fulfill their obligations.

All the cash in banks, time deposits and restricted time deposits are placed in reputable foreign and local banks.

50. MANAJEMEN RISIKO KEUANGAN (lanjutan)

Faktor risiko keuangan (lanjutan)

b. Risiko kredit (lanjutan)

Risiko kredit dari agen penjualan relatif rendah dikarenakan sebagian besar penjualan tiket penumpang dan kargo ditanganai melalui agen yang berada dalam pengaruh dan naungan IATA. Agen-agen ini terhubung dengan sistem kliring untuk setiap negara untuk penyelesaian penjualan tiket penumpang atau kargo.

Klaim dan liabilitas yang timbul antar maskapai penerbangan biasanya diselesaikan secara bilateral atau melalui IATA *Clearing House*. Penyelesaian dilakukan terutama dengan meng-offset piutang dan utang secara berkala, yang menyebabkan berkangnya risiko gagal bayar secara signifikan.

Risiko kredit dari transaksi investasi dan instrumen keuangan derivatif timbul dari tidak dilakukannya pembayaran sesuai kontrak, relatif rendah karena transaksi hanya dilakukan dengan pihak yang memiliki peringkat kredit yang tinggi.

Grup mempunyai kebijakan untuk memastikan bahwa penjualan terhadap pelanggan dilakukan dengan riwayat kredit yang tepat, untuk membatasi jumlah kredit maksimum kepada pelanggan dan untuk memonitor penggunaan dari setiap batas kredit secara berkala.

Nilai tercatat aset keuangan pada laporan keuangan konsolidasian setelah dikurangi dengan penyisihan penurunan nilai yang mencerminkan eksposur maksimum risiko kredit pada tanggal pelaporan adalah sebagai berikut:

50. FINANCIAL RISK MANAGEMENT (continued)

Financial risk factors (continued)

b. Credit risk (continued)

The credit risk from sales agents is relatively low due to most of the sales of passenger ticket and cargo being handled by agents under the influence and auspices of IATA. These agents are connected with a clearing system for every country for settlement of passenger ticket or cargo sales.

Claims and liabilities incurred between airlines are normally settled bilaterally or through the IATA Clearing House. Settlement is mainly done by periodically offsetting payables and receivables, which significantly reduces the risk of failure to pay.

Credit risk from investments and derivative financial instruments, arising from failure to make payments as per the contract, is relatively low because such transactions are only conducted with parties with a high credit rating.

The Group has policies in place to ensure that sales of products are made to customers with an appropriate credit history, to limit the amount of maximum credit threshold to customers and to monitor the utilisation of the credit limits on a regular basis.

The carrying amount of financial assets recorded in the consolidated financial statements, net of any allowance for impairment losses represents the maximum credit risk exposure at the reporting date are as follows:

c. Risiko likuiditas

Risiko likuiditas merupakan risiko yang muncul dalam situasi dimana posisi arus kas Grup mengindikasikan bahwa arus kas masuk dari pendapatan jangka pendek tidak cukup untuk memenuhi arus kas keluar untuk pengeluaran jangka pendek. Untuk mengatur risiko likuiditas, Grup memonitor dan menjaga tingkat kas dan setara kas yang diperkirakan cukup untuk mendanai kegiatan operasional Grup dan mengurangi pengaruh fluktuasi arus kas. Manajemen Grup juga secara rutin memonitor perkiraan arus kas dan arus kas aktual, termasuk profil jatuh tempo pinjaman, dan secara terus menerus menilai kondisi pasar keuangan untuk kesempatan memperoleh dana. Sebagai tambahan, Grup juga mengatur untuk memiliki fasilitas *stand-by loan* yang dapat ditarik sesuai dengan permintaan untuk mendanai kegiatan operasi pada saat diperlukan.

Tabel dibawah ini menganalisa liabilitas keuangan Grup pada tanggal pelaporan berdasarkan kelompok jatuh temponya dari sisa periode hingga tanggal jatuh tempo kontraktual. Jumlah yang diungkapkan dalam tabel ini adalah nilai arus kas kontraktual yang tidak terdiskonto termasuk estimasi pembayaran bunga:

c. Liquidity risk

Liquidity risk is defined as a risk that arises in situations where the cash inflow from short-term revenue is not enough to cover the cash outflow of short-term expenditure. To manage its liquidity risk, the Group monitors its level of cash and cash equivalents and maintains these at a level deemed adequate to finance the Group's operational activities and to mitigate the effect of fluctuations in cash flow. The Group's management also regularly monitors projected and actual cash flow, including loan maturity profiles and continuously assesses the financial markets for opportunities to raise funds. In addition, the Group has a stand-by loan facility which can be drawn upon request to fund its operations as and when needed.

The table below analyses the Group's financial liabilities at the reporting date into relevant maturity groupings based on the remaining period to the contractual maturity date. The amounts disclosed in the table represent contractual undiscounted cash flows including estimated interest payments:

Estimasi nilai wajar

Nilai wajar asset dan liabilitas keuangan diestimasi untuk keperluan pengakuan dan pengukuran atau untuk keperluan pengungkapan.

Nilai wajar adalah suatu jumlah dimana suatu aset dapat dipertukarkan atau suatu liabilitas diselesaikan antara pihak yang memahami dan berkeinginan untuk melakukan transaksi wajar.

PSAK 68, "Pengukuran Nilai Wajar" mensyaratkan pengungkapan atas pengukuran nilai wajar dengan tingkat hierarki nilai wajar sebagai berikut:

- a) harga kuotasi (tidak disesuaikan) dalam pasar aktif untuk aset atau liabilitas yang identik (tingkat 1)
- b) input selain harga kuotasi yang termasuk dalam tingkat 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya derivasi dari harga) (tingkat 2), dan
- c) input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi) (tingkat 3).

Nilai wajar instrumen keuangan yang tidak diperdagangkan di pasar aktif ditentukan dengan menggunakan teknik penilaian tertentu. Teknik tersebut menggunakan data pasar yang dapat diobservasi sepanjang tersedia dan seminimal mungkin mengacu pada estimasi. Apabila seluruh input signifikan atas nilai wajar dapat diobservasi, instrumen keuangan ini termasuk dalam tingkat 2.

Fair value estimation

The fair value of financial assets and liabilities is estimated for recognition and measurement or for disclosure purposes.

The fair value is the amount for which an asset could be exchanged or a liability settled between knowledgeable and willing parties in an arm's length transaction.

PSAK 68, "Fair Value Measurement" requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1)
- b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2), and
- c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Estimasi nilai wajar (lanjutan)

Tabel dibawah ini menggambarkan nilai tercatat dan nilai wajar dari liabilitas keuangan yang tidak disajikan Grup pada nilai wajarnya:

	31/12/2019	Nilai tercatat/ Carrying amount	Nilai wajar/ Fair value
Pinjaman jangka panjang	143,376,665	143,011,356	
Liabilitas sewa pembiayaan	52,568,577	52,478,680	
Utang obligasi	498,996,741	498,800,000	

¹⁾ Disajikan kembali, lihat Catatan 54.

Nilai wajar dari utang sewa pembiayaan dinilai menggunakan diskonto arus kas berdasarkan tingkat suku bunga yang dikenakan pada masing-masing utang sewa pembiayaan terakhir yang didapatkan Grup. Pengungkapan nilai wajar utang sewa pembiayaan dihitung menggunakan Tingkat 2.

Nilai wajar dari utang sukuk dan pinjaman efek beragun asset dengan harga kuotasian diukur berdasarkan harga pasar kuotasian pada tanggal posisi keuangan. Instrumen ini diklasifikasikan dalam Level 1 pada hirarki nilai wajar

Investasi saham jangka panjang yang nilai wajarnya tidak dapat diukur secara andal diukur menggunakan Level 3 dalam hirarki nilai wajar yang mencerminkan jumlah yang dibayarkan atau harga perolehan.

Pada tanggal 31 Desember 2019 dan 2018, instrumen keuangan derivatif dihitung menggunakan Tingkat 2. Nilai wajar diukur pada nilai tunai estimasi arus kas masa depan berdasarkan kurva pendapatan yang dapat diobservasi.

Utang bank dan pinjaman dari pihak ketiga merupakan liabilitas dengan tingkat bunga mengambang, sehingga nilai tercatat setara dengan nilai wajar.

Nilai tercatat dari aset dan liabilitas keuangan lainnya telah berkisar menunjukkan nilai wajarnya karena memiliki sifat jangka pendek dari instrumen keuangannya.

Untuk tahun yang berakhir pada tanggal 31 Desember 2019 dan 2018, tidak terdapat pengalihan antar tingkat.

Manajemen risiko permodalan

Dalam mengelola permodalannya, Grup senantiasa mempertahankan kelangsungan usaha serta memaksimalkan manfaat bagi pemegang saham dan pemangku kepentingan lainnya.

Grup secara aktif dan rutin menelaah dan mengelola permodalannya untuk memastikan struktur modal dan pengembalian yang optimal bagi pemegang saham, dengan mempertimbangkan efisiensi penggunaan modal berdasarkan arus kas operasi dan belanja modal, serta mempertimbangkan kebutuhan modal di masa yang akan datang.

50. FINANCIAL RISK MANAGEMENT (continued)

Fair value estimation (continued)

The table below describes the carrying amount and fair value of the financial liabilities that are not presented by the Group at fair value:

	31/12/2018¹⁾	Nilai tercatat/ Carrying amount	Nilai wajar/ Fair value	
Pinjaman jangka panjang	103,072,687	94,904,390		Long-term loans
Liabilitas sewa pembiayaan	66,850,098	66,902,125		Finance lease liabilities
Utang obligasi	496,845,180	481,885,000		Bonds payable

¹⁾ As restated, see Note 54.

The fair value of finance lease payables is measured using discounted cash flows based on the interest rate of the latest finance lease payable entered into by the Group. Fair value disclosure of finance lease payables is calculated using Level 2 inputs.

The fair values of sharia bonds payable and asset-backed securities are based on quoted market prices at the financial position date. These instruments are classified as Level 1 in the fair value hierarchy.

Other long-term investments in shares for fair values can not be reliably measured are measured using Level 3 of fair value hierarchy which represents consideration payment or cost.

As at 31 December 2019 and 2018, the derivative financial instruments are measured using a Level 2 method. The fair value is measured as the present value of the estimated future cash flows based on observable yield curves.

Bank loans and loans from a third party are liabilities with floating interest rates, thus the carrying amounts of the financial liabilities approximate their fair value.

The carrying amounts of other financial assets and liabilities approximate their fair value due to the short-term nature of the financial instruments.

For the year ended 31 December 2019 and 2018, there were no transfers between levels.

52. KUASI REORGANISASI (lanjutan)

Kuasi-reorganisasi dilakukan dengan metode reorganisasi akuntansi dimana aset dan liabilitas dinilai kembali sebesar nilai wajarnya yang dihitung dengan metode nilai pasar dan arus kas yang didiskontokan. Selisih hasil revaluasi aset dan liabilitas disajikan dalam saldo selisih revaluasi aset dan liabilitas yang digunakan untuk mengeliminasi deficit. Sebagai tambahan, nilai wajar dari aset dan liabilitas yang digunakan dalam kuasi-reorganisasi menjadi saldo awal di dalam laporan keuangan yang dimulai tanggal 1 Januari 2012 dan selanjutnya diukur menggunakan kebijakan akuntansi relevan.

Selanjutnya, Perusahaan mengajukan pengurangan nilai nominal per saham dari Rp 500 menjadi Rp 459, tanpa mengurangi jumlah saham yang beredar. Penurunan nilai nominal saham tersebut menghasilkan tambahan modal disetor sebesar USD 459.852 pada tanggal 1 Januari 2012. Sesuai dengan peraturan yang berlaku, pelaksanaan kuasi-reorganisasi dan penurunan nilai nominal saham Perusahaan harus mendapat persetujuan dari para pemegang saham Perusahaan dan Menteri Hukum dan Hak Asasi Manusia sebelum hal tersebut berlaku. 52. QUASI REORGANISATION (continued)

The quasi-reorganisation was carried out using the accounting for reorganisation method, whereby assets and liabilities are revalued at their fair values using market value and discounted cash flows model. The revaluation surplus of asset and liabilities is recognised as difference in revaluation of assets and liabilities and used for eliminating deficit. In addition, the fair value of those assets and liabilities as used in the quasi-reorganisation becomes the initial carrying amount in the consolidated financial statements commencing 1 January 2012 and are subsequently measured using the relevant accounting policies.

Moreover, the Company proposed a reduction of par value per share from Rp 500 to Rp 459, without reducing the number of shares; thereby creating additional paid-in capital of USD 459,852 as at 1 January 2012. In accordance with regulations, both the quasi-reorganisation and reduction of par value of shares of the Company should be approved by the Company's shareholders and Minister of Justice and Human Rights before becoming effective. Based on the Shareholders' Extraordinary General Meeting Deed No. 1 dated 28 June 2012 of Aulia Taufani, S.H., the shareholders' approved the quasi-reorganisation as at 1 January 2012 and the reduction of par value per share to effect the quasi-reorganisation. This Deed was approved by the Ministry of Justice and Human Rights in his decision letter No. AHU-66159.AH.01.02 Tahun 2012 dated 27 December 2012. Furthermore, the Company had obtained approval from the President of the Republic of Indonesia as stated in the Government Regulation No. 114 Year 2012 dated 27 December 2012, which was published in State Gazette of the Republic of Indonesia No. 287 in 2012.

Accordingly, the Group revalued its opening consolidated statement of financial position at 1 January 2012, to fair value which was determined by an independent appraiser. The fair value adjustment resulted in USD 44,963,385 revaluation increase of assets. The assets principally affected by the fair value adjustments and the amount of such adjustments are as follows:

Pada tahun 2019, Grup menghasilkan laba sebesar USD 6.457.765 (2018: rugi USD 228.889.524). Peningkatan profitabilitas dicapai terutama melalui perbaikan manajemen harga tiket, program efisiensi biaya dan pengurangan frekuensi penerbangan yang berakibat kenaikan passenger yield, penurunan rerata kurs tersedia per kilometer (ASK), kenaikan rerata faktor muat penumpang (SLF) dan penurunan biaya operasi.

56. DILUTION IN GA'S SHARES

Based on a resolution of the General Shareholders' Meeting of PT Gapura Angkasa (GA) on 13 November 2019 which was notarised in Notarial Deed No.105 dated 18 November 2019 of Jimmy Tanal, notary in Jakarta, the shareholders of GA approved the issuance of new GA shares that is fully paid by PT Angkasa Pura II (Persero), an entity under common control. 57. GOING CONCERN

In 2019, the Group generated profit of USD 6,457,765 (2018: loss USD 228,889,524). The improvement in profitability is achieved primarily through better pricing management, cost efficiency program, and reductions in flight frequency which resulted in higher passenger yield, reduction in average available seat kilometres (ASK), increase average seat load factor (SLF) and lower operating costs.

57. KELANGSUNGAN USAHA (lanjutan)

Pada tanggal 31 Desember 2019, Grup memiliki modal kerja negatif sebesar USD 2.123.943.734 (2018: USD 1.981.450.875). Modal kerja negatif terutama disebabkan oleh pinjaman jangka panjang Perusahaan yang akan jatuh tempo di tahun 2020 dan pinjaman jangka panjang GMFAA diklasifikasikan sebagai liabilitas jangka pendek karena GMFAA tidak dapat memenuhi rasio keuangan tertentu yang disyaratkan oleh pemberi pinjaman. Selain itu, beberapa pinjaman Perusahaan yang jatuh tempo di tahun 2020 tidak memenuhi pembatasan keuangan.

Sebagai bagian dari usaha berkesinambungan untuk menghadapi dan mengelola kondisi diatas, Grup mengambil langkah-langkah yang telah dan akan dilaksanakan secara berkelanjutan sebagai berikut:

- Optimalisasi pendapatan penumpang berjadwal dari rute-rute tertentu dengan meningkatkan harga jual rata-rata dan optimalisasi produksi;
- Menumbuhkan pendapatan kargo berjadwal dengan meningkatkan harga jual rata-rata serta fokus pada pasar yang lebih tinggi dan mengoptimalkan rute dengan pencapaian yang rendah
- Meningkatkan *revenue charter* yang berkelanjutan dengan membuat kerjasama kemitraan jangka panjang
- Meningkatkan arus kas dengan mengganti cadangan pemeliharaan dengan jaminan pembayaran (SBLC) dari pihak perbankan
- Secara aktif mencari alternatif pendanaan terkait utang dan pinjaman yang akan jatuh tempo;
- Sinergi Garuda Indonesia Grup melalui keselarasan rute dan penetapan jadwal penerbangan yang disesuaikan dengan permintaan pasar; dan
- Re-negosiasi kontrak pesawat dengan *lessor* untuk menurunkan biaya sewa pesawat.

Tantangan-tantangan berikut ini diluar kendali Grup dan dapat memberikan dampak buruk terhadap kinerja keuangan dan kemampuan Grup dalam mempertahankan kelangsungan usahanya:

- Kebijakan Pemerintah tentang Tarif Batas Atas dan Tarif Batas Bawah yang memengaruhi fleksibilitas Grup dalam mengelola harga tiket untuk penerbangan domestik.
- Volatilitas harga avtur yang memengaruhi arus kas dan beban operasional penerbangan.
- Volatilitas kurs Rupiah terhadap USD yang memengaruhi arus kas operasional dan pendapatan usaha.
- Persaingan ketat pada penerbangan internasional
- Epidemi Covid-19 di tahun 2020 yang berakibat masyarakat menghadapi pembatasan perjalanan untuk rute-rute penerbangan tertentu dan menghindari perjalanan yang tidak penting. Hal ini termasuk larangan sementara kunjungan keagamaan ke Arab Saudi.

Manajemen Grup secara aktif memantau situasi di atas dan mengeksplorasi opsi-opsi berikut untuk mengantisipasi penurunan jumlah penumpang yang signifikan akibat dari epidemi Covid-19:

- Penyesuaian kapasitas
- Diskon untuk rute-rute penerbangan tertentu
- Optimalisasi potensi untuk layanan kargo dan charter
- Koordinasi erat dengan Pemerintah
- Efisiensi biaya dan negosiasi ulang dengan vendor-vendor Grup.

57. GOING CONCERN (continued)

As at 31 December 2019, the Group had a negative working capital of USD 2,123,943,734 (2018: USD 1,981,450,875). The negative working capital is primarily driven by the Company's long-term loan which is due in 2020 and GMFAA's long-term loan classified as a current liability because GMFAA could not fulfil certain financial ratios as required by its lender. In addition, certain bank loans of the Group, which mature in 2020, did not comply with their financial covenants.

As part of its continuing efforts to respond to and manage the adverse effects of the above mentioned conditions, the Group has undertaken and is continuously implementing the following measures, among others:

- *Optimise scheduled passenger revenues from certain routes by increasing average selling prices and optimising production;*
- *Increase scheduled cargo revenues by increasing average selling prices and focusing on higher markets and optimising routes with low achievement;*
- *Generate a sustainable charter revenue by building long term charter partnership;*
- *Increase cash flow by replacing maintenance reserves with payment guarantees (SBLC) from the banks;*
- *Actively look for funding alternatives related to debt and loans that are due;*
- *Improve Garuda Indonesia Group synergy through route alignment and flight schedule arrangement that is tailored to market demand; and*
- *Re-negotiate aircraft contracts with lessors to reduce aircraft rental costs.*

The following challenges are beyond the Group's control and may adversely affect the Group's financial performance and ability to continue as a going concern in the following manner:

- *The Government's policy on Upper Limit Rates (TBA) and Lower Limit Rates (TBB) which affect the Group's flexibility in ticket pricing management for domestic flights.*
- *Volatility in aviation turbine fuel price which affect operating cash and flight operations expense*
- *Volatility in exchange rate between Rupiah and USD which affects operating cash flows and operating revenues.*
- *Intense competition in international flights*
- *Covid-19 epidemic in 2020 which results in people facing travel restrictions on certain flight routes and avoiding nonessential travel. These include the temporary ban on religious visits to Saudi Arabia.*

The Group's management actively monitors the above situations and is exploring the following options to anticipate the significant decline in the number of passengers resulting from the Covid-19 epidemic:

- *Rightsizing capacity*
- *Discount on selected flight routes*
- *Optimising potentials in cargo and charter services*
- *Close coordination with the Government*
- *Cost efficiency and renegotiate costs with the Group's vendors.*

57. KELANGSUNGAN USAHA (lanjutan)

Kemampuan Grup untuk mempertahankan kelangsungan usahanya dan menghadapi tantangan-tantangan eksternal diatas bergantung pada kemampuan Grup untuk menghasilkan arus kas yang cukup untuk membayar liabilitas secara tepat waktu dan mematuhi persyaratan dan ketentuan perjanjian kredit, serta kemampuan Grup memperbaiki operasi, kinerja, dan posisi keuangannya.

Laporan keuangan konsolidasian ini disusun dengan asumsi bahwa Grup akan terus beroperasi secara berkelanjutan. Asumsi kelangsungan usaha terdampak oleh risiko dan ketidakpastian seperti dijelaskan di atas; oleh karena itu ada kemungkinan bahwa perubahan keadaan yang merugikan dapat berdampak pada kelangsungan usaha Grup. Bila perubahan seperti ini terjadi, maka asumsi kelangsungan usaha Grup dapat berubah. Laporan keuangan konsolidasian tidak termasuk penyesuaian yang mungkin timbul dari hasil dari ketidakpastian di atas.

57. GOING CONCERN (continued)

The Group's ability to maintain its business as a going concern and face external challenges above depends on the Group's ability to generate sufficient cash flow to meet its liabilities on a timely basis and comply with the terms and conditions of the loans, as well as the Group's ability to improve its operations, performance and financial position.

The consolidated financial statements have been prepared assuming the Group will continue to operate as a going concern. The going concern assumption is subject to risks and uncertainties as described above; hence there is a possibility that adverse changes in circumstances may have an impact on the Group's going concern. If a change in such circumstances occur, the Group's going concern assumptions may be changed. The consolidated financial statements do not include any adjustments that might result from the outcome of the uncertainties above.
